YEAR MAY SEE GREAT
CHANGES IN POLITICS

Copyright, 1932, by Post Pub. Co.

LAWRENCE

Washington (CFA)—As 1932 passes into history it will be known as the year of preparation for the political battle of 1933. And in many respects the forthcoming year may prove as much a turning point in national politics as the year 1910.

Important changes already announced for the year 1932 are the resignation of the Senate and the election of a new President. It would not be surprising to see other changes as a result of the presidential election and final elections in November.

The contest is not confined to the party, for the Democrats as well as the Republicans have their internal troubles. Senator Medlin faces stiff opposition in Alabama. Senator Simmons will have a fight for re-election in North Carolina. On the Republican side Senator Deneen of Illinois is opposed by Mrs. Medlin McCormick for re-election. Dwight Davis will have opposition in the Republican primaries for the United States senate in New Jersey. A senatorial battle is scheduled for January where Senator Sackett is living up his seat to become American ambassador to Germany. In Nebraska Senator Norris has opposition from various quarters due to his outspoken attitude on public questions. In Massachusetts will have a senatorial battle as Senator Gillette will not be a candidate for re-election, and there is Pennsylvania, too, where Senator Grundy must enter the lists to get the Republican nomination.

GOVERNORS FACE TESTS

Then there are some governorship battles which have a national significance. Governor Ritchie of Maryland is up for re-election and there are indications that the 1932 campaign left some elements of opposition to him, though his friends are saying that he is overwhelmingly elected he will be a formidable contender for the 1932 Democratic presidential nomination. Governor Roosevelt faces a test in New York state.

But national interest will be centered chiefly on the congressional election. All the members of the house, of course, must either retire or be candidates for re-election, while in the senate only one-third of the membership changes every two years. The house is to be the battle-

MASS FUNERAL PLANNED
IN SCOTLAND TRAGEDY

Paisley, Scotland (AP)—Arrangements proceeded today for a mass funeral for the 72 youthful victims of the blind panic which followed a small fire yesterday afternoon in the Glen motion picture theatre here. There was hardly a home in this Scottish mill town but suffered loss of kin in the catastrophe. The city council, recognizing that most, if not all represented either impoverished or humble circumstances, expected to provide for interment in a single grave.

Meanwhile beneath murky smoke-ridden skies weeping parents, concerned identification of the bodies of their children, most of whom were between the ages of 5 and 14.

NOTED RADIO ENGINEER
KILLED IN ACCIDENT

El Paso, Texas (AP)—Victim of a product of his own mind and hands, Dean R. W. Goddard of the engineering school of New Mexico Agricultural and Mechanical college was killed last night by a charge of 12,000 volts of electricity received while he was preparing equipment at Radio Station KOB for a New Year's eve broadcast.

Dean Goddard, widely known radio engineer, designed and built the station, operated by the college, which is 35 miles west of here. A rescue attempt by the college was unable to revive him. The scheduled broadcast program was cancelled.

CHICAGO COAL STRIKE
IS NEARING REALITY

Chicago (AP)—Chicago's impending coal strike was nearing reality today.

Announcement made last night by a west side local of the Coal Teamsters' and Chauffeurs' union that it would go on a strike effective tomorrow was taken by members of the Coal Merchants' association as an indication there would be coordinated action by all locals of the union.

If such were the case, they pointed out, there would be a tieup of all coal deliveries.

Immediately following the call, the dealers sought out union leaders and arranged for a conference today.

"Welcome Home!"

Thousands of our readers look forward each day to the three when the Post-Crescent will be delivered to their home.

WILD GROWDS GREET NEW YEAR

70,000 WILL SEE CLASSIC IN ROSE BOWL

Golden Panthers of Pittsburgh Face Southern California University

Pasadena, Calif. (AP)—On the historic greenward of the Rose bowl, where annually is unfolded on New Year's day the dramatics of an inter-collegiate contest for gridiron supremacy, the Golden Panthers of Pittsburgh and the University of Southern California Trojans today assembled their forces for the fifteenth annual Tournament of Roses football classic.

Primed to the minute, these select eleven will pit their skill and cunning against each other before a capacity crowd of 70,000 enthusiasts in defense of the honors of the east and the Pacific seaboard.

Despite a season's record is marked by two defeats, Coach Howard Jones' Trojans were quoted as slight favorites to administer to Coach John Sutherland's combination its initial beating.

A much talked of climatic condition—warm weather—had a great deal to do with this partiality shown from official sources were that a clear warm day, which would see the mercury mount to 65 or 70 degrees would be on the program.

While the Pitt players and their advisory staff burned all bridges behind them by announcing that the weather would have nothing to do with the outcome of the struggle, followers of the annual game pointed to previous conflicts and shook their heads.

FIT MORE BRILLIANT

For individual brilliance, the Pitt team, with such All-American timber as Octavius Umana, Joe Donohue, Tom Parkinson and Ray Montgomery, holds the edge. The Southern California squad hopes to couple a boosted reserve power of untold pre-

MULLAN SOBERED BY CONVICTIONS

Sheriff to Appeal Two Year Sentence to Higher Federal Court

Mullan, Idaho (AP)—This little mining town of 3,000 persons entered the New York today sans mayor, police chief, city trustees or sheriff, but even so there were remarkably few headaches to mark the morning after New Year's eve.

Mullan has been described as one of the wildest towns in the Coeur d'Alene mining region and the city police force made no effort to patrol the spots where revelry customarily grows most hilarious, but conviction of virtually all the town's elective officers on federal liquor charges apparently had a potent sobering effect in itself.

Seven of the officials, who were among the 24 persons found guilty of participating in the operation of a "wide open" town, appeared in federal court yesterday. Declared they believed appeals would be useless and asked to be committed to prison at once.

Sheriff R. E. Weniger, who received the heaviest sentence two years in federal prison and \$1,000 fine, decided to appeal, however, and was released under \$5,000 bond.

Other sentences included 13 months imprisonment and a \$1,000 fine for Mayor Arthur Harwood; 15 months each for Deputy Sheriff Charles Bloom and Chief of Police F. C. Welchman; and one year and a day for Policeman H. Morphy. The trustees were given sentences ranging from 10 to 15 months.

NEW YEAR'S WEDDING IS SURPRISE TO PAIR

Chicago (AP)—The New Year's first wedding came at the stroke of midnight—and was a surprise to the bride and bridegroom.

A year ago, Miss Yvonne E. Delman met David Ross in Los Angeles; and they had planned to be married soon, while Ross was on a visit here, but the date had not been set.

Judge Joseph Schuman, of the Morris court, brother-in-law of the bride, obtained the license without knowledge of the couple and married them in the height of gaiety at a Loop hotel.

WINTER ON ITS WAY BACK TO WISCONSIN

Milwaukee (AP)—If there is anything more appropriate for the first day of the new year than a weather story, it has not been discovered.

Which is a preface to the promise that Wisconsin and upper Michigan can expect a return engagement of winter. Spring is off the boards, said federal weather bureau officials as they announced a New Year's day of snow flurries and clouds.

WATCH FOR THE SECRET OF MOHAWK POND

Durham, N. C. (AP)—The papers of General Sir Thomas Gage, British commander-in-chief in America from 1763 to 1773 have just been obtained by the University of Michigan. Ann Arbor, through the gift of William L. Clements, it was announced by the American Historical association, here today by Randolph G. Adams, director of the University of Michigan library. Mr. Adams is attending the annual meeting of the association.

"The documents naturally cover the North American continent from the West Indies on the east, to the Mississippi on the west and from Newfoundland on the north to Pennsylvania, on the south," Mr. Adams said.

"Involved in the documents is the correspondence between General Gage, as the king's principal representative in America, and all of the colonial governors; all of the British commanders, both on the eastward seaboard and on the frontier posts; and thousands of letters with the disgruntled merchants and busi-

3 Italians In Paris Held For Anti-Fascist Plotting

Paris (AP)—Three Italians, described as newspapermen, were in prison cells here today suspected by the Surete general, which is the French Scotland Yard, with anti-Fascist plotting against the Italian naval conference delegation and with possession of bombs and bomb-making materials.

The police alleged the three had maintained relations with Camillo Berneri who a week ago confessed in Brussels to a dual plot against the lives of the Belgian royal family as they journeyed to Italy for the wedding of Princess Marie Jose to the prince of Piedmont, Jan. 8.

Their names were given as Alberto Cianca, Giuseppe Sarbelli, and Alberto Panchiani. All were known to have frequented the home of Cianca, where bombs, a quantity of high explosive, detonators, and other bomb materials were found and confiscated.

While details of the plot were not disclosed, it was said the men were suspected of conspiring against members of the Italian naval delegation, who will pass through Paris shortly enroute to the London conference. The prisoners themselves refused to make any statement. They employed Henri Torres, one of the most widely known criminal lawyers in Paris for their defense.

Precautions have been doubled to prevent any untoward incident in connection with the trip of the Belgian royals across France to Italy this week for the wedding next week. Police realize a large number of persons inimical to the Italian administration live in France and have spared no steps to make any plot abortive.

The most serious attempt so far in connection with the royal wedding was the unsuccessful effort of an Italian anti-Fascist to assassinate Prince Humbert in Brussels recently. One of the prince's entourage knocked the man's arm down as he fired and the bullet went wild.

THEFT OF PAINTING BEWILDERS POLICE SEEKING FOR CLEWS

London (AP)—Police today puzzled over one of the strangest of art theft mysteries yet to come to their attention.

M. Berchabache of Brussels, shipped a famous van Dyck painting, "Concert des Anges," of estimated \$30,000 (\$150,000) value, to Geoffrey Phillips, west end art dealer here.

When the packing case was opened at the latter's gallery the frame of the picture was found intact but the canvas, which measured five feet six inches by four feet three inches, was completely cut out.

The outside of the case appeared perfectly normal and police said they had no clue as to how the painting had been extracted.

Sir Anthony van Dyck was the Flemish painter who became court painter to Charles I of England in the early seventeenth century. He was known particularly for his delineations of what since has come to be known as a "van Dyck beard."

POPE PIUS MOURNS BROTHER'S DEATH

Rome (AP)—Pope Pius XI today mourned his brother, Count Fermo Ratti, who died suddenly at 9:35 p. m. last night after a two days illness.

Immediately after hearing of the death of Monsignors Venino, Cacciai Dominiani and Castiglione went to the Vatican to express their sympathy. The countess and their son was with Count Ratti when he died.

The Pontiff early this morning celebrated mass for the repose of his brother's soul, remaining in his private chapel for a long time thereafter absorbed in prayer. Persons close to him denied he would go into Rome to venerate his brother's body.

The funeral will be held Friday at 10 a. m. at the church of Santa Maria Angeli, the Paris Priest Monsignor Giovannelli officiating. The body will be sent Friday evening by rail to Milan, and thence to Desio for interment in the family plot.

Count Fermo was born at Desio in 1854 three years prior to the pontiff. With his brother Edoardo, he engaged in silk commerce and manufacture, only recently retiring. He became ill last week with arthritic attacks, and arterio-sclerosis symptoms which yesterday grew worse and led to his death.

He leaves his widow, the Countess Ernestina, a son, Franco, who is an engineer, and a daughter who is the Marchioness Persichetti Ugolini, wife of the counselor at the Nicaraguan legation at the Holy See, and whose wedding the pope himself performed.

Pontiff Celebrates Mass for Count Fermo Ratti, Elder Brother

Madrid (AP)—Political circles today seethed with rumors of various imports, chief among which was that General Primo de Rivera, Spanish dictator, had presented his own and his cabinet's resignation to King Alfonso.

It was said he would permit the king to name a man to form a new government. Persons close to the premier, however, denied that was the case and said he had only submitted a plan for gradual political transformation of the government. This, it was said, would not be completed for some time.

King Alfonso himself presided over cabinet meeting yesterday at the Royal palace. The ministers would not say what took place.

U. S. NARCOTIC AGENT IS SHOT FROM AMBUSH

Seattle (AP)—P. L. Jourdan, federal narcotic agent, was shot and critically wounded by an unknown assailant in front of his home here early today. Jourdan was about to enter his automobile when four shots rang out from the shadows at the edge of the sidewalk. He fell to the pavement with a bullet wound in the abdomen, and was rushed to the city hospital. He lapsed into unconsciousness before he could give any description of his assailant. Mr. Jourdan said his husband had been out all evening on government business.

NOVA SCOTIA OFFICERS ARE BEATEN UP BY GANG

Halifax, N. S. (AP)—Two members of the inland revenue department were severely beaten by a gang here yesterday after shots had been exchanged in a battle over the contents of a sunken motorboat earlier in the day.

J. E. Smith and J. McLeod, his assistant, were beaten with clubs and their way to visit a rum laden boat. Twelve or 14 men were in the gang, Smith said, and the truck was filled with liquor taken from a motorboat lying near several nearby houses.

Earlier in the day shots were exchanged in a clash between officers and a group of men who were attempting to salvage the contents of a sunken motorboat near Birchville. Two automobiles were seized and a third, stolen from the officers, was later found abandoned containing a case of whisky. William Gregoire, a driver who said he had been engaged in salvage work, was arrested.

TWO SHOT TO DEATH IN HOLIDAY BRAWLS

Chicago (AP)—Two men were shot to death in Chicago today before the year 1930 was barely an hour old. Both slayings were attributed to New Year's eve celebrations.

William Heyenmann, 35 years old, was shot and fatally wounded at a party which wound up in a quarrel. His slayer fled.

Fred Leon Roe, 32, a member of the Chicago real estate board, was found shot to death in front of a Keokuk address. Police believe revelers with fire arms were responsible for his death.

John Simmons, 40, collapsed shortly after midnight in the midst of a street celebration in which several hundred persons took part. His death was attributed to heart disease.

He was stricken by a bullet wound to the neck. Merry makers were blamed for this too.

RIVERIA AND CABINET QUIT, REPORT SAYS

Spanish Officials Silent—Dictator Not Likely to Enter Private Life

Paris (AP)—Lieutenant General Primo de Rivera, Marquis de Estella and dictator of Spain, was said today in a report from Hendaye, Spanish frontier, to have tendered resignations of the cabinet to King Alfonso.

The king was said to have reserved decision, but to have promised to communicate his answer to the dictator within three days. General Primo de Rivera has been premier and dictator since his military coup d'etat in 1923.

That report added the finance minister presented his own resignation to the premier on Monday night and declared that even if other ministers retained office he would maintain his resignation. The joint resignation followed, being handed the king Tuesday morning.

There were various interpretations of the significance of the resignation. If reports that it had been offered were correct, it was not taken to mean necessarily that General Primo de Rivera would relinquish his leadership in the government but merely might seek a modified form of the military dictatorship.

Several times recently he has said this would be necessary, although few thought his action imminent. Only this week he was quoted in A. B. C. Madrid daily, as saying a new form of government would be needed to serve in the interim between the dictatorship and government under Spain's projected new constitution. He also has been quoted as saying he desired to return to private life, but chances of this were believed rather remote here.

TAFT, PATRON OF FINE ART, DIES

Brother of Former U. S. President Dies in Cincinnati at Age of 86

Cincinnati, Ohio (AP)—Reposing in death at the end of a long career as one of America's leading patrons of the fine arts, Charles Phelps Taft was recipient today of tributes for his many benefactions. He died last night at the age of 86 after being subject to lingering infirmities of advanced age which became serious three days ago and caused a lapse into coma from which he never recovered.

While arrangements for the funeral were being made today, Taft's half brother, William Howard Taft, chief justice of the United States Supreme court and former president of the United States, planned to leave Washington with his wife to attend the services.

Charles Phelps Taft had published the Cincinnati Times Star for 50 years and during that time had distinguished himself in the patronage of not only art but education and the development of modern journalism.

Near him at the time of death were members of his family, including two daughters and three nephews.

The distinguished Cincinnati had an important hand in the development of practically every major project for the civic and cultural betterment of this city.

In adding the Cincinnati Institute of Fine Arts, Taft and his wife in 1927 gave their art collection, worth several millions of dollars, and an endowment of \$1,000,000.

He spent practically all his life in Cincinnati, his native city, except for a few years of law practice in New York. He was educated in Cincinnati primary and secondary schools and in Phillips Exeter academy, Yale university and Columbia university. His career in public life consisted of one term in congress and a term in the Ohio legislature. He never sought political preferment.

CASTLE BEGINS FIRST LAP OF HIS VOYAGE TO JAPAN

San Francisco (AP)—William R. Castle, Jr., President Hoover's special ambassador to Japan during the coming London disarmament conference, today was on his way across the Pacific he sailed yesterday for Honolulu, where he will visit remaining his voyage to Japan Jan. 9.

"The world wants peace," Castle said just before sailing yesterday, "and the world knows naval reduction will help peace. The conference, although there may be some dispute, will, nevertheless, be successful. Japan is really as anxious as all along the line, as the United States is, to reach a naval reduction."

He referred to the recent engineering congress as "a successful thing both from a scientific standpoint and for an understanding of each other."

Castle, for 12 years assistant secretary of state in Washington, recently completed an eight-month tour of Europe. He is regarded as an authority on the United States navy. Traveling with him as secretary is Edward Rice, Jr., of West Newton, Mass.

Castle said he would remain in Japan through the conference. He does not expect to return before next June.

CHARITABLE PRIEST IS SERIOUSLY ILL

Gary, Ind. (AP)—A brilliant life of charity was dimming today as Rev. Father John R. Daville lay near death in Mercy hospital.

On Christmas Eve, Father Daville, 64, was stricken by a shivering vagrant. The priest shed his overcoat and wrapped it about the man's shoulders.

The vagrant still penetrated Father Daville's clothes; he became ill, a victim of pneumonia. At the hospital, fear was expressed he would not live.

2 BROTHERS DROWN IN FOND DU LAC RIVER

Fond du Lac (AP)—The drowning of two brothers in the Fond du Lac river cast a shadow of tragedy over the city's celebration of the New Year today.

Stanley Henry, 17, and Edward Henry, 18, sons of Mr. and Mrs. E. Henry, fell into an open hole in the ice while playing skully late Tuesday.

The bodies were recovered by fishermen within 20 minutes, but resuscitation efforts failed.

BLAME LONE COW FOR BARABOO EPIDEMIC

Baraboo (AP)—A lone cow in a Baraboo dairy herd, held the blame today for a recent epidemic of septic throat here which took six lives and made hundreds ill. Infected milk from the animal, which will be killed, was responsible for the outbreak, it was decided by state health officials.

Rumor He Quits

GEN. PRIMO DE RIVERA

TAFT, PATRON OF FINE ART, DIES

Brother of Former U. S. President Dies in Cincinnati at Age of 86

Cincinnati, Ohio (AP)—Reposing in death at the end of a long career as one of America's leading patrons of the fine arts, Charles Phelps Taft was recipient today of tributes for his many benefactions. He died last night at the age of 86 after being subject to lingering infirmities of advanced age which became serious three days ago and caused a lapse into coma from which he never recovered.

While arrangements for the funeral were being made today, Taft's half brother, William Howard Taft, chief justice of the United States Supreme court and former president of the United States, planned to leave Washington with his wife to attend the services.

He was educated in Cincinnati primary and secondary schools and in Phillips Exeter academy, Yale university and Columbia university. His career in public life consisted of one term in congress and a term in the Ohio legislature. He never sought political preferment.

Infant Year Gets Noisy Hello Here

BULLETIN
Milwaukee (AP)—The scope of the federal prohibition department's mop squad extended today to some of the "unregenerate" state cities.

Well satisfied with his drastic drying-up program in Milwaukee proper, W. Frank Cunningham, deputy prohibition administrator, announced that special groups of agents had been assigned to Green Bay, Appleton, Ashkosh and Fond du Lac, among the "unregenerate" towns in the eastern section of the state.

Amid the gaiety and conviviality of Sylvester Eve parties, the New Year, shipped in with catlike quietness, bringing with it the promises and resolutions of a new year.

Local restaurants, theatres, soft drink parlors and other places of amusement were filled to capacity until the wee hours with merry-makers. Hundreds of people, young and old jammed gardens and resorts and took part in the elaborate programs.

About 200 people attended the annual New Year's party at the Elks club where everyone milled about in comfort and no patron was arrested. The resorts, however, were closed and the guests ordered to leave.

Raid on 17 night clubs and speak-easies by 150 federal prohibition agents failed to dampen the festive merriment. The raids were made on information previously obtained and no patron was arrested. The resorts, however, were closed and the guests ordered to leave.

Broadway, the unofficial headquarters of New Year celebrations was jammed with 200,000 revelers, toothing lustily on tin horns.

Police officials said the crowds were orderly and no arrests were made among the street throngs.

The managers of the leading hotels estimated that 25,000 persons were entertained in their dining rooms, while restaurants and night clubs announced capacity crowds. Cover charges in hotels ranged from \$5 to \$15.00. In the night club seats at tables cost as high as \$25.

About 10,000 persons gathered at Wall and Broadway to hear the chimes of Trinity church ring in the new year.

WHOOPEE IN CHICAGO

Chicago (AP)—Chicago saloons to 1930 with unwonted flourish and unprecedented whoopee.

Plenty of noise, plenty of people, plenty of traffic remained as a sober sun cast its first inquiring glance from the east today. The weather had much to do with it, for it has been many years since Chicago has celebrated such an occasion under as perfect weather conditions. The night was mild and there was neither rain nor snow.

Not a single arrest for liquor violation was made by the 100 federal agents who were scattered throughout the cabarets and night life centers. Police, however, made numerous arrests for drunkenness and disorderly conduct, and there were several shootings.

George K. Hultburg, assistant prohibition administrator here, telegraphed prohibition administrator E. C. Culloway at Washington: "Chicago having driest New Year's eve in history. Everything going fine. No trouble."

The morning papers agreed that the celebration was the noisiest and most enthusiastic since the prohibition law became operative. More than 20,000 persons had reservations at the leading hotels, night clubs and cabarets, and theatres reported capacity business at midnight performance.

Every available taxicab was put into service, and the boulevards and drives were packed with traffic most of the night.

Tin horns, automobile horns and exhausts, and firearms provided the noise. The exultant shooting was reported from the southside negro section and was without casualty.

GAUTY AT CAPITAL

Washington (AP)—Washington greeted 1930 with an outburst of informal gaiety last night and took up today a ceremonious round of official New Year's functions.

At the head of the list of the day's events stood the traditional White House reception, omitted last year because President and Mrs. Coolidge were out of the city, but resumed today by Mr. and Mrs. Hoover.

The chief executive and the first lady of the land, who last night spent a quiet home-like New Year's eve, made ready to receive thousands of guests, and a busy period of hand-shaking extending from 11 o'clock well into the afternoon.

Following the customary routine of official precedence, the cabinet and diplomatic corps came first, the latter attired in all the resplendent brilliance of its formal regalia. Next in order were members of the supreme court and high officials of the judiciary branch of the government, followed by members of the house and senate and officers of the army and navy. At 1 o'clock a welcome was extended to the general public.

MILWAUKEE JAIL SCANDAL

Milwaukee (AP)—The New Year's calm of Milwaukee's officialdom was somewhat disturbed today by a charge of Supervisors Joseph J. Holland and county jail supplies are being smuggled out and sold by certain deputies and clerks.

He made the statement at a committee hearing, which also was told by another supervisor, Robert Tesch, that civil service regulations are responsible for a spirit of defiance among jail employees.

ROCKY MOUNTAIN OREA COVERED WITH SNOW

Denver, Colo. (AP)—Snow which began falling shortly before midnight last night and continued this morning gave much of the Rocky Mountain region a white New Year's day. Temperatures were moderate, however, being generally above freezing.

BOOZE FLOOD UNCHECKED IN LARGE CITIES

Federal Agents' Raids in New York Fail to Check Flow in Metropolis

HOOVER IN RECEPTION

No Liquor Law Arrests in Chicago but Plenty for Drunkenness

New York (AP)—Resolving themselves into a gigantic committee for the reception of distinguished visitors, New York's millions extended a noisy but orderly welcome to the New Year.

Raid on 17 night clubs and speak-easies by 150 federal prohibition agents failed to dampen the festive merriment. The raids were made on information previously obtained and no patron was arrested. The resorts, however, were closed and the guests ordered to leave.

Broadway, the unofficial headquarters of New Year celebrations was jammed with 200,000 revelers, toothing lustily on tin horns.

Police officials said the crowds were orderly and no arrests were made among the street throngs.

EAST MEETS WEST TODAY ON GRIDIRON

All-Star Elevens Contend in Fifth Annual New Year's Day Contest

San Francisco—(AP)—Two all-star elevens, featuring All-American performers from both sides of the Rockies, will meet today in the fifth annual New Year's day football battle between the east and the west. The contest is a benefit for the Shriner's Hospital for Crippled Children here. The game begins at 2 o'clock P. M. Pacific Standard time. Three times in the last four years, the west has come out on top in the annual clash, but last year two "dark horse" eastern performers, Harpster and Holmer, led their team to a crushing 20 to 0 victory. The east was out to make it two straight today, but football observers handed the west the pre-game edge.

The western advantage lay especially in the backfield, which three key men ready to lead drove down the field. "Fanny" Hunting of Gonzaga, Benny Lom of California, and "Dutch" Clark of Colorado, are all triple threat men and finished performers in all phases of backfield play.

Coaches Andy Kerry and Dick Hanley of the east, placed the burden of key men on "Frost" Peters of Illinois. Peters will play quarterback in the country, but Hunting, Lom and Clark seem to have him covered when it comes to all-around play.

EAST'S LINE BETTER
Comparison of the lines of the two squads gives the east the edge. A mighty center trio, led by Jack Cannon of Notre Dame, hailed as one of the greatest centers of all time, and two powerful tackles, Slight of Purdue, and Twoopsey of Notre Dame, were looked upon to outplay their western rivals.

The west also holds a slight edge on condition, with Tommy Fowler of Colgate, eastern halfback, laid up with an injured knee. Calderwood and Erickson of Northwestern, and Moneys of Georgetown, are other eastern performers, nursing hurts, but they probably will be able to get into the game if needed.

All of the men on the west's team were ready for the starter's gun. The lineups:

EAST: Booma, Dartmouth, LB; Twoomey, Notre Dame, LT; Cannon, Notre Dame, LG; Cox, Colgate, C; Hunt, Illinois, RG; Knight, Purdue, RT; Tanne, Minnesota, RE; Peters, Illinois, G; Brazil, Detroit, LH; Glasgow, Iowa, RH; Nagurski, Minnesota, F.

WEST: Churchill, Oklahoma, LB; Richards, Nebraska, LT; Schwarz, California, LG; Negels, California, C; Bromelow, Texas Christian RG; Ackerman, St. Mary's, RT; Striff, Jackson State, RE; Clark, Colorado State, Q; Lom, California, LH; Fowler, Utah, RH; Waldorf, Missouri, F.

Officials: Honorary referee, Major John L. Griffiths, Beloit; Referee, Bov Evans, Milliken; umpire, Cort Majors, California; field judge, Tommy Fitzpatrick, Utah; head linesman, Joe Lipp, Chicago; assistant line judge, Chas. Horner, Chicago; time keepers, Jimmy Needles, Santa Clara; Fred Sloan, Stanford; Rufus Klavans, Chicago; and Harry Bradock, Pennsylvania.

NEW BORDER DISPUTE

SEEN BY GEOGRAPHER

Columbus, Ohio—(AP)—Michigan and Wisconsin have another boundary dispute to settle. An area comprising 4,235 acres of land and 707 square miles of water, generally supposed to be a part of Michigan, in reality belong to Wisconsin, in the opinion of Col. Lawrence Martin, president of the Association of American Geographers, in convention here.

The territory in question was retained by Michigan in 1926 when the United States Supreme court handed down a decree assumed to have settled the long standing dispute between the two states.

But according to Martin, the erroneous use of the word "by" in the decree describing the boundary Green Bay from a point of two miles west of the Chambers island lighthouse "north by east seven eights, twenty-seven miles thence" technically transferred the area to Wisconsin. This, he said, is the literal construction of the decree.

ITALIANS HAPPY OVER

APPROACHING WEDDING

Rome—(AP)—Approach of the wedding of the prince of Piedmont, heir to the Italian throne, and Princess Marie Jose of Belgium, which will occur a week from today in the Pauline chapel of the Quirinal palace, overshadowed in interest this year all the New Year's events that usually command Romans' attention.

Salutations of "buon anno" (freely "Happy New Year") were exchanged on all sides by the citizens hurrying to complete holiday shopping. Gifts in Italy do not necessarily have to be presented by Christmas. New Year's is just as acceptable a date, and for children the Befana (Epiphany), which falls on Jan. 6, is really the appointed time.

Those who failed to dole out largesse at Christmas were Tuesday reminded again by the usual receipts, janitors, servants, postmen, telegraph boys and the like.

Observed in the Catholic church as a day of fast and abstinence, coming before a fast, Tuesday was also the fete of St. Sylvester, one of the earliest popes, and marked with special services.

WATER COMMISSION

REVIEWS REPORTS

Monthly reports were reviewed and other business matters transacted at meeting of the water commission held at the city hall yesterday. The reports were presented to commission for their approval.

Can You Identify These Pictures Of Important News Events Occurring In 1929?

FEBRUARY

What famous airplane accident was this? Newspaper readers everywhere read the story when it took place.

MARCH

Of course you recall this picture of a great national event. What was it?

MAY

More than 100 persons lost their lives in the building pictured here. What big disaster was this?

JULY

What was this history-making event?

SEPTEMBER

A cameraman for the Post-Crescent and NEA Service traveled to the top of a lonely mountain to get this picture. What was the story? Answers to questions on page 16.

My Favorite Bible Passage

TODAY'S CHOICE

by HARVEY PARNELL

Governor of Arkansas

Therefore all things whatsoever ye would that men should do to you, do ye even so to them: for this is the law and the prophets.—Matthew 23:23

Comment

"The Golden Rule fits admirably into the life of every one almost every moment of every day. The very fundamentals of our social and business standards are based with a psychological effect upon the true meaning and intent of this wonderful passage."

After this manner therefore pray ye: Our Father which art in heaven, Hallowed be Thy name. Thy kingdom come. Thy will be done in earth, as it is in heaven.—Give us this day our daily bread. And forgive us our debts, as we forgive our debtors. And lead us not into temptation, but deliver us from evil: For Thine is the kingdom and the power and the glory, for ever. Amen.—Matthew 6:9-13

Comment

"The Lord's Prayer has been indelibly imprinted on my mind and it affords quiet, peace and consolation at all times."

(Compiled by the Bible Guild.)

CAR IS STOLEN FROM

ALLEY PARKING PLACE

A Chevrolet sedan, 1928 model, was stolen about 12:20 Wednesday morning from its parking place in the alley in the rear of the insurance bldg. The theft was reported to local police by William Belling, 1223 W. Lawrence-st. owner of the machine. The car had the license number, C-65977 and the motor number, 4732051.

SCOUT DRUM, BUGLE

CORPS TO REHEARSE

The valley council boy scout drum and bugle corps will meet for rehearsal at Armory G at 7:15 Wednesday evening under the direction of Cloyd Schroeder, deputy scout commissioner. New bugles will be distributed among some of the youngsters Wednesday evening.

37 HONORED IN LONDON BY KING GEORGE

Six New Peers, Privy Councillor, 4 Baronets, 26 Knights Are Created

London—(AP)—The list of New Year's honors bestowed by the crown today was headed by names of six new peers, one privy councillor, four baronets and 26 new knights. The new peers are: Major Dudley Leigh Aman.

Sir Willoughby Hyett Dickinson, who is honorary secretary of the World Alliance for Promoting International Friendship Through the Churches.

Sir William Joseph Noble, who is a former president of the United Kingdom Chamber of Shipping.

Arthur William Harry Ponsonby, M. P., who is parliamentary secretary to the ministry of transport and the only new peer connected with the Labor government.

Sir Hugh Trenchard, whose retirement as chief of air staff was announced yesterday.

Sir Charles Wakefield, a former lord mayor of London.

The new privy councillor is Viscount George Joachim Goschen, formerly governor of Madras.

Baronets were conferred upon: Louis Bernard Baron, Philanthropist; Sir Thomas Gregory Foster, now provost and recently vice-chancellor of University College, London; Sir William Middlesbrook, formerly chairman of the local-legislation committee of the house of commons; Sir Eustace Tennyson d'Eyncourt, formerly director of naval construction.

Knightships include: Professor Granville Bantock, musician; Lieut. Col. Henry Cole, director of exhibitions in the department of overseas trade; Edward Knapp-Fisher, receiver-general of Westminster abbey; Professor Thomas Nunn of London Day Training college; Frederick Joseph Wall, for 35 years secretary of the football association.

One knightship each goes to Queensland and New Zealand, 14 to India, and five to the colonies.

Sir Joseph Ward, premier of New Zealand, is created a knight of the honor.

3 MISSING STUDENTS SAFE IN CALIFORNIA

Los Angeles—(AP)—Foresters Tuesday located three students, two youths and a girl, who have been missing more than sixty hours on the brush-covered slopes of Mount Wilson where they became separated from a party of hikers.

The trio was found about three miles from the Mount Wilson hotel, in Winter Creek canyon.

The students, Celia Caplan, 18, Jack Schwartz, 19, and Lawrence Kotkin, 20, all were reported in good health. National guard airplanes, forest rangers, deputy sheriffs and civilian volunteers participated in the search for them.

MORE MILEAGE DURING

YEAR FOR PLANE FIRM

Chicago—(AP)—National Air Transport planes carrying mail and air express flew a total of 2,618,966 miles during 1929, an increase of 400,000 miles of over the preceding year, officials of the concern announced Tuesday. The ships, serving New York, Cleveland, Toledo, Chicago, Kansas City and Oklahoma and Texas cities, carried a total of 2,103,366 pounds of cargo, an increase of nearly a million pounds over 1928.

Grand Cross of St. Michael and St. George

Eric Charles Mievile, secretary to Lord Willington, governor-general of Canada, is created a companion of the same order.

A number of women figure in the order of the British empire. Hon. Mary Lady Bailey is created a dame commander of the order. Miss Orsberg, secretary to Premier MacDonald, is created a commander. Miss Maude Royden, one of the most notable women preachers of the present day and Miss Gertrude Tuckwell, who has become known as advisor to the lord chancellor on the appointment of women magistrates, were both admitted as "companions of honor."

INCOME BOND HAS PRECEDENT OVER PREFERRED STOCK

Hudson Railway Issue Illustrates Soundness of Holding

BY GEORGE T. HUGHES

Copyright, 1929, By Cons. Press

Another adjustment bond which illustrates the peculiar provisions applicable to these issues as a class is the 5 per cent income bonds of the Hudson & Manhattan Railway Company. These bonds originally were issued under a plan for readjustment of the company's debt back in 1913 and for many years were an extreme speculation. The mortgage provides that interest is payable only when declared by the board of directors out of available income. In other words it is not a "fixed charge" as is interest on the ordinary bonds.

However now the regular rate is being paid and all the accumulated back interest has been liquidated and the bond ranks high in its class. In rating a security of this type much the same considerations apply as do in the case of a preferred stock.

Such bonds take precedent over preferred stocks and have the additional advantage of being a direct obligation of the company, the principal of which must be paid at maturity whereas a preferred stock has no maturity and represents only an equity in the business. The owner of

an adjustment bond is a creditor but a creditor with a junior claim on earnings up to the amount of interest rate. If dividends are being paid on the stock which follow the adjustment bonds it is a reasonably good indication of merit in the bond and that is the case with the Hudson & Manhattan issue.

This rule on the N. Y. Stock Exchange is that income bonds sell "flat" and not "with interest" as do bonds representing a fixed charge. However when an income bond has paid its coupons regularly over a long period and there is no fair doubt about its continuing so to do the Exchange makes an exception in that issue and such an exception has been made in behalf of the Hudson & Manhattan adjustment incomes. This too is additional assurance to the purchaser.

D. C. Lingle, vice president of the

COMPLETE PLANS FOR FORUM DINNER MEET

B. C. Lingle, Chicago Bank Head, to Be Principal Speaker

Preliminary plans for the program of entertainment to be presented by the special committee in charge of arrangements for a quarterly dinner meeting of the chamber of commerce forum committee at 6:30 Thursday evening, Jan. 16, at Hotel Northern have been completed, according to Kenneth Corbett, secretary of the chamber of commerce.

D. C. Lingle, vice president of the

Harris Trust and Savings bank, Chicago, will be the principal speaker. The topic of his address will be The Lighter Side of Banking. Mr. Lingle has spent many years traveling throughout the world in the interests of the Chicago financial institution.

Wives of chamber members are to be feted at the dinner meeting, and invitations have been sent out by the committee in charge. The committee is headed by Paul V. Cary, Sr.

Charles Boettcher left Wednesday morning for San Bernardino, Calif., where he will spend the remaining winter months with his son, Harry Boettcher.

Mr. and Mrs. Vincent Bieler and son, Vincent, Jr., of Port Washington, are visiting at the Gustave Keller, Sr. home.

GLOUDEMAN'S GAGE CO.

THE BEST PLACE TO SHOP AFTER ALL

THE BASEMENT STORE HOUSEHOLD SUPPLIES

Begin the New Year right by getting a supply of these necessities that will last you a long time. Here are things that every home cannot be without and all at very low prices.

National MAZDA Lamps

15 to 60 Watts

20c Each

Have a supply on hand in case of emergencies.

Steel Wool

3 Packages 25c

Large size package of steel wool that belongs in every kitchen. The ideal utensil for cleaning pots and pans. They come in coarse, medium and fine grade.

Cocoa

Door Mats

\$1.25

Best grade door mats and every home needs one at every door, especially now with warm weather and slush. Size 17x27.

O'Cedar

Dust Mops

79c

Oblong style mops to be used on floors or walls with chemically treated yarns for best results. They come in assorted colors.

Alarm Clocks

\$1

Top bell clocks that are guaranteed to keep good time and lasting service.

Hi-Boy

Clothes Bar

\$2

There are 57 feet of drying surface on these bars, ample space to take care of any washing. Made of smooth finish hard wood.

Sani-Flush Disinfectant

23c

Also Bowlene the sanitary cleanser for toilet bowls. The greatest cleaner and disinfectant for the money.

Johnson's Floor Wax

75c

These are pint sizes and with each purchase you get two lambs wool pads for applying and polishing. Leaves a bright clean finish on furniture.

Drano 23c

Especially made to clean drain pipes, sinks and wash bowls. Will not injure the pipes or enamel.

Fischer's End-of-the-Year SALE

Closes Saturday Night!

It presses men's trousers and women's skirts, too

New Thor Speed Iron

THE New Thor Speed Iron irons everything. The loads of flat-work—the fussy things—even lace curtains. And—it presses men's trousers and women's skirts as well as the special pressing machines. Many tell us it pays for itself in a few months on this work alone. It's the easiest, fastest ironing method ever invented. Try it! See how easy it is to operate.

NOTE THESE AMAZING FEATURES

- 1 You can operate it with 10 minutes' practice.
- 2 It's portable, simple, compact. Operates in any room where there is a convenient outlet.
- 3 You sit down to iron.
- 4 Has ironing surface equal to 10 flatirons.
- 5 Heats in 4 minutes.
- 6 Irons everything.
- 7 Saves its cost on flat-work alone.
- 8 Presses men's trousers and women's skirts.
- 9 75% faster than hand ironing.
- 10 Saves 6 hours a week of hard labor.

Appleton—Phone 480 Neesh—Phone 16 W

Doing Twice as Well in One Third the Time

IN 1919, two newspapers served the Appleton area and had every reason to believe that they were doing a good job of it. Their combined, unduplicated circulation ran to 7,200 copies daily, which total was considered a quite satisfactory coverage of this district. Further material increase seemed highly improbable. Along came the opening of 1920 to change the whole complexion of the situation. Reorganization took place, and with it, revelation. The Evening Crescent, in existence for thirty years and the Daily Post, thirty seven years old, were combined to create the new Post-Crescent. Unnecessary, duplicated circulation was cleaned out. The new newspaper went now to a group of live, interested readers. Its circulation reports meant exactly what they said.

But this was just the beginning. With new foresight, the Post-Crescent saw that it was not reaching enough readers, that the constant improvement of paper demanded more thorough circulation.

By the end of 1920, the circulation had increased to 7,685 from its original top mark of 7,200. Not startling, yet Post-Crescent had hardly gone to work. Let's substitute tabulation for talk.

Year	Daily Average Net Paid Circulation
1919 (Post and Crescent total)	7,200
1920 Post-Crescent alone	7,685
1921 " " "	8,139
1922 " " "	9,595
1923 " " "	10,065
1924 " " "	10,946
1925 " " "	12,843
1926 " " "	13,203
1927 " " "	13,671
1928 " " "	14,568
1929 " " "	15,325

An increase of more than 100% in ten years, (though there was no such corresponding increase in population) brought about by conscientious

efforts and sheer merit! No circus promotion, no dallying with undignified stunts to create rainbow growth which would rapidly fade. The new circulation was healthy and vigorous. It meant that thousands more of interested readers were taking advantage of the splendid offerings of the Post-Crescent. It meant that the Post-Crescent was doing twice as well as two newspapers could do and was doing it in less than one third the time!

The result was a gain in circulation by the Post-Crescent, during the ten year period since the consolidation, exceeding the entire circulation acquired by the Daily Post and Evening Crescent during their many years of existence.

Turn back to the opening days of 1920 for a moment. In Appleton the Crescent had been running along for thirty years, the Post was a patriarch of thirty-seven. Their most exuberant efforts, backed by their many years of experience, could only net them 7,200 readers. Something, obviously, was needed in Appleton journalism.

That something was ONE newspaper, better and more complete, ONE newspaper to generously and fairly serve the entire community without duplication or re-hash. This was the Post-Crescent.

That the new paper was overwhelmingly accepted by the Appleton area is clearly shown in its certified A. B. C. circulation reports. It was accepted, moreover, for its own worth—because the public wanted it.

This month marks the tenth anniversary of the Appleton Post-Crescent. In this issue, and in nine more to come during the present month, we will try to show the many reasons for Post-Crescent growth—why the Post-Crescent is Wisconsin's fastest growing newspaper—why it is regarded as one of the finest in its field. Look forward to these advertisements to come, they tell an amazing story of progress in Appleton.

ANY FACTORS ARE BACK OF DRASTIC CRASH IN STOCKS

Overspeculation, High Money, Low Yield Probably Chief Causes

By CHARLES F. SPEARE

Copyright, 1930, by the Post-Crescent

New York.—It will be as difficult in later years as it is today to designate those influences that more than others were responsible for the stock market panic of 1929. Numerous ones have been assigned. Each played its part in changing a speculative situation over into one of buoyancy or of unprecedented destruction of market values.

In all probability it was the insidious and unrecognized working of the several factors of overspeculation, high money, an average yield of 2.4 per cent on stocks compared with 4.4 on bonds, excessive brokers' loans, moderate recession in business, the overbought condition of a London promoter's \$75,000,000 bubble that infected the price list to such an extent that it finally and suddenly revealed itself to be in a highly diseased condition.

A major surgical operation was necessary, involving repeated transfusions from mobilized capital supplies. These revived the feeble pulse of Wall Street which is now in a period of convalescence.

MARKET RECORDS TUMBLE

In its rise and in its fall, this year's stock market surpassed all others in size, in breadth, in the number of individuals involved, in paper profits, in actual losses, in the extent to which it drew on the liquid capital of the rest of the world, in its effect on interest rates throughout the world, in market quotations, in the common sense and judgment, in the ascendancy of junior over senior securities, in the diversion of domestic capital from commercial to speculative channels, and finally, in the emergency measures taken by business men under governmental auspices to check its nation-wide ravages and heal wounds it had caused.

The advances and the retreat and eventual rout of the Wall Street forces this year have had as much newspaper space as did any of the major campaigns of the Great War.

It is said of the Florida real estate boom that it suddenly ended one afternoon in Miami when there was no bid for any kind of property. The financial district had more opportunity to protect itself and its investors than it did in the case of the holder of excessively priced Florida real estate. The Harty episode in London might have cautioned him, for it was followed by heavy sales of American securities and an ominous advance in all of the foreign exchange, clearly intimating that Europe was drawing back her capital from the New York market.

The succession of large increases in brokers' loans after the Federal Reserve Bank in New York had raised its rediscount rate might also have indicated the transfer of stocks from strong to weak hands. The late September spurge in public utility stocks, while the rest of the market was undergoing a moderate readjustment, was in itself evidence of a diversion of values that revealed a desire for speculative intensity.

MILD RECESSION IN TRADE

Along with these purely market symptoms were evidences of a mild recession in industry, more pronounced in the automobile trade and in iron and steel than elsewhere, but also to be discovered in other lines of trade and in the steady fall in the price of commodities. During the three months of July, August and September business had reached a total of \$1,328,000,000. As the proceeds were made available they were employed in the purchase of corporate and institutional shares at prices that caused those with stocks to sell to gasp. This was the period when the Blue Ridge and Marine Midland Corporations were formed and when the terms for the transfer of control of the Com. Exchange Bank to the National City Bank were arranged. It did not require a very deep insight into conditions to recognize that trouble for the margin holder of stocks was brewing.

Early in October came the refusal of the Public Utilities Commission of Massachusetts to permit the Edison Illuminating Company of Boston to split up its shares. As this had been one of the practices familiar to Wall Street and made much of in speculation, the decision acted as a check on the speculative fever of the market. Wall Street had become accustomed to having all of its policies vied that it staggered under the blow. Except for the outspoken criticism of the Massachusetts commissioners and the voice of an international banker crying in the wilderness last April, there were no official warnings of importance given to a public that was obviously impatient in stock buying.

On the other hand, the President of the New York Stock Exchange in his public speeches in May defended a great deal that subsequently proved to have been the most damaging elements in the market situation. Wall Street cried "bravo" but today the philosophy of markets stretched when stocks were bought and is not so popular. None of the managers of the great public utility holding and operating companies, whose shares were being sold at prices that could not be maintained, was ever heard to question the propriety of current quotations of their particular issues. As late as October 15 the head of one of the largest institutions in the country openly advised a rather general buying of stocks.

LACK OF LEADERSHIP

Officially the Federal Reserve Board did preach caution; either in proclamations or in steadily tightened conditions on the money market. From February until September, it had laid pressure, however, and the failure of its policy to check either inflation in stocks or in brokers' loans had discredited it with the mass of the public interested in speculation. It is the lack of leadership among those with a responsibility

to the investing public to the end of October that is most criticized today. The claim is frequently made that had there been the same kind of direction prior to the panic that was displayed while it was in its most acute stages, this country would not have to write into its financial history for 1929 the most and expensive stock market collapse on record.

It was the suddenness and the forces of this reaction that made for such dangerous conditions between the 10th and the 13th of November, when those who were involved in speculation had so little time in which to mend their fences.

SHARES AT ABSURD HEIGHTS

It was not only shares dealt in on the New York Stock Exchange and in the New York Curb Market that were subjected to the tremendous and sudden deflation but those of banks, insurance companies, investment trusts and trading companies, all of which had been boosted to absurd heights through competitive buying and the circulation of reports of mergers, "split-ups" and increased dividends. New York bank and trust company stocks had their prices cut in two. In several notable instances the deflation in them was as much as 60 and 70 per cent. About the same general experience came to holders of insurance shares.

HOW LIQUIDATION HIT LEADERS

The successive waves of liquidation between October 15 and November 13 may best be indicated in a table of ten prominent issues giving their high price for the year and the lows as they dropped down from week to week to the market's climax on November 13.

Stocks	High Oct. 29	Low Nov. 13
U. S. Steel	251 1/2	166 1/2
Gen. Electric	403	210
Cons. Gas	183	88 1/2
Mont. Ward	156	49 1/2
Gen. Corp.	336	37 1/2
Anacosta	140	75 1/2
Gen. Motors	91 1/2	33 1/2
Atchafalaya	298	221
American Carbide	140	68
Int. T. & T.	149	61

As a class these stocks had not been exploited as much as those of the newer public utility holding company issues, which experienced quicker change in their status and a more rapid liquidation.

In most cases, the top of the market for the public utilities had been reached at the end of September. From then until the middle of November there occurred such declines as 150 points in American & Foreign Power, 110 points in American Power & Light, about 150 points in Standard Gas & Electric.

A number of the public utility public utilities the shrinkage was even greater as, for instance, in Detroit Edison, which dropped about 235 points, Commonwealth Edison of Chicago 240 points, Peoples Gas nearly 180 points, and Midwest Utilities 375 points. In fact, the slaughter among holders of so-called "blue-chip" stocks was the greatest experience during the market debacle, involving declines of 250 points to nearly 400 points in some issues.

As a result, the public utilities had been selling between \$400 and \$500 a share.

INVESTMENT TRUSTS

In every period of speculation where a large section of the public centers its attention on securities and rides along on paper profits easily and rapidly made, inflation in an exaggerated form is likely to occur in some one group of stocks. The 1929 market will be remembered for the attention it gave to the shares of investment trusts and trading corporations. These were built up quickly and in enormous volume, and just prior to the break in October and in November, their par amount was estimated around \$4,000,000,000. They were widely distributed. New issues had been commanding high premiums over subscription prices in spite of the fact that an analysis of their portfolios would have demonstrated that they were selling at many times their book value and were anticipating earnings some years in advance.

It may not be fair to charge these finance companies with responsibility for bringing to a head the conditions in the stock market that eventually led to a general collapse in all values.

There is, on the other hand, no argument to sustain the popular claim made earlier in the year that inflation would be the greatest of all financial influences when general liquidation of securities developed. This was one of the many fallacies of the "new era."

Instead of playing a conspicuous part in checking the rout of sellers of stocks the finance companies accentuated this by their own sales and the panicky condition of mind of their managers. Having competed against each other for junior securities, after they had already advanced to the stage of overvaluation, and having involved themselves in market positions of great size, they were as impotent in the crisis as the small speculator and betrayed many errors of judgment. In some instances these involved purchases of stocks on a liberal scale in the early phases of the decline which quickly turned into embarrassing losses. Not a few exhausted their cash resources and were compelled to liquidate a portion of their investments in order to maintain their credit. The "new era" of \$500,000,000 or more of cash was not as effective as expected, for it was too much reduced within the hour of greatest need.

In no group of securities were there greater declines in percentage than in this one and none has come through the panic with so many deep and permanent scars. Those who had adhered to their original principles of diversified investments had to take their medicine with the speculative members of their family. Their general credit has not been affected. The fact that in November stocks of new trading corporations amounted to only \$2,434,000, after having totaled nearly \$4,440,000,000 in the previous ten months of the year, indicates the extent to which they have gone out of favor with the investing public.

The period of convalescence of the market obviously depends on general market conditions, for the shares of none of them are worth more than the composite value of their portfolios, plus a reasonable earning power on this collateral.

The panic of 1929 was essentially of a stock market character. In this

When Two "Christmas Specials" Crashed

Two crack passenger trains loaded with holiday throngs en route to their homes for Christmas met in a spectacular collision on a crossing at Avondale, La., just outside of New Orleans—and the picture above shows the result. A fireman was killed and an engineer badly injured, but no passengers were hurt. The trains were the Louisiana Limited of the Texas & Pacific railroad, and a Southern Pacific express.

MERCHANTS IN WEST BUY STONES AS NICE FRESH COUNTRY EGGS

Hanford, Calif. (AP)—It's still true that one can't count his chickens before they're hatched. As exhibit "A" in support of the hypothesis, witness some two dozen San Joaquin valley merchants who were exceedingly wroth today.

Saturday, an itinerant peddler descended into the valley, offering for sale "fresh country eggs." He had a prepossessing manner, a rapid fire sales talk and attractive prices. He did rushing business.

Today the sheriff's office still was being told in agonized accents of discoveries that one can sell a basket of almost anything—even chunks of sandstone if one is careful to cover the top with a layer of fresh country eggs.

The sheriff estimated, as he listened simultaneously to new complaints on two phones, that 50 gross of common, garden variety of stones were in stock in valley groceries today.

MORE THAN 60 BIDS FOR ELKHORN BUILDING

Elkhorn (AP)—More than 60 bids have been received for the construction of the new \$25,000 municipal building, it was announced Tuesday. The building will be two stories high and will house the city offices and council chamber in addition to public recreation rooms.

OTHER ISSUES

Thus far president Hoover has had a real test with congress but the house has stood with him in such skirmishes as have occurred. The special session was a fiasco only in the sense that tariff legislation fell by the wayside, but the passage of the Federal Farm act alone will be regarded by historians as worth calling the session. The federal farm board is being attacked from various sides but at present writing it looks doubtful whether the agricultural campaign will loom as large in the 1930 campaign as it has in the past.

Prohibition will probably be the most conspicuous issue in the eastern states with an emphasis on tariff inequities in the western states.

In most instances, however, the one national issue which will run through the campaign in all sections will be the record of President Hoover. The Republicans will endeavor to retain control on the basis of Mr. Hoover's accomplishments. The Democrats, on the other hand, do not concede that Mr. Hoover has done anything of note. They are not yet ready to accept the Federal Farm act as a success but it is not likely that they will discuss that legislation as much as they will other alleged failures on the administrative side.

IMPORTANT FOR HOOVER

The Democratic drive, for example, will use every bit of ammunition furnished them by Senator Borah and his colleagues who charge that the Hoover administration has been weak in regard to prohibition enforcement. If the economic depression should result in much unemployment, the Democrats will contend that President Hoover did not act promptly enough to stop speculation.

The thing which turned the Republicans out of the house in 1910 was the high cost of living—an economic issue. If unemployment or restricted conditions should become widespread during 1930, the Democrats would naturally take the benefit of such discontent as arises. It becomes all the more important, therefore, that the efforts made by the president recently to readjust the economic situation should from his viewpoint become effective in the first six months of 1930.

Mr. Hoover will also depend to a small extent on the achievements of the Federal Reserve Board. The Federal Reserve Board will need a diversionary victory in order to strengthen its position at home. In brief, the first few months of the new year will be critical ones for President Hoover as they may have a vital bearing on the congressional elections in the autumn of 1930.

SPokane FEDERAL BANK CUTS ITS LOANING RATE

Spokane, Wash. (AP)—The Federal Intermediate Credit Bank of Spokane announced today that effective at once its loaning rate would be cut from 5 to 4 per cent.

The reduction was described as a new year's greeting to the agricultural and livestock industries. By E. M. Egan, president of the bank.

The bank had been a dividend payer for a number of years. The result of a general softening of short interest rates, and a general improvement in the debt market, which has enabled the bank to sell its securities on a more favorable basis.

Cops Fear Bank Robbery In This Comedy Of Errors

Chicago (AP)—From Lafayette, Ind., there came J. L. Potter and H. L. Robertson, hoping for the best but fearing the worst.

Potter owns property here. Robertson is his lawyer. They were here ten days ago and attempted to gain possession of the property but were thwarted by a man who said he had leased the place and would not be ousted. If Potter and Robertson got fresh, they were told, their respective bodies might be found in almost any dark alley with lots and lots of bullets in them.

Potter and Robertson returned to Lafayette and pondered the situation. Finally they decided to return to Chicago, but they would not negotiate further with Potter's tenant until they had equipped themselves with bullet-proof vests. They were not inclined to take the threat of death lightly.

They went immediately upon their arrival here to the offices of the Detective Publishing Company, sellers of bullet-proof vests. The vests were ordered for delivery a few hours later. The Detective Publishing Company became suspicious and notified police. Officer John Hallam was assigned. He took the vests to the address at which the Lafayette gentlemen were stopping. To make certain that Hallam himself did not meet with foul play, the detective bureau assigned two more officers to trail Hallam.

Arriving at the address, Hallam found Potter and Robertson did not have sufficient cash to pay for the vests. They asked him to accompany them to a bank where they would cash a check.

Hallam, Potter and Robertson started by motorcar for the bank. The two detectives, trailing Hallam, clung to the trail and became genuinely alarmed when the first machine stopped in front of the bank. They felt sure that the men in the bullet-proof vests were going to rob the bank.

A few minutes later Potter, Robertson and Hallam reentered their machine and drove away. The pursuing police, believing the bank had been robbed and that their pal, Hallam, had been made an unwilling party to it, chased the Potter-Robertson car, finally forcing it to the curb.

"It looks like they've got us," said Potter, believing the police to be gangsters.

The matter was eventually straightened out. Potter and Robertson identified themselves as persons of consequence in Lafayette, the police said they were sorry for everything, and it wound up with all forgiven.

FARMERS BEFRIEND PRAIRIE CHICKENS

Flock of Birds Calls Regularly on Farms Near Medina

By W. F. WINSEY

Medina.—A flock of 50 prairie chickens in response to the welcome it is getting on the farms of W. D. Witt and Oscar W. Flunker has placed these farms on its daily itinerary and has discontinued at these points the time-worn, inherited precaution of posting guards in trees and on fences to give warning of approaching danger during the feeding hour. Without the least, apparent sense of fear, the birds survey the bare spots in the fields in search of grain or mangle with the birds, and people in the farm yard. They are not even frightened by cars, or by people moving in the yards.

One winter several years ago, the writer was thoroughly entertained by Mr. Witt and his flock of approximately 75 prairie chickens at lunch in Mr. Witt's farm yard. The flock made regular daily calls at the Witt farm that winter at the precise hour when the farm chickens were fed. After brushing up a bit at the conclusion of the feast, the flock resumed its daily circuit. Because this particular flock became so tame, Mr. Witt constantly feared that some eager rabbit hunter from the city might take a shot at his guests and kill or cripple some of them. In connection with his happy relationship with his flock of prairie chickens he greeted spring when the birds would scatter in the fields and no longer be under his care. But more than all he feared the fate of the flock during the hunting season in the fall.

Although prairie chickens make regular visits to farm yards during the winter, they, in sharp contrast with pheasants, are self-sustaining in the fields and brush. A flock makes long circuits, marked by fields of shocked corn and a productive field. The owner of each field claims the flock, and the traveler who sees the flock in various places gets the impression that the country is covered with prairie chickens.

DEATH BELIEVED SUICIDE

Milwaukee (AP)—Alfred Reinke, 24, manager of the Rimmer Shoe Company, was found dead in a gas-filled room on the second floor of the company's plant early today. Police and relatives were unable to determine a motive for the supposed suicide.

GENERAL SMUTS IS "HAPPY WARRIOR," AFRICAN STATESMAN

Bears Title Long Before It Is Awarded to Mr. Smith

By LAMUEL F. PARTON

Copyright, 1929, By Cons. Press

New York (AP)—Alfred E. Smith was not the first "happy warrior." Gen. Jan Christian Smuts, South African statesman, arriving here for the tenth anniversary of the League of Nations, bore this title long before it was awarded to Mr. Smith.

Gen. Smuts has warred against Great Britain and for Great Britain and for Cecil Rhodes and against him and for and against various South African politicians and issues since his entry into public life in Cape Town in 1895. There is no doubt about his being a warrior, but just how happy he is may be suggested by his own remark that a South African negro was the only happy man in the world.

He was hard-boiled and a hard-fisted general, but his favorite reading is the "Brer Rabbit Stories" by Joel Chandler Harris, and his favorite recreation is botany. Although a pragmatist in politics, he has the gift of tongues and he more than any other world statesman, engaged in the serve and return of the Wilson ideology, out of which grew the League of Nations. Here is what he wrote of Woodrow Wilson, after the signing of the peace treaty:

"He went down into the pit like a second Hercules to bring back the fair Alcetis of the world's desire."

BRINGS DOWN WORDS

Like an expert trap-shooter, he could bring down winged words like these, just off-hand, without missing a shot, and then sit in a tight little conference and fence with a sharp pencil over boundaries, tariffs and trade with perfect thrust and parry.

Perhaps faro was never played in Transvaal, but General Smuts has the instinctive technique of a born faro player. He strews his chips liberally over the board, keeps one cold eye on the case-keeper and knows unerringly when to copper a bet.

Rooseveltian in his energies and interests, he is not "unlike the great American statesman in his planetary idealism and his alert sense of the immediate and the practical. This quality has marked him in the world affairs as a great humanist and liberal, and in the view of his nationalist foes of South Africa as a stubborn Imperialist. The enemy of labor and a potential dictator. As premier, General Smuts was kept in power from 1919 to 1924 by a coalition of unionists, who were English colonists and the South African party, composed of anti-native and imperialist groups. In 1924, it was a coalition of labor and nationalists who overthrew him. In politics, he is at the opposite pole from Ramsay MacDonald, being an uncompromising enemy of even the academic socialism on which Mr. MacDonald built his career. He is sharply opposed to the entire tradition and philosophy of the British Labor party.

SMUTS DRIVES SHARPLY

While General Smuts drives sharply ahead, either in forward or reverse he has many intermediate steps performing valiant service in the Boer army, he led the compromise faction at Vereeniging in 1902. He then became a staunch and loyal Imperialist, with the intransigent factions gaining for him during the last years of his public life, and finally bringing him down. He was an ally of Cecil Rhodes, but suddenly back-tracked when evidences of Rhodes' duplicity were produced. Imperialist as he was, it was he who in 1917 made the Imperial war conference swallow the new memorable declaration that Great Britain was no longer an empire but an association of nations.

Even in his philosophy, and he is a philosopher, he has a solid and statesman's many faceted mind catches the spectrum of the in-between zone bounded by black and white. His book, "Holism and Evolution," written in 1926, is a shrewd presentation of a compromise theory of evolution, not too violently wrenching the theological underpinnings of Dutch farmer traditions, whence came Paul, carrying a Bible under his arm, proclaiming that the world was flat, and making General Smuts state attorney.

When Woodrow Wilson began working out the plan of the League of Nations with Leon Bourgeois and Robert La Follette, a Gen. Smuts, a third informant, and gifted ally, Wilson and Gen. Smuts were somewhat alike in their aptitude in sweeping tangential thinking and felicity of phrasing. Gen. Smuts was graduated from Victoria college and then from Cambridge. Like Woodrow Wilson he was an academician, but life in the field had made him a sort of two-gun doctor of philosophy.

Gen. Smuts' recent Rhodes lectures at Oxford are brilliant and informed on world affairs. He sees the disarmament problem as primarily one of disarmament on land and in the air, rather than merely on the sea. He is a staunch believer in the commission form of government. Coming from a nation with fewer citizens than Philadelphia, he has made himself one of the most arresting world figures of the age. Not for many years has New York entertained a more interesting visitor.

ZIHLMAN TRIES TO HAVE HIS CASE DISMISSED

Washington (AP)—Representative Zihlman of Maryland has asked the District of Columbia Supreme court to quash the indictment which charges him and others with violating the postal laws in connection with the operations of the P. H. Smith company.

A plea in abatement has been filed in behalf of the defendants. Similar pleas have been taken by other defendants among whom is Daniel R. Crissinger, former controller of the currency.

EARTH NOT PERFECT SPHERE, SCIENTIST LEARNS BY TESTS

Ottawa (AP)—A. H. Miller, a scientist attached to the Dominion observatory, has completed measurements which show the diameter of the earth through the poles is 26 miles less than through the equator.

His calculations were made from observations of a pendulum swinging in a vacuum. It was carried to Berlin, Greenwich, Washington and back to Ottawa, at which point the speed of the swing varied with differing pulls of gravity.

Technically Mother Earth is not a sphere, but an ellipsoid.

WOULD AMEND ACTION OF PLUMBING ORDINANCE

A resolution asking for the amendment of a section of the plumbing and sewer ordinance, then the disposition of any substance into sewers can be prohibited will be recommended by the street and bridge committee to the common council, it was decided Tuesday afternoon.

The proposed addition states that no person shall deposit in any sewer or drain any garbage, gaster, grease, oil, or other substance likely to cause any obstruction, nuisance or explosion therein. It further prohibits the connection of any premise with a drain or sewer, through which any obnoxious, explosive or odorous liquids or substances may be discharged into the main public sewers of the city.

Most of this provision, states the proposed amendment, is likely to cause any obstruction, nuisance or explosion therein. It further prohibits the connection of any premise with a drain or sewer, through which any obnoxious, explosive or odorous liquids or substances may be discharged into the main public sewers of the city.

Action on the grading and opening of Rankin-st to Wisconsin-ave will be deferred until next spring.

NEW SPEED RECORD SET BETWEEN TWO CITIES

Hadley Airport, N. J. (AP)—All records for air travel between Cleveland and New York City were broken Tuesday when Henry Brown, one of the veteran fliers covered the run of 234 miles in two hours and 12 minutes.

Leaving Cleveland at 1 o'clock a. m., with a full load of 1,100 pounds, Brown, flying at a high altitude and aided by a tail wind of 70 to 80 miles per hour, arrived New York at 3:12.

Two years ago Brown established a record for the Cleveland-Hadley Airport.

HERSEKORN MAKES 1ST ARREST IN NEW YEAR

The dubious "honor" of being the victim of the first arrest this year goes to Ralph Van Alstine, 609 N. Center-st. He was arrested about 1:30 Wednesday morning by Gus Hersekorn, motorcycle officer, on a charge of having more than three people in the driver's seat of a car. He is to appear in municipal court before Judge Theodore Berg at 2 o'clock Thursday afternoon to answer charges. Askel Jergensen, 114 E. Pacific-st, was arrested about 7:30 Tuesday evening on a charge of jumping an arterial at the corner of Pacific and Oneida-st. Also arrested by Officer Hersekorn, he will appear in court Thursday afternoon.

FAIL TO SAVE FAMOUS TREASURE FOR GERMANY

Hanover, Germany (AP)—A last attempt to save for Germany the Guelph treasure of early hand wrought jewels and furniture, which the former duke of Brunswick is seeking to sell, apparently has failed. The municipal council in a protracted night session, decided against the purchase.

The municipality had an option to buy the treasure from the duke for 100,000 marks. The option which expired Tuesday, left the duke free to close a deal with a syndicate which is reported acting for American interests.

The collection includes relics brought by Henry the Lion from the Holy Land when he returned from a pilgrimage in 1173. The duke is the husband of the former Kaiser's only daughter, Victoria Louise.

RAILROADS TOLD TO PUT UP WARNINGS

Muskegon (AP)—With eight deaths within the month attesting the dangers of uncared-for railroad crossings, the city attorney Tuesday had instructions from the city council to demand speedy action from railroads passing through the town to install safety warnings immediately.

Five members of one family were wiped out and three of another in two automobile crashes. The council, in making its plea, cited the fact that Muskegon has 11 uncared-for crossings over which trains flash at speeds varying from 30 to 50 miles per hour.

A checkup of accidents here in the past 15 years indicated that 25 per cent lost their lives in crossing accidents.

SNOW, COLDER WEATHER PREDICTED THURSDAY

New York Day Guard with the city police today said that a heavy snow storm, with temperatures dropping to below zero, is probable in this vicinity within the next 24 hours. The weather bureau says.

Slits were closed over most of the city's bridges.

Washington (AP)—A former baby of the White House is a bride. Mrs. Margaret Harrison Williams, who lived with her parents in the White House during much of the administration of President Grover Cleveland, was married to her husband, Lewis Armstrong of Providence, R. I., at 11 o'clock.

London—Gullford's alderman, F. MacIndoe, has just retired at the age of 84. In 1893 he was elected mayor of the town. He is the fourth member of his family to hold the position. The elder the MacIndoe family of many dates back as far as the year 1602.

70,000 WILL SEE ROSE BOWL BATTLE

FOUR TRIUMPHS</

Here Is Day-By-Day Review Of Important News Events Reported During Past Year

JANUARY

1—S. Parker Gilbert, agent general for reparations, says Germany now on stable financial basis and able to meet obligations under Dawes plan.

2—General Jose Moncada, Liberal, inaugurated president of Nicaragua.

3—President-elect Hoover returns from his good-will trip to Latin America.

4—King Alexander of Yugoslavia places his nation under a dictatorship because of threatened civil strife.

5—Tex Rickard dies.

6—The army airplane, Question Mark, establishes a new record in endurance flight, record of 150 hours 40 minutes 15 seconds, in a flight over southern California.

7—Senate ratifies Kellogg-Briand treaty outlawing war \$5 to 1.

8—General Brannell Booth, chief of Salvation Army, is removed from office.

9—Afghanistan has third king in four days when the outlaws, Bacha Sako, takes the throne, after the respective abdication of Kings Amanullah and his brother, Inayatullah.

10—President Coolidge signs the Kellogg-Briand treaty renouncing war.

11—Announcement is made that Owen D. Young and J. P. Morgan will serve on a committee of experts to discuss German reparations.

12—The Salt Lake City—10,000-ton cruiser and first of her class since 1922, is launched at Camden, N. J.

13—Oscar W. Underwood of Alabama, dies.

FEBRUARY

1—Colonel Lindbergh completes the first airmail flight from the United States to the Canal Zone, landing at Colon.

2—The Kellogg peace pact is ratified by the German Reichstag.

3—An agreement with the Italian government, recognizing the Vatican state, is announced after a disagreement lasting nearly 60 years, during which time the popes have refused to leave the Vatican grounds.

4—The Federal Reserve Board warns brokers' loans are excessive and the Bank of England raises the discount rate to 5 1/2 per cent with the result that upward moving stock market prices are temporarily checked.

5—Edwin Denby, secretary of the navy under Harding and Coolidge, dies.

6—The Shipping Board votes to sell the Leviathan and ten other vessels for \$16,500,000.

7—Unemployed in Great Britain total 1,458,000.

8—Electrical college formally elects Herbert Hoover president and Charles Curtis vice president.

9—President Coolidge signs the bill providing for the construction of 15 cruisers.

10—Melville E. Stone, former manager of the Associated Press, dies.

11—Commander Byrd discovers new land in the Antarctic.

12—The Senate and House finally agree on the so-called Jones "five and ten" law, providing more severe penalties for violations of the prohibition laws.

MARCH

1—France ratifies the Kellogg.

2—Revolution breaks out in Mexico; former President Calles resumes command of army and quells it in a comparatively short time.

3—President Hoover inaugurated on a cold, rainy day. In his inaugural address, the president emphasizes the importance of taking steps to curb increasing crime.

4—An extra session of Congress to meet April 15, to consider agricultural relief and limited tariff revision is called by the president.

5—Elihu Root presents to a committee of jurists at Geneva a formula designed to bring about American adherence to the world court.

6—Thomas Taggart, for 49 years head of the Democratic party in Indiana, dies.

7—Colonel Robert W. Stewart is ousted as chairman of the board of the Standard Oil Co. of Indiana, by forces under the leadership of John D. Rockefeller, Jr., because of the former's testimony before the Senate oil investigating committee.

8—New speed record for automobiles of 231.55 miles an hour set by Major H. O. D. Egrave, English racer, at Daytona Beach Fla.

9—To conserve the nation's oil resources, the president announces that no public oil lands will be sold or leased, except on mandate from Congress.

10—Publicity on tax refunds in excess of \$20,000 ordered by President Hoover.

11—Disastrous floods in Alabama, Georgia and western Florida.

12—Fourteen passengers killed when a plane crashes at Newark, N. J. Most serious accident in history of aviation.

13—Marshal Foch dies.

14—Governor Henry Johnston of Oklahoma, found guilty of incompetence by the state senate, is removed from office.

15—Through office to H. President Hoover, President's terms establishing national crime as a basis of immigration restriction quotas was passed by Congress in 1914, but twice postponed.

16—Canadian steamer, I'm Alone, alleged to be a rum runner, is sunk in Gulf of Mexico by coast guard.

17—Mussolini wins Italian election, 3,520,000 to 1,350,000.

18—William Fox announces that in the future only sound films will be made by his company.

19—Trading on New York Stock Exchange sets new record of \$245,740 shares, with call money at 20 per cent, and declines in all stock prices. Charles E. Mitchell, president of the National City Bank, pledges \$25,000,000 of

the bank's funds to the call loan market as a means of stopping price declines, and his action is severely attacked by Senator Glass.

20—Henry L. Stimson becomes secretary of state.

21—Myron T. Herrick dies.

APRIL

1—Wisconsin votes to repeal state prohibition law by 2 to 1 majority.

2—Governor Huey P. Long is impeached by Louisiana House.

3—Charles G. Dawes named ambassador to Great Britain.

4—Financial experts of the allies—wrote Owen D. Young, American, as chairman—agree on revised German reparations, averaging from \$400,000,000 to \$576,000,000 annually over 55 years. Germany proposes to abolish air-planes and poison gas in warfare.

5—Farm relief up in special session of Congress, and Senate committee approves debate plan, despite Hoover's opposition.

6—Night air mail service from coast to coast started.

MAY

1—Fifteen killed and 73 wounded in Communist May Day riots in Berlin.

2—Five-day week granted 150,000 building trades workers in New York.

3—Harry F. Sinclair begins 90-day jail term at Washington.

4—New free balloon distance record of 900 miles set by Lieutenant Thomas W. G. Settle and English William Bushell in flight from Pittsburgh to Prince Edward Island. Old record 572 miles.

5—Navy Lieutenant Apollo Soucek sets new altitude record of 39,140 feet at Washington.

6—Partial proof on Einstein theory found in observations of sun's eclipse in Philippines.

7—More than 100 persons die in fire at Cleveland, O., Clinic Hospital. Fire started in storage room for X-ray films and a poison gas was generated.

8—Navy Lieutenant Apollo Soucek sets new altitude record of 39,140 feet at Washington.

9—Impeachment charges against Governor Long fail; more than one-third of the state senators announce in advance of trial that they will vote to acquit.

10—U. S. supreme court overrules Interstate Commerce Commission's valuation and rate making formula in famous St. Louis & O'Fallon test case. President Hoover names law enforcement investigating commission.

11—Theodore Roosevelt accepts appointment as governor of Porto Rico.

12—Wheat price drops below \$1 for first time since 1915.

13—Germany and allies agree on reparations payments of \$9,000,000,000, to be paid in 59 years but interest brings the sum up to \$27,000,000,000.

14—Labor party, headed by J. Ramsay MacDonald, wins British election.

JUNE

1—Chile and Peru sign treaty binding Tacna-Arica boundary dispute.

2—Papal state comes into existence with ratification of treaty between Italy and Vatican.

3—Senate and House finally agree on farm relief legislation without debate, as favored by President Hoover.

4—The Yellow Bird, French monoplane, lands safely in Spain after flight of 3123 miles from Old Orchard, Me., with young American stowaway aboard.

5—Prohibition enforcement cost \$21,178,485 during the last nine years, Commissioner Doran announces.

6—Ambassador Davies and Prime Minister MacDonald declare for naval reductions by statesmen, rather than naval experts.

7—The three-year controversy between the church and state in Mexico is ended.

8—Four Spanish aviators, attempting flight to United States, rescued near Azores after seven days on the water.

9—Frank Hawks completes flight from New York to Los Angeles and return in 36 hours 54 minutes flying time.

JULY

1—The Interstate Commerce Commission is asked by the Walcott Railway to allow it to form a fifth trunk line in the east.

2—Alexander Legge, president of the International Harvester Co., appointed chairman of the newly created farm relief board.

3—Baron Tanaka resigns as premier of Japan and is succeeded by Yuko Hamaguchi.

4—Roger Williams and Lewis Vance complete flight from U. S. to Rome, after stop in Spain for fuel.

5—Russian officials and employees of the Chinese Eastern Railway, at Harbin, are ousted by Chinese authorities, and a serious international situation later in the year.

6—French Chamber of Deputies, 390 to 252, votes war debt payments to United States and Great Britain.

7—German liner, Bremen, sets new trans-Atlantic speed record of 4 days, 17 hours and 42 minutes.

8—Before representatives of 43 nations, President Hoover promises the Kellogg Peace Pact, and later in the day he and Prime Minister MacDonald of England announce that work on cruisers will be stopped by both nations, pending naval limitation negotiations.

9—Senator Edge selected as ambassador to France.

10—Pope Pius emerges from Vatican—the first time a pope has so done since 1570.

11—Premier Poincare of France resigns because of his health and Aristide Briand is called to form a new cabinet.

12—Armed convicts at Auburn, N. Y., prison riot and set fire to penitentiary. Two are killed and 11 wounded.

13—New endurance flight record of more than 420 hours set by Dale Jackson and Forest O'Brien at St. Louis.

AUGUST

1—Riot at Leavenworth Prison of 3700 convicts results in one death and many injuries.

2—Graf Zeppelin leaves Lakehurst for round the world flight, which was completed 21 days later.

3—Redevelopment rate at New York boosted to 6 per cent to curb speculation.

4—Inter-racial warfare between Arabs and Jews breaks out in Palestine.

SEPTEMBER

1—The tenth assembly of the League of Nations opens.

2—Eight killed when air liner strikes mountain in New Mexico during storm.

3—Flying Officer Waghorn of Great Britain wins Schneider Cup with speed record of 228 miles an hour, while five days later Squadron Leader Orlebar sets another record of 357 miles.

4—Harrison Johnston of St. Paul wins national amateur golf championship.

5—Clausius Huston of Tennessee

elected chairman of Republican National Committee.

6—Senate naval committee decides to investigate alleged propaganda of William B. Shearer against naval limitation.

7—Great Britain and Russia tax figures of corporations seeking higher tariff rates.

8—Mussolini appoints nine new cabinet ministers, seven of whom will have portfolios he formerly held.

9—Miller Huggins, manager of New York Yankees, dies.

10—Fritz Von Opel of Germany succeeds in flying an airplane propelled by rockets.

OCTOBER

1—Great Britain and Russia on terms of resumption of diplomatic relations.

2—Senate orders thorough investigation of lobbying in Washington.

3—Three strikers are killed in a battle between North Carolina mill workers and a sheriff's force.

4—Another serious prison riot, this time at Canon City, Col. Twelve including seven guards, are killed.

5—The worst price break of the year to date hits the New York Stock Exchange.

6—Prime Minister MacDonald arrives to confer with President Hoover on naval reduction.

7—Great Britain invites the United States, France, Italy and Japan to naval limitation conference in London in January.

8—Senate defeats amendment to grant freedom to Philippines.

9—American Federation of Labor, meeting at Toronto, votes to enlarge activities in industrial districts of south.

10—1919 world's largest ship, makes first flight in England.

11—Connie Mack's Athletics win world series, defeating Chicago Cubs four games out of five.

12—Mme. Curie arrives in the United States to receive a gift for the purchase of radium.

13—German seaplane, O.D.X., carries 169 persons on test flight.

14—Thomas A. Edison re-enacts the discovery 56 years ago of his incandescent lamp.

15—Completion of 1000-mile deep waterway from Pittsburgh to Mississippi River celebrated.

16—One out of every seven college athletes is subsidized, the Carnegie Foundation says in a report.

17—New York stock market suffers greatest decline since war.

18—Attempt made to assassinate Crown Prince Hubert of Italy, during visit to Belgium.

19—Albert B. Fall found guilty of accepting bribe while secretary of interior in connection with oil leases.

20—Severe fighting between Chinese Nationalists and Kuomintang forces breaks out in Yangtze Valley.

21—President Hoover points out desirability of flexible clause in tariff bill and asks Senate to pass it within two weeks.

NOVEMBER

1—G. Aaron Youngquist of Minnesota appointed to succeed Mabel Walker Willebrandt, as assistant attorney general in charge of prohibition enforcement.

2—Senate adopts resolution censuring Senator Bingham for employment of manufacturer's agent as clerk of Senate committee framing tariff.

3—Jimmy Walker and Tammany Hall candidates win in New York City, while Dr. John F. Poland, regular Democrat, is elected governor in Virginia over the anti-Smith Democrat and Republican candidate.

4—Automatic airplane pilot is successfully demonstrated in flight from Dayton at Washington, through dense fog in Allegheny Mountains.

5—Federal budget for next year placed at \$3,299,000,000.

6—Senator Moses refers to insurgent Republican senators as "sons of the wild jackass."

7—President Hoover urges that food ships be immune from attack in war.

8—Largest suspension bridge in world, between Detroit and Windsor, Canada, opened.

9—President Hoover announces that various groups of industry, agriculture and labor will meet in Washington to take steps to insure continued business progress.

10—Six employees of Flint, Mich.,

LAUGHTER AIDS CURES IN GERMAN HOSPITAL

Berlin—(AP)—Laughter has been added to the curative agents in the Charite Hospital here.

It happened rather accidentally after a performance for "chair cases" and patients able to navigate on crutches. "A Jump Into Matrimony" was the farce and it caused gales of merriment, many in the audience having their first laughs in months.

In many of the cases, moreover, the doctors found the effects of the laughter of distinct therapeutic value. Consequently there are to be periodic repetitions of such performances.

DECEMBER

1—Congress convenes in regular session.

2—Russia rebukes U. S. for "meddling" in Russo-Chinese dispute.

3—Ford raises wages \$10,000,000 a year.

4—House votes \$100,000,000 tax cut.

5—William S. Vare denied seat in Senate because of large campaign expenditures.

6—Native mob threatens marines in Haiti.

7—U. S. signs world court protocol at Geneva.

8—District of Columbia grand jury refuses indictments on charges of Senator Brockhart.

9—Ten die in New York movie studio fire.

10—Secretary of War Good dies.

11—Harry F. Sinclair, oil millionaire, completes six and a half month's jail term at Washington.

12—Clemenceau dies.

13—Cold weather breaks records in many cities.

14—Commander Byrd completes spectacular flight over South Pole.

15—Notre Dame completes a victorious season against ten major teams by defeating Army, 7 to 0.

16—Nine die in second 1929 riot at Savannah, N. Y. prison.

17—Joseph E. Gruhn, lobbyist of Pennell and manufacturers, seated as a Pennsylvania senator, having been appointed by Governor Fisher to succeed the dead Senator Vare.

18—A healthy adult's lungs contain 170,000 cells.

PERSECUTING EDUCATORS
A good educator, when he is persecuted, attracts attention far beyond his own sphere. Thus many million Americans have been interested in the controversy raging around the head of William McAndrew, former superintendent of the Chicago public schools. There is general satisfaction now in his legal vindication.
The court finds that the superintendent was not insubordinate. The charge of being "disloyal and pro-British" was ruled out because Mr. McAndrew had never been given legal notice of it. It was hardly necessary, however, to determine that point. Nearly everybody concerned is glad to forget it.
"No doubt," observes the Chicago News, "Mr. McAndrews was bored by the celebrated case of which he was made the central figure by politicians who mistook their own stupidity for cleverness. No doubt he was too busy doing work of importance in the educational field to trouble with tedious and technical aspects of the case. But in point of fact, he needed no vindication at the forum of public opinion, and his fellow-educators from the first recognized that he was a victim of moronic politics. Everybody, indeed, knew at the time of his so-called trial that his real offense in the eyes of his prosecutors was his independence and his other commendable qualities."
All that vicious and meddling politicians did was to hurt their schools and make their city ridiculous. The truth is driven home by this case, with special force, that the best procedure in education is to hire a good educator and let him alone.

PHILIPPINE INDEPENDENCE
The question of Philippine independence comes up again, in peculiar circumstances. A Washington observer says the islands "suddenly find themselves closer to independence than at any time in their history."
This situation grows out of the tariff fight. Senators and representatives from agricultural states specializing in beet sugar and dairy products find competition in cheap Philippine cane sugar and in coconut oil, used as a base for butter substitutes. These products now come in free. If the Philippines themselves were free, this country could keep them out with a protective tariff. So there is the prospect of an alliance between the law-making group referred to and the larger group which is always in favor of Philippine independence. Combined, they might make a majority and accomplish this coup.
The Filipines have been promised their freedom repeatedly by presidents, congressmen and party platforms. Fulfillment of the pledge has usually been conditioned on the political development of the natives, but in reality the reasons probably are strategic and commercial. Up to this time, it has never occurred to anybody that they would be ready for self-government whenever they were able to compete seriously with American products. They will not compete harder than ever.

WANTS COLLAR-LESS MEN
Prof. Leonard Hill, a director of the department of applied physiology of the National Institute of Medical Research, joins the growing army of would-be reformers of men's clothing. Health is his reason for wanting certain changes effected. "Men can work in tropical heat if they remove all their cloth," he says. "They can carry on without sweating, without the least increase in skin temperature and pulse rate. The heart is thus saved the extra task of keeping the body cool and therefore work could be done more comfortably with less fatigue."
He does not actually advocate that men remove all their clothing during their working day. That they wear lighter, washable garments instead of

woolen suits is about all he asks for the present. The first and greatest change needed, he thinks, is the open neck. Men should get rid of their close-fitting collars. Just at present very few Americans are working in tropical heat. What with the unusual cold weather that covered the country from the Great Lakes to the gulf, warm clothing appeals. But such a reform as the professor suggests requires time to achieve. He and other interested parties should get to work now if they are to free men from the collar by summer.

WHAT'S THE USE OF INVENTIONS
It is rather startling—or it would be, if we were not pretty well used to miracles—to read that three men in an airplane, flying over New York city, held a long-distance telephone conversation with officers on board the Leviathan, hundreds of miles out at sea. The wireless telephone is a wonder-worker which can obliterate all barriers of time and space. When you consider that stunt in all of its implications, man seems to be a towering giant, ready to take the whole universe apart and put it together again, more to his liking. But the inspiration that the stunt brings fades when you read a report of this telephoned conversation.
The weather, one gathers, was simply fine where the Leviathan was. It was also fine up in the clouds over New York. Everyone was well and happy. Everyone could hear everyone else quite plainly. And that, it develops, was just about all. Now it is not altogether an accident that the thing turned out that way. We have invented for ourselves some marvelous tools, but we do not seem to have much idea how to use them. Surely it was hardly worth while to connect a modern ocean liner with a distant airplane, by telephone, merely so that everyone concerned could make remarks about the weather—not any more than it has been worth while to develop that other miracle, the talking movie, merely in order to see and hear a lot of second-rate music hall revues.
Our hands, in other words, have worked faster than our brains. We have contrived a lot of wonderful devices which we do not quite know how to use. Science is treating us better than we deserve. It is quite possible that we may talk with Mars one of these days; but if we do, what on earth shall we say? Will it be anything more profound than information about the weather and our own health? If not, we might as well let the people of Mars go unmolested for a while yet. The inventions of this modern age have enormous potentialities for good. But they have also, enormous potentialities for evil—just as the beneficent X-ray machine could cause a good deal of mischief if some irresponsible school child got hold of the controls.

THE HINDU PROBLEM
The Nationalists of India are at it again, taking the self-determination of peoples seriously. The Indian National congress meeting in Lahore this month is expected to announce a program of complete independence. Its proclamation will be modeled after a celebrated document of July 4, 1776. Some of the phraseology is the same.
India, though a welter of nations and races rather than one homogeneous people, is said to be at last "politically minded." It has gone far since the principle of self-determination was turned loose on the world during the big war. Nationalist leaders declare that "independent India undertakes the responsibility of conducting war, concluding peace, contracting alliances, establishing mutual, political and commercial relations with other nations and performing all other acts and things pertaining to the internal and external affairs of an independent nation."
And what will Great Britain say about it—Britain to whom India is one of the brightest gems in her crown of empire? The British government has promised India self-government, but has assigned no time and pledged no definite program. Her attitude seems to be about the same as that of the United States toward the Philippines.
Our oriental dependency is a neighbor of Britain's. But with this difference—India was highly civilized when England and America were peopled with savages. Some of India's people are highly intelligent. If they ever hang together, as our colonies did a century and a half ago, they will get what they want. Britain's problem is more delicate than ours.
Miss Virginia O'Connor, Park-ave, entertained a number of friends at a luncheon at her home last noon.

The Post-Mortem
How's the head today? And the tongue?
traggidy
The gentleman who couldn't locate the bottle of mouth wash on New Year's morn.
But you should kick—anyway you could stay home and sleep it off. We of the casif hadda come down and put in time this morning. Today is just another Monday in our lives. Only more of it and worse.
Awright, darn you, go ahead and laugh.
Helen Willis is now Mrs. Frederic Somebody-or-other. Probably of more general interest than her young bond salesman are the names of those who were eliminated in the semi-finals.
problem
For two weeks straight before Christmas, Jonah-the-coroner paced the streets of Appleton dodging determined shoppers and keeping an eye and a half on the salaried kettles. All of the jangling seemed to come from the bells. Came the 24th, the very day before Christmas. The spirit gripped us. Casually we inspected our right hand pocket—yeah, the one where change, if any, is kept. Picture our utter concern, then, when we found all of twelve cents. Nothing to do but drop it in, nickel by nickel, penny by penny (two each) and charge it up to philanthropy. Anyhow, what we meant to say was that there's a problem in the whole business, for we'd watched for two weeks and hadn't seen anyone dropping twelve cents (plural) in the kettles. Picture our greater surprise when we found that someone had beaten us to it.
kettles
We are seriously thinking of establishing a salary kettle ourselves if we can only find a bell.
why
Because while today may mark the beginning of a new year, it doesn't necessarily follow that last year's bills are out of date.
radioslips
The other night an orchestra leader received a request for a number to celebrate someone's twentieth wedding anniversary. Significantly, or not so significantly, the tootlers rendered, "All that I'm Asking is Sympathy."
honnessly
Sure, he was quite serious.
resolutions
Jonah-the-coroner will NOT make any New Year's resolutions this year.
conscience
After all, one MUST play fair with one's conscience.
1930 . . . 1930 . . . 1930 . . . 1930 . . . 1930 . . .
don't bother Jonah-the-coroner. . . 1930 . . . 1930 . . . what? No, we're NOT cocoon. we're trying to break out of writing 1929. Lessee—1930 . . . 1930 . . .
mystery—watch
Gentlemen, watch tomorrow's Post-Mortem for the great coat mystery. Exciting—why you'll break a blood vessel.
mystery—keep watching

Today's Anniversary
On Jan. 1, 1898, Spain ceded Cuba to the United States.
Although American military forces "ruled" Cuba for the next three years, the great majority of officers were filled by Cubans.
Very much was done for public works, sanitation, the reform of administration, civil service and education.
Cuba became a republic in 1902 and the first Congress met May 5 of that year, took over the government from the American military authorities on May 20.
Tomas Estrada Palma became the first president.
Today also is the anniversary of the first mail delivery from New York to Boston, on Jan. 1, 1838.
And Jan. 1, 1783, is the anniversary of the birth of Paul Revere.
LOOKING BACKWARD
TWENTY-FIVE YEARS AGO
Wednesday, Jan. 4, 1905
Dr. Robert Leith was installed as president of Fraternal Reserve association at a meeting held at the previous night.
The Appleton Medical club was to give a banquet at the Rigger Hotel that night.
The Elks entertained a number of friends at a dance the preceding night at their rooms on Coliseum-ave.
J. H. Langenberg was an Oshkosh visitor the day before.
Miss Elizabeth Walsh had returned from a visit with friends at Chicago.
Frank Schaefer and Joseph Roemer were attending the chessmakers' convention in Milwaukee.
Mr. and Mrs. Charles Kelley had returned from New London where they had been visiting friends.
W. F. Saeker was attending a meeting of the officers of the Wisconsin Federal Directors at association at Oshkosh that afternoon.

Personal Health Talks

BY WILLIAM BRADY, M. D.
Noted Physician and Author
Dr. Brady will answer all signed letters pertaining to health. Writer's names are never printed. Only inquiries of general interest will be answered by mail if written in ink and a stamped, self-addressed envelope is enclosed. Requests for diagnosis or treatment of individual cases cannot be considered. Address Dr. William Brady, in care of this paper.

THE VENTILATION OF SCHOOL ROOMS
The notion that variations of temperature, humidity, air motion or weather have something to do with the prevalence of respiratory disease is still firmly fixed in the mind of the old timer in medicine and sanitation. In pursuit of this idea, the New York commission on ventilation has been making another of those "surveys" or "studies" of which school bodies are so fond, in this instance a "field study" of the ventilation of a rural schoolhouse in Cattaraugus county, in upstate New York, in co-operation with a local health survey or demonstration that is being carried on by a private endowment fund.
The New York ventilation commission seems to be anxious to show, if possible, that faults of ventilation are concerned in the causation of respiratory diseases among school children. To this end, the official report of the investigation says, a record was kept of the attendance and health condition of the pupils, on a blank form provided by the commission. On this form the teacher was requested to record the occurrence of respiratory illnesses (and then the secretary of the commission adds in parenthesis the explanation that respiratory illnesses meant "colds or sore throats") among the pupils. The teacher, moreover, was instructed to use her own judgement in recording "colds and sore throats" among the pupils present.
I do not mean to be capricious or disrespectful, but it is surely fair to say that even a very good teacher is generally a very poor diagnostician, whether she is armed with special blanks or backed by the authority of the health board or not.
This is the fatal weakness in the investigation, as it is in many similar health "surveys." Teachers, nurses and other unqualified individuals are allowed or even required to "use their own judgement" in diagnosing disease, which of course such persons do not possess.
Another grave fault of this particular investigation under the distinguished auspices of the New York ventilation commission is that no health or medical authority on the commission or outside of it ventures to define "colds" for the purpose of the inquiry. Since "colds" remain vague and indefinite, how in the mess can the teacher guess whether a pupil has one or early measles or nasal diphtheria or what? It does not seem quite sporting of the New York commission on ventilation for 1929 to pass the buck in this way to the poor teachers who dare not report by asking whadarnam "colds?" Such a survey may satisfy the requirements of the charitable folk who pay for it but it doesn't mean anything to a doctor who wants to know what it's all about.
By the use of accurate thermometers the commission observed that the temperature of the air in the average schoolroom was around 60 degrees F. while the temperature at the ceiling was around 70 degrees F., and even at the level of the desks tops in the average schoolroom there was a variation of 10 to 20 degrees in temperature in different parts of the room.
Among the conclusions reached by the investigators was that absenteeism due to respiratory illness was twice as high as it is in the city of Syracuse, N. Y. and four times as high as it is in New York City. The inference I should draw from that is merely that Cattaraugus county teachers are twice as liberal as Syracuse teachers and four times as liberal as New York teachers in dubbing pupils' complaints "colds."
QUESTIONS AND ANSWERS
Between Insomnia and Corpulency
all the time and yet cannot sleep. I have heard that a glass of hot milk upon retiring is good but as I am too corpulent though I had better not take that. (Mrs. F. E. R.)
Answer—Well, here's a little twist of the wrist with which you can take the milk and yet not grow more corpulent. Every afternoon, or every evening if you prefer, lead yourself out for a walk. A glass of milk yields a total of 150 calories. You can walk that off in a mile. Or you can dance it off in a quarter mile. Or if you can't walk, run or dance, then skip the rope a hundred times. Such daily exercise, especially if taken out of doors, always tends to make one sleep better and in some cases will do so without the bedtime lunch. A lunch at bedtime, however, is always an aid to sleep, especially if one is hungry and not overnourished.
No, Violet Is Not Blue
I understand the violet ray will not pass thru ordinary window glass. Then if one takes a sunbath under such glass does it have no beneficial effect? Does the blue electric bulb one sees on sale in all electric stores supply the necessary violet ray? (Miss H. J. E.)
Answer—You probably mean ultraviolet rays will not pass thru ordinary glass, but will pass thru special glass now marketed by various glass manufacturers. Practically no ultraviolet rays are produced by electric bulbs of any color. The electric arc is a source of ultraviolet rays. Do not be bamboozled by the so called "violet ray" machines that emit a bluish luminosity. They're just playthings for the amusement of simple minded patrons of beauty parlors and the like. (Copyright John F. Dille Co.)

A BYSTANDER IN WASHINGTON

BY HERBERT PLUMMER
Washington—if cotton had been worth anything down south back in 1898, then handsome, soft voiced and congenial Col. Campbell B. Hodges would not be at the White House today as military aide to the President.
But, at the turn of the century, cotton in Louisiana brought only 4 cents a pound. Times were hard. Hodges was scarce in the Hodges family. And as a result the career of Colonel Hodges shaped itself along lines entirely different from what he had planned.
He had his eye on the United States naval academy. Dewey was the hero of the hour as a result of his feat in Manila Bay. Battleships and anything connected with the navy were all people could talk about. Young Hodges set about to get an appointment to Annapolis. Inquiry of his representative in congress revealed that there were no vacancies at Annapolis, but if he desired an appointment to West Point instead it could be arranged. The offer was declined with thanks. It was the navy or nothing for him.
Sometime later Hodges and his father met the representative near their home. He told them that he had made the appointment despite the refusal, and that it would stand until December of that year in the event Hodges changed his mind.
HARD TIMES
Riding home that afternoon, father and son passed many cotton fields. Their conversation was mainly on one topic—how hard times were. Before they had reached home about Hodges' mind was made up. He would forget the navy and go to West Point.
In a few days he left the south and entered a preparatory school in the east to prepare for the entrance examinations. In June of 1899 he was enrolled as a cadet.
Much the same is true of President Hoover's naval aide—Capt. Allen Buchanan—in reserve order.
Captain Buchanan wanted an appointment to West Point when he decided on making the service his career, but was unable to secure one, and wound up by enrolling as a midshipman at Annapolis. Buchanan was graduated from the naval academy the year Hodges entered West Point.
But returning to Colonel Hodges—"I have never regretted my choice," he says, "not once since the first day at West Point."
Nor should he, for he has gone high and far in the army since 1899.
DECORATED
He wears the Distinguished Service Medal for his service as chief

Adventures In The Library
By Arnold Moulder

PRIESTLEY PROVES ROMANCE NOT DEAD
"The Good Companions," by J. B. Priestley, contains 640 pages and each page contains about twice as much reading matter as the page of an average novel. That means a book of about three or four times the bulk of the usual work of fiction. Add to that that it is a romance pure and simple in which no attempt is made to stick to the so-called "facts of life" in the sense in which the realists regard them and you have all the factors needed for a book that ordinarily I wouldn't look at twice. But in the case of "The Good Companions" I was sorry to reach the last long page of this enormously long novel. It was good to the last word and at no point in the book did I feel that I wanted to skip a single sentence.
If everybody could write romance the way Priestley does it I would be willing to read any amount of it. In the old battle between realism and romance, the work of great realists is often contrasted with the work of feeble romancers. When a man with a rich mind writes romance it is as worthy of attention as is the realistic type of fiction.
Priestley wrote the most distinguished mystery story a year or two ago that I have read in a long time—"The Old Dark House." He has written half a dozen volumes of distinguished essays. He has to his credit several volumes of criticism. Now he has turned to the romantic novel and has written the most distinguished romantic novel it has been my fortune to read in a long time. J. B. Priestley seems headed for an important place in the English literature of our time. Will his book give a new lease of life to the romantic novel? It looks like it.
"The Good Companions" is the story of a wandering theatrical troupe in England. Before you have been with the company any length of time you come to feel for the members of the troupe a personal affection that you used to feel many years ago for the characters of Dickens or some other beloved author of that type. You know perfectly well that things do not happen in the romantic way that Priestley makes them happen in his book, but you do not care. You and Priestley have entered into a compact to give your attention to a story of happy people for whom everything always turns out well in the long run. You never feel afraid that there will be failures and deaths and grim facts. You know before long that any reverses there are will be only temporary. In the true style of the typical romance, everything will come out right in the end. You are never disappointed.
In the hands of the unskilful writer nothing is more insane than that. You compare the romance with life and you feel 'cheated,' your intelligence insulted. Not so in Priestley's book. You allow the artificiality of the structure because he makes the people in the book so blamed interesting that you just naturally wish them well. You want them to be happy and successful as you want happiness and success for intimate and greatly loved personal friends.
The character drawing in "The Good Companions" is superb. That is probably the secret of the book's power. Through the structure of the story is not realistic, the details are. Priestley has observed life very closely and he draws his pictures with great fidelity. His dialog is humorous and picturesque without being smart. His imitation of Yorkshire dialect is always delicious, and his knowledge of the hopes and fears, loves and hates of theatrical people is very great.
The book is good entertainment from start to finish and in addition it is distinguished writing by a man whose mind has distinction. The novel teaches no lesson, it has no moral. It is a taste of life for its own sake. You are given your full measure of entertainment in a civilized way. Get "The Good Companions," forget reality, and enjoy your self.
of staff of the 31st division during the world war, and has decorations from Spain and Rumania.
From 1926 to 1929 he was commandant of cadets at the United States military academy. And when Hoover became President he selected Colonel Hodges as his military aide.

Happy New Year!
May you get a lot of kick out of 1930 without having a kick coming.
May you have enough tobacco in your old tobacco box to give you prosperity.
And enough good health to let you enjoy it.

Society And Club Activities

New Year is Ushered In By Lodges

THE infant year was ushered in Tuesday evening with plenty of noise and merrymaking at parties given by various lodges, clubs, and other organizations of Appleton. Fraternal Order of Eagles held a New Year's eve dance at Eagle hall with about 250 people in attendance. Nagreen orchestra provided the music for dancing and there were special novelty numbers including circular two steps, quadrilles, and waltzes. Henry Staedt was chairman of the event and was assisted by Richard Groth, Frank Huntz, John Dietzen, Henry Krueberg, Elmer Koerner, and Andrew Schlitz, Jr.

Serpentine and confetti filled the air at the Masonic temple last night when Masons, members of Eastern Star, White Shrine, and De Molay were entertained at a watch night party. Music was provided by Gib Horn Rainbow Garden orchestra. Several mixer dances took place and added to the informality of the occasion. Cards were played and prizes won by Mrs. Peter Traas, Peter Traas, and Dave Carlson. Mrs. James Wagg was chairman of the refreshment committee and E. H. Furstenberg was in charge of the decorations. L. H. Everlein was general chairman of the affair. About 125 couples were present.

AUXILIARY OF CHURCH NAMES NEW OFFICERS

Election of officers for the coming year took place at the meeting of the Women's Auxiliary of All Saints Episcopal church Tuesday afternoon at the home of Mrs. William Rounds, 845 E. Alton-st. Mrs. Luther Moore was elected president of the society and Mrs. George Sweetman will serve as vice president. Mrs. Thomas Evans was elected secretary, and Mrs. F. A. W. Hammond was named treasurer. The members voted that the January meeting be a luncheon at the parish hall the last Tuesday in January, and that Mrs. E. W. Averill, Fond du Lac, district vice president, be invited to attend.

The program, which was under the direction of Mrs. Charles Seaborn, was a Church Hospitals in China and Japan. A social hour followed the business session and coffee and Christmas cakes were served. Mrs. Seaborn was assistant hostess.

FORESTERS PLAN ANNUAL MEETING

The initial meeting for the development of plans for the celebration of the fortieth anniversary of Appleton Court No. 122, Catholic Order of Foresters, will be held at 7:30 Friday evening at Catholic home. The birthday program will include religious and civic exercises, and the initiation of a fortieth anniversary class of candidates.

The special committee in charge of arrangements includes Gustavo Keller, Sr., chairman, Chris Mullen, Joseph E. Schweitzer, Edward A. Killoren, and Wenzel Hassman.

Although the Appleton court was organized on Dec. 23, 1898, the event will be celebrated the latter part of January.

CHURCH SOCIETIES

A meeting of St. Paul Ladies Aid society of St. Paul Lutheran church will be held at 2 o'clock Thursday afternoon at the parish hall. A business session will take place and a social hour will follow. The committee in charge will include Mrs. Fred Arnold, Mrs. John Behnke, Mrs. Gustave Buchert, Mrs. Henry Buss, Mrs. Joseph Bayer, Mrs. William Beiling, Mrs. Otto Buss, and Mrs. Fred Butner.

The Women's Union of St. John church will meet at 2:30 Thursday afternoon in the church basement. Regular business will be transacted and there will be a social hour. Mrs. C. Minschmidt, Mrs. A. Lieske, and Mrs. E. Polzin are included on the committee.

The choir of Trinity English Lutheran church will rehearse at 7:30 Thursday evening at the church. A business session will be held at this time.

LODGE NEWS

Konoma lodge, Order of Odd Fellows met Monday night at Odd Fellows hall. Regular business was transacted. Plans were made for installation of officers to be held next Monday night. Those who will be installed are George Leenhuis, noble grand; Robert Burdick, vice grand; W. S. Patterson, secretary; and D. C. Taylor, treasurer.

There will be a meeting of John F. Ross chapter, Order of the Moose, at 7:30 Thursday night at Moose temple. The business meeting will be followed by installation of officers.

PARTIES

Mr. and Mrs. Harold Schultz, 1203 W. Packard-st., were surprised Tuesday evening by 18 relatives and friends at a watch night party at their home. Cards provided the entertainment. Prizes were won by Mrs. Louis Erd, Theresa Elaher, Mrs. B. O'Connell. Out of town guests were Mrs. Floyd Carr, Minkbank, S. D. and Theresa Fisherty, Two Rivers.

PRACTICAL USE
CIRCUS MANAGER: What's wrong now?
INDIA RUBBER MAN: Every time the strong man writes a letter he uses me to rub out the mistakes.
—Leda Englund, Manager.

Sunday Night Occasions

3149

BY ANNEBELLE WORTHINGTON

Gorgeously, yet so appropriately, gown for restaurant, bridge and Sunday night occasions in black canton crepe, as sketched in Style No. 3149.

Shirring at center-front waistline holds the line through the hips by adding a slight swathed movement to break the long straight line, which makes it so entirely becoming to most figures.

The low-placed circular tiers take an upward movement at front with two loose hanging panels at center-front. The tiers at back choose a downward curve to correspond with cape at back of slight decollete neck line. The cape collar at front is knitted in scarf effect. Sleeves have chic flaring cuffs.

A Paris gown that you can copy exactly at cost of material. Think of what an opportunity this is to keep within your budget.

It is designed in sizes 16, 18 years, 36, 38, 40 and 42 inches bust.

Patou's dahlia purple sheer velvet is extremely fashionable and flattering.

Course net in black is so demure, yet so sophisticated, because it is ultra-new.

Orange-red silk crepe is stunning for those smart young things who adore wearing frocks of daring chic.

Plum shade silk crepe, bottle green canton crepe, black crepe satin and electric blue chiffon are captivating ideas noted at smart rendezvous.

Pattern price 15 cents. Be sure to fill in size of pattern. Address Pattern Department, Our Fashion Magazine is 15 cents, but you may order a pattern and a Fashion Magazine together for 25 cents.

DESIGNATE MEET FOR OFFICERS

The next meeting of Appleton Council No. 697, Knights of Columbus, to be held Thursday, Jan. 5, has been designated by the lecturer, Robert Connelly, as Past Grand Knights meeting and all persons who have held this position have been invited to attend the special program being arranged by the lecturer. Because the regular meeting of the council falls on the day following New Year's, the program has been postponed until next week.

Although the council was organized 39 years ago, all 17 past knights are living, with the exception of John J. Sherman, who died during 1929.

Young Folks of Churches in Devotions

GREETING the new year with quiet devotions, 75 young people from seven Appleton churches held a watchnight party at the Methodist church Tuesday evening. The affair was given by the Star league, made up of young people's organizations from the Methodist, Congregational, Presbyterian, Baptist, First Reformed, Episcopal and Emanuel Evangelical churches.

Go Forward was the topic of a talk given by the Rev. H. S. Gately of All Saints church during the devotional service from 1:30 to 12. Rev. Gately told of the popes of the children of Israel as they stood on the banks of the Red Sea, and their faith when God told Moses to go forward. He admonished the young people to have the same faith and hope for the future as the children of Israel had.

Prior to the devotional service there was a get-acquainted period in the social union room, with two members of the Presbyterian church providing music, and a grand march to the gymnasium. Games and contests were played, and our members of the Baptist group presented a musical stunt. A period of singing shaded from the popular songs back to the old ballads, in preparation for the devotional service.

W. W. Sloan, religious educational director of the Congregational church, and one representative from each church prepared the program.

CLUB MEETINGS

Mrs. Herman Selig, John-st., entertained the members of the Four Leaf Clover club Tuesday night at her home. Prizes at cards were won by Mrs. August Knoll and Mrs. Herman Selig. The club will meet next Tuesday at the home of Mrs. Joseph Schultz, Seymour-st.

Mrs. T. E. Orblson, 214 S. Rankin-st., will be hostess to the Wednesday club at 2:30 Thursday afternoon at her home. Mrs. Arthur Weston will have charge of the program on "The Sea Gull" by Anton Chekhov.

The Tynmites

By Hal Cochran

O H, please don't blow us off this bike. This is the sort of trip we like," said Copy, as the big Wind Man's face spread into a frown. "We have no doubt, sir, that you could, but we're not bad lads. We are good. There's nothing we have done to make you send us toppling down."

"Ha, ha! Ho, ho!" the Wind Man roared. "For days and nights I've safely stored enough stiff breeze to make a cyclone break out mighty quick. Why I should spare you I can't see. You do not mean a thing to me. When I get through you'll know that I have pulled a clever trick."

"Let's see, now, shall I call the west wind into play? Would that be best? Or shall I make the south wind whistle loudly in your ears? The east wind, too, could do a heap and how I make the north wind sweep is quite enough to give you all good reason for your fears."

"Oh, do not call a single one," cried Copy. "We are having fun, and if we leave our bicycle 'twill up and set everything. Please keep quiet. Do not blow and we will promise that we'll go. You know that little tots at pleasure like to have their fling."

Again the Wind Man said, "Ho, ho." My answer to that thought is NO! get set now for a sudden squish and then a blinding crash." But ere he had a chance to do the things he planned, someone said, "You are going to change your mind, sir. Into you we're going to crash."

The others knew that Clowny spoke and they soon found it was no joke. Dave Clowny steered the little bike into the man real slick. The Wind Man cried, "This breaks my heart!" And then he puffed and broke apart. The Tynmites shortly left him. Wasn't that a clever trick?"

(The Tynmites meet a new little fellow in the next story.)

WEDDINGS

The marriage of Miss Mary Anne Bestler, daughter of Mrs. Theresa Bestler, 1111 S. Jefferson-st., and Irwin Hantschel, son of Mrs. Catherine Hantschel, 226 E. Fremont-st., was solemnized at Sacred Heart church at 7:30 New Year's morning. The Rev. F. L. Ruessman performed the ceremony. Attendants were Mrs. Orin Palmer and Joseph C. Hantschel.

A wedding breakfast was held for the bridal party at the Bestler home with a wedding dinner for relatives and friends at noon. After a wedding trip Mr. and Mrs. Hantschel will live at Billings, Mont., where Mr. Hantschel is connected with the Appleton Superior Knitting works. Before her marriage Mrs. Hantschel operated the Marinello Beauty shop in this city.

Mr. and Mrs. Max Gehrmann, 1347 W. Lawrence-st., announce the marriage of their daughter, Mary, to Elmer Pajala, son of Mr. and Mrs. Oscar Pajala of Brantwood at 3:30 Sunday afternoon at Brantwood. Mr. and Mrs. Pajala will live at Brantwood temporarily.

The Story of Sue

by MARGERY HALE
© 1929 BY NEA SERVICE, INC.

SUE spent the day after her experience with Geraldine in a steady routine of dictation and typing. She didn't have time to think about the complications which had so suddenly arisen, but disconnected thoughts shifted through her mind while her fingers skipped over the keyboard.

Were Theodore and Sarah really married? Or was it a pretense on Sarah's part to help Ted? And if they were to be engaged? What if they really were now? It was terrible for a girl to find out that she loved a man when it was too late, but she had been a fool. Jack was staying at the courthouse pretty long. She wished she could hear the case he was pleading today.

The salivator flashed a signal and she answered it.

"Sue," the villainess of the play is speaking. Geraldine Parker's too-high voice came to her. "I wish I could see you. I've got a good joke to tell you."

Under the flippant lightness Sue caught the quiver of something that hurt.

"Of course I'll see you. Geraldine where's old I come?"

"I'm still at my boarding house. What time can you come?"

"About eight o'clock," Sue asked.

"Fine! It's such a good joke. But the voice died away in hysterical laughter.

Miss Parsons left early to do some shopping and Sue was alone at closing time. She put on her hat in front of the mirror and stood absently watching her face and thinking about Geraldine.

"The best looking picture in the office," a merry voice, warm with approval, interrupted her reverie. She turned around quickly and smiled into Jack Thornton's half laughing, admiring gaze.

"I wasn't watching myself," she explained. "I didn't even know I was standing in front of a mirror. I was thinking."

"Do it often. It's very becoming," he replied. "I won my case. Sue! My oratory was—unbeatable! He laughed relievedly and happily.

"Splendid! Congratulations, Jack!" She held out her hand. "Of course I know you would. Any jury that wouldn't give you a verdict is just plain dumb!"

He laughed amusedly and tossed

his hat in the air. "I'm going to Harry's to dinner tonight. He's nearly well again. Heard from him today?"

"No," Sue answered. "Why should I?"

"Oh, I don't know. To hear him talk I thought he probably stayed at one end of the telephone line most of the time. Going home now, I'll drive you."

Sue nodded, but she was wishing that he wouldn't seem to approve so heartily of Harry's interest in her.

They went down the steps together and Sue caught their reflections in the full length mirror that was down the stairs. Jack had broad shoulders and in his perfectly cut business suit, Sue, slender, lit with quick nerves on her luscious body and her head barely coming to his chin.

His keen gray eyes that her sparkling blue ones even as she looked and they both laughed.

"I understand Harry's case," Jack told her in a voice that was whimsical and brotherly and — Sue

SALESMAN REUNITES BROTHER AND SISTER

Manitowoc —(AP)— The conversation of a salesman with his client in a store in Anderson, S. C., several weeks ago has resulted in the reunion of Sidney T. Pratt, Manitowoc, and his sister, Mrs. U. P. Ellis, after an estrangement that began when the former left Liverpool, England, 37 years ago.

Ray Bradman, the salesman, on Sunday telephoned W. C. Olson, vice president of the firm, and told him that he had a brother, "Sidney T. Pratt," who was in the city. Last Saturday he related the incident.

Wondered if she was married — a lady married.

NEXT: Sue goes to Geraldine's room.

Copyright, 1932, NEA Service, Inc.

to a representative of Mr. Pratt's business concern and later a telegram was dispatched by Pratt to his sister.

Yesterday a long letter from Mrs. Ellis announced receipt of the telegram and verified the relationship. Mr. Pratt had for years believed his sister to be in Canada.

Italians never use the number 13 in lotteries.

U. W. Cagers Win Fourth Straight Pre-Season Game

BEAT IOWA STATE IN NEW YEAR'S EVE BATTLE AT MADISON

Badger's Offensive Play Is Ragged but Defense Is Impenetrable

MADISON—(AP)—Wisconsin university basketball team could face a new year without forebodings today. A fourth straight pre-season victory, over Iowa State of Ames, gave the Badgers assurance they had not faltered. The score was 34 to 17.

The Badgers' offensive play still was ragged, but their defense was impenetrable, except late in the contest when Coach Meenwell sent in three substitutes. Wisconsin scored five points before the Iowans counted a free throw and steadily added to its lead.

Captain Bud Foster of the Badgers played a great free game, feeding the ball to Hall, Farber and Poser for short basket shots.

Coach Merl Ross' five presented a defense that frequently stopped Wisconsin's weaving offense and Heightman successfully bottled Foster, the Badger keyman.

Iowa State scored all its points from the free throw line and mid-floor except in the closing moments of the game when Heightman dropped in a brilliant one-hand push shot from near the free throw circle.

Wisconsin played a slow offensive game which broke sharply when scoring opportunities were presented, but the Badger ball-handling was ragged, especially the play of Farber and Mathews. Ames featured a reverse-pivoting offense, but Wisconsin's defense was too strong to permit plays to be completed successfully.

The lineups and summary:

IOWA STATE (17)	G	F	P	T
Woods, f	1	3	3	5
Roadcap, f	2	3	1	7
Heightman, c	1	1	1	3
Hawk, g	0	2	3	5
E. Reike, g	0	0	0	0
Totals	4	9	11	17

WISCONSIN (34)	G	F	P	T
Farber, f	2	0	0	4
Poser, f	3	4	1	10
Nelson, f	0	0	0	0
Foster, c	1	4	2	9
Grissold, c	0	0	0	0
Hall, g	2	0	0	6
Chmielewski, g	1	0	0	2
Totals	13	8	3	34

Score at half—Wisconsin 15, Iowa State 8.

Referee, Kearns (De Paul); Umpire, Travnick (Armour).

PLAN TO BROADCAST TWO FOOTBALL GAMES

East-West and U. S. C. Pittsburgh Games on Air This Afternoon

New York—(AP)—The Pacific coast's annual football greetings to the new year will be broadcast on the afternoon of Jan. 1.

Two games are to go on the air. The tournament of roses contests between the university of Southern California and the university of Pittsburgh will be broadcast by the National Broadcasting company from Pasadena. The east-west all-star game will be described over the Columbia channel.

The revised list of stations for the two broadcasts, announced today, follows:

N B C chain—4:30 p. m. (Eastern time)—Tournament of Roses—WEAF, KVV, WTV, WJAR, WTAG, WCHS, WLIT, WRC, WGY, WGR, WTAM, WFJC, WVV, WSAI, WBO, WDO, WDAF, WTAM, WKEF, WES, WVA, WVPF, WBT, WJAX, WIOD, WWSM, WSM, WMC, WSB, WAPI, WYMS, KYM, KYES, KPRC, WOAI, KOA, KSL, KGO, KFI, KGW, KHQ, KOKO, WODX, WFAA—WDAF.

CBS chain—4:45 p. m. (Eastern time)—East-West game—WABC, WNAC, WMAQ, WBBM, WVK, KABC, KOIL, WEAN, KMON, WVAL, WHP, WPEM, WPIV, WML, WISN, WOOD, WISC, WDRB, WBRB, WYON, WZLX, KLBK, WIEV, KDYL, KFRC, KVI, KFFY.

TUT AND WALLACE WILL MEET TODAY

Advance Ticket Sales Indicate a Sell-out at Auditorium

Milwaukee—(AP)—Two hard fighters were matched today in the New Year's first Wisconsin boxing event. King Tut, the Wonesow boxer, faced Billy Wallace of Cleveland, who packs a blow sometimes equal to that of the King's.

The lightweight pair meet over the 10-round route at 133 pounds. Advance ticket sales indicated a sell-out for the auditorium card.

Although Tut has recorded some impressive victories, Wallace could find consolation in the record books. He likewise could take solace from the fact that betting odds favored him.

Other pairings for the card were: Tait Littman, Milwaukee, vs. Ray McPeck, Chicago, five rounds; Larry Brimolia, Boston vs. Tony Mandell, Rochester, five rounds; Ollie Bartlett, Minneapolis, vs. Leo Spiegel, Milwaukee, five rounds; Jimmy Chase, Chicago, vs. Johnny Gaudes, Milwaukee, five rounds; Eddie Black, Milwaukee, vs. Frankie Hughes, Kenosha, four rounds.

Sport Leaders See New Records Made During 1930 Athletic Campaigns

By The Associated Press

CHAMPIONS and leaders in the world of sport, at the special request of the Associated Press, today set forth their views as to what the new year holds in prospect. Without exception they look forward to unusually keen competition, especially in international rivalry, during 1930. Their statements follow:

Bobby Jones, national open golf champion—"The only thing worthy of comment in 1929 was the fact that there were no new arrivals in championship golf. All championships were won by men and women who had held them before except the American amateur which was won by Harrison Johnston, a contender for years. Looking forward, I think 1930 will see such action in international competition, particularly in the amateur field. The United States should be able to send a fine team over for the Walker cup matches and inasmuch as the competition will be played on British soil, it is safe to say that the British side will be stronger than it was two years ago. A good many American players will very likely compete in both the British amateur and open tournaments. My plans are to take part in these events."

Connie Mack, manager of the world's champion Athletics—"I believe 1930 will be a fine year in sports. Sports of all kinds are constantly being placed on a higher plane and for this reason, I think they will be bigger and greater than ever in the year at hand. The Athletics had a wonderful season in 1929 but I have strong hope that they will even surpass this record in 1930. I send my greetings to sport fans everywhere and feel they are in for a great year."

Tommy Hitchcock, Jr., captain of American polo "Big Four"—"1930 will be a big international year in polo and the United States enters it with as fine a supply of material as the country has ever had. To meet the challenge of a strong British team for the International cup we will have available the members of last year's international squad as well as some promising players who have developed rapidly since then. The colleges each year are producing more and more men of potential international calibre."

Gene Tunney, retired heavyweight champion—"As far as I am concerned my retirement is official but I have no thought that I have taken the future of boxing into retirement with me. The game will survive out of the chaos of the moment, order will emerge. Certainly during the new year a heavyweight champion will be established and this will add balance to the situation which was somewhat unlevel during 1929. No, I have no idea that the future of boxing is behind it."

ROCKE EXPECTS TO HELP

Knute Rocke, Notre Dame football coach—"We lose nine first class football players by graduation and face a stiff ten game schedule in 1930 but don't feel too sorry for us. We'll have a fair team and be scoring a few touchdowns. I'm almost well again and should be able to be of some help to my very able coaching staff."

Arthur (The Great Shires) White Sox first baseman—"What I'm going to do to American league pitchers in 1930 is nobody's business and what I'm going to do to some of these baseball players who think they can fight is plenty. My goal is to get \$250,000 and then settle down in some little town. I expect to get a hunk of that in 1930 even if they do call me a fool."

Jack Dempsey, former world's heavyweight champion—"Boxing will crown a new heavyweight champion in 1930 and with him will come new interest and activity in all divisions. The heavyweight champion is the king of the sport. Without him boxing doesn't go very far. Along with my best wishes to all sport followers for a happy and prosperous New Year let me add the conviction that the new heavyweight title—holder will be chosen in the middleweight."

Glenn S. (Pop) Warner, Stanford football coach—"It was a great football season but I think next year will be even better. There will be many more inter-sectional games. Football is helping the east and west get better acquainted with the west. The fumble rule worked out very satisfactorily. I have heard very little criticism of it from any source. One of the outstanding things of the past season was the advance of western Catholic schools, notably St. Mary's and Santa Clara, in a football way."

James A. Farley, chairman of the New York State Athletic commission—"Boxing will see more new champions in 1930 than ever before in the history of the game. A new champion will be set up among the heavyweights and he will give fresh impetus not only to that division but to all others. The sport as a whole should enjoy the most prosperous and exciting year of its history. My hope and wish is for a happy New Year all."

FRENCH FEAR YANKS

Henri Cochet, world's tennis champion—"Our French team has just concluded its around-the-world trip with great success as I cable this from Cairo. I hope we shall have equal success in keeping the Davis cup against the challenge of youthful Americans."

William T. Tilden, American Tennis champion—"Here's hoping that Davis cup returns to America in 1930 in most successful year tennis has ever known. The fact that I am through with Davis cup competition makes my wish all the more sincere."

Sammy Mandell, world's lightweight champion—"I'm going to risk my title often in 1930 and while I expect some tough battles, I believe I'll still be the lightweight champ. It's going to be a big year for boxing from the heavyweights down, I think."

Frank Carideo, Notre Dame's all-American quarterback—"It's been a long time since we've got better so I expect to do it in 1930. I'll still be the lightweight champ. It's going to be a big year for boxing from the heavyweights down, I think."

R. L. (Dink) Templeton, coach of championship Stanford track team—"The biggest forward step in track during 1929 was the adoption of the mile, which I think will inevitably become universal. They are mechanical aid to the runner but only eliminate the digging of starting holes and speeds up meets immeasurably."

EXPECT NEW YEAR TO SOLVE MUDDLE IN BOXING WORLD

1930 Also Will See Decision on Iowa and Keen Competition in Golf

BY ALAN GOULD

NEW YORK—(AP)—The old year with all its thrills in sport fades today before the new, with the promise that 1930 will furnish greater international rivalry, keener competition for the ruling champions, larger crowds, bigger and better arguments.

At the outset, one of the main debates left over from 1929 for settlement is the east-west feud, which will take place at San Francisco and Pasadena today. In these, the unbeaten University of Pittsburgh team and the eastern all-stars will seek to reverse the scales which already have been turned in the west's favor by Stanford's conquest of Army.

Two other items of unfinished business bequeathed by the old year to the new, are the case of Iowa, and the selection of the world's heavyweight boxing champion. The boxing seems to be in favor of Iowa's ultimate reinstatement and the elevation of the Boston sailor, Jack Sharkey, to the post vacated in the summer of 1928 by Gene Tunney and unoccupied since.

The first 1930 test for Sharkey is slated in Miami, Feb. 27, with Tuffy Griffith as a likely opponent. The final test, probably will be against Alvin Schramm in June or September, but there is still some fear that the eliminations again may eliminate all the contenders.

By far the most spectacular outlook for the new year centers about the revival of international classics in golf, polo, yachting and horse racing, in addition to such hardy annuals as the Davis cup contest.

In picturesque touches, the challenge of the famous Irish sportsman, Sir Thomas Lipson, for the million-dollar prize will find Lipson's Shamrock vs. Seeking the classic for the first time in ten years in a series of races against the American Defender to be sailed off Newport, starting Sept. 13.

In competitive interest, the invasion of Britain's links again by Bobby Jones will be one of the year's high spots. Besides leading the American Walker Cup team, Jones will campaign all along the English golf front, seeking to repeat his triumphs of 1926 and 1927 in the British open as well as to win the British amateur for the first time. At home, the great Georgian will defend the National open and try to regain the amateur title, now held by "Jimmy" Johnston, in one of the most strenuous seasons of the Jones era.

U. S. SEEKS DAVIS CUP

The Davis cup war, so far as the United States is concerned, will be fought without Big Bill Tilden for the first time in ten years. Tilden's retirement leaves to youth the battle against the world's best. The United States has a formidable team in its ranks. The French won without Lacoste in 1929 and they figure to keep the historic trophy for at least another year.

As Helen Wills Moody, the American queen of the world's courts is expected to continue her tournament career, and Tilden, even though out of team play, will be a factor once more in the men's championships of France, England and the United States.

Connie Mack's Athletics, having crashed through to the world's championship of baseball after a long wait, figure to stick around the top in 1930. The Mackmen have the talent and equipment for a prolonged term at the peak but the dethroned New York Yankees will be primed for a come-back under their new manager, Bob Shawkey. In the National league, the Chicago Cubs face formidable challenges for the pennant from Pittsburgh and New York. Altogether, 1930 should be an interesting baseball year, following shakeups in the management of eight of the 16 big league clubs.

The youthful talent was not quite good enough in 1929 to break down the barriers erected by many of the old timers; not quite accomplished enough to remove the crowns adorning the aged brows of Ruth, Tilden, Walker, Hornsby, Hagen, Diegel and others. Few of the main titles changed hands in the closing year but the campaign of 1930 will see the old guard up against keener competition, under higher pressure from the youthful brigade.

Nineteen-twenty-nine closed the bright gridiron chapter of Red Gage of the Army but the story-book career of Albie Booth of Yale has just begun. With all the sprightly grace of little Albie, kid 1930 picks up the battle where old man 1929 left off.

New York University second player on the seeded list. Jacobs the favorite to win the title took his semifinal match from a townsman Aaron Miller 6-9 6-3.

Frame gets a chance to make up for his semifinal defeat today in the junior doubles final with Fred Roll of Mercersburg. They meet Sande Davenport and Richard Bowring of the West Side Tennis club New York in the final match for the National Junior Indoor Tennis championship. Billy Jacobs of Baltimore city college, first seeded player of the tournament, who is following in the footsteps of his brother Eddie, is one finalist. His opponent today is John Richardson, Dartmouth player who came to the last round after a series of upsets.

Richardson reached the last round yesterday by eliminating Donald Frame of Harvard 6-4 1-6 6-3, after having burst into the limelight last week by defeating Sidney Seligson of

AN OLD TIMER'S SCRAPBOOK BY TIM MCGRATH

ABOUT THE FIGHTER WHO DARED FITZ TO STAND HIM ON HIS HEAD—AND WHAT HAPPENED

BOB FITZSIMMONS was the hero of a double feat I witnessed in Tattersall's arena in Chicago, back in 1929.

He not only scored the quickest knockout I've ever seen, but he landed his opponent just exactly as he said he would.

Ruby Bob was fighting Jim Thorne in Tattersall's. It was his first contest after Jeffries stopped him at Coney Island. Thorne, a good English middleweight, perhaps thought the beating by Jeff had Fitz all washed up; that he'd take him very easily.

He answered the first bell by rushing out and roughing Fitz viciously. This made Bob mad. In a clinch, he threatened to stand Thorne on his head if he didn't fight like a man.

"You big freak," said Thorne, with a curse, "I'd like to see you stand me on my head."

"Ere goes, then, mind yourself!" was Bob's retort.

With that, he feinted Thorne a few times, tied him in a knot, then shifted on him.

That always was a dazzling thing, the Fitzsimmons shift. And never did I see it work better than against Thorne.

Thorne stood in the center of the ring, trying to figure out what was

going to happen next. Fitz hooked his right for the jaw, missed purposely, whipped his right back as though he would slip over a back hand blow to the chin. Thorne threw up his hands to block this. And like a flash, Fitz shifted and shot in a left uppercut.

It was practically the same shift that Fitz used to wrest the title from Corbett at Carson City, Nev. Only this hit the jaw instead of the solar plexus.

The punch lifted Thorne clear off his feet, and hurled him backward. He alighted on his shoulders and the back of his head. His feet touched the floor behind him, and his body formed an inverted "Y" like a bridge.

The referee counted him out while he was still senseless and in that grotesque position.

The fight was over within two minutes of the time it started. Fitzsimmons made good his threat in half a minute.

Another fight with a weird ending—and one also involving an Australian fighter—was that between Sam Fitzpatrick, the Australian Comet, and Mike Cleary of New York. Fitzpatrick was a terrific hitter of the Terry McGovern type, usually scoring early knockouts.

Mike Cleary was the same sort of bristling battler—"club fighters," they call them now. The wise bettors figured that it was a question of who landed first, and thus won the fight.

In the second round, they were tearing away, and simultaneously, each swung with all his might. Simultaneously each took one on the chin. Together they went to the canvas!

And they remained dead to the world, while they were counted out—together!

Y. M. C. A. CLUBS HOLD SWIMMING MEET

Ted Moder Cops Honors Among Friendly Indians by Winning Four Firsts

Winning first place in all except one event, Ted Moder copied first place in a Friendly Indian club swimming meet held at the Y. M. C. A. pool a few days ago as part of the boys' department athletic activities during the holidays. He placed first in four out of five individual events and was a member of the winning relay team.

Bob Carnes and Ed Goodrich won first place in the Older Boy class with 24 points each. Each won three first places and a like number of points by placing among the leaders in the other events.

Results of the races and events follow:

FRIENDLY INDIANS

20 yard free style—T. Moder, C. Mullen.

25 yard breast stroke—T. Moder, R. Mullen.

Diving—R. Mullen, James Symeon.

40 yard free style—Ted Moder, William Thoms.

Ballroom race—Ted Moder, R. Mullen.

Relay race—Won by team composed of T. Moder, Bill Thoms, H. Ratzman, and James Symeon.

OLDER BOY EVENTS

20 yard free style—Ed Goodrich, Robert Carnes, Newman Johns.

20 yard back stroke—Robert Carnes, Ed Goodrich, Newman Johns.

20 yard breast stroke—Robert Carnes, Ed Goodrich.

40 yard dash—Ed Goodrich, William Van Nortwick, Robert Carnes.

100 yard dash—Ed Goodrich, William Van Nortwick.

Relay race—Won by Robert Carnes and William Van Nortwick.

Diving—Robert Carnes, Ed Goodrich.

EDUCATOR WOULD ABOLISH GATES AND GRID COACHES

Wants Intercollegiate Football Placed on Strictly Amateur Basis

NEW YORK—(AP)—Elimination of gate receipts and "highly paid seasonal coaches" and the organization of a new league or conference in which such innovations as these could be put into practice were proposed today by President Frank Parker Day of Union college in an address prepared for delivery before the National Collegiate Athletic association.

Speaking on "The Challenge of the Carnegie Report," Dr. Day announced himself "glad to negotiate with nearby colleges of good academic standing and similar athletic strength for the formation of such a league." He mentioned as a nucleus for the proposed association of New York State and New England institutions, Williams, Amherst, Wesleyan, Hamilton, Rensselaer Polytechnic Institute and Union.

"I have been hoping for some years," said Dr. Day, "that the big and well-established universities in the east, like Harvard, Yale and Princeton, would lead the way out of this athletic maze in which we are now wandering."

"The Carnegie report has no sign of this, however, and it was with a sinking heart that I recently read in the paper that the great university of Columbia had engaged an \$18,000 coach to train her squad of football players."

Dr. Day predicted that if such "truly amateur leagues" as he proposed could be formed among the small colleges named and others elsewhere, "much good in the way of example might come from it for the great universities."

"The lure of America a habit of capitalizing on our fine sentiments. In this vast athletic venture in which we are engaged we have capitalized the spirit of young men to make a vast show for the public."

The Union college head took occasion to criticize drinking, betting and ungentlemanly behavior at one football game which he attended as well as to protest at what he regarded as "vulgarity and degradation" in radio accounts of gridiron contests.

"It is no good shouldering the blame upon coaches or graduate managers," he declared. "We, the administrators of colleges, must take the burden upon our own shoulders."

"Here is what we might attempt: First, to have no gate fee to our games and to admit by invitation; second, to do away with high-priced seasonal coaches; third, to ban all scouting, subsidizing, proselytizing and see to it strictly in our own circle that no undergraduates in college or university receive material gain and is appointed to no position simply team."

Asserting that instead of a "crowd" of onlookers, we need crowds of players," Dr. Day said "a good many undergraduates in colleges feel that it is unjust that they should be taxed yearly in order that 30 or 40 highly-selected athletes should be trained by a highly-paid coach to meet the highly-selected athletes of some other college."

"Amateur coaching among the colleges opposing large universities in athletics and attributing such meetings to the desire of the small institutions for fat guarantees, he pointed out that "in other sporting matters we do not proceed in this way, and match a famous heavyweight against an almost unknown lightweight."

"Amateur coaching among the colleges of the league he suggested was advocated."

"Grant you that our teams would not be so good under this system of amateur coaching," he said, "but I do not think that matters very much, although in America we have a burning desire to excel in athletics."

TIGER, DARTMOUTH HOCKEY TEAMS MEET

New York—(AP)—The annual holiday college hockey series at Madison Square Garden will be continued tonight with Princeton opposing Dartmouth. Each has played one game here in the series with impressive results. Dartmouth put up a great battle against Yale's intercollegiate champion team before losing 3 to 2 while Princeton displayed a good game Monday in trouncing Williams, 7 to 3. The Green is a slight favorite to win despite an 11 to 3 beating by Toronto at Boston Monday.

ALUMNI BASKETEERS BEAT H. S. QUINT

Benny Rafoth Gets Six Baskets and Has Beens Eke Out Victory

Appleton high school basketball team lost a practice game to the alumni team Tuesday afternoon at the Y. M. C. R. gymnasium, 13 and 17.

Benny Rafoth, center on last year's team led the alumni in their assault of the basket and tallied six field goals. The remaining points were chalked up by Kunitz and Gochnauer guards and Koss a forward who probably isn't an alum.

Statistics of the game follow:

Association Teams Again Developing Young Players

BY FRANCIS J. POWERS Copyright 1929

CHICAGO—The development of major league material in the minors is getting back to normal, particularly in the class AA circuits, for the first time since the war. The American association has entered upon a policy of utilizing young players and rapidly is losing the atmosphere of an old man's home while the Pacific coast and International leagues also are producing some likely candidates for the big show.

During the 1929 season every American association team sold at least one player to some big league club. The majority of those snatched by the majors are going up for the first time and all of the recruits have good chance to stick.

St. Paul was the big developing ground of the association during 1929. From the ranks of the Saints the New York Yankees secured pitcher Americus Poli a right hander who won 22 and lost 9 games; infielder Ben Chapman and outfielder Alan Cooke. Both Chapman and Cooke were hard hitters in the association and Bob Shawkey is counting on them to bolster his Yankees. The Yankees also took catcher Bubbles Hargrave a doughty veteran from the saints for the obvious reason that no good, young catchers were to be had.

Kansas City sold Bob Seeds a big outfielder for an average of \$24 to the Cleveland club and Billy Evans believes the young man will round out one of the best outfielders the Indians have had in years. The Chicago Cubs snared pitcher Larry Nelson, who until he was injured was the leading pitcher on the Kansas City team. The Bruins went storing for association pitchers and also purchased Malcolm Moss from Louisville and Arthur Teachout from Indianapolis. Moss and Teachout are southpaws and while their record with second division clubs were unimpressive they showed enough to attract Cub scouts.

Cincinnati found one of the best prospects of the year on its Columbus farm and Dan Howley expects to use Charles Cuccinello at either short or third on his rebuilt Reds. Cuccinello was one of the leading batters of the association and a clever fielder. Still a raw youngster he has not reached his full development but is coming rapidly.

Another Columbus player to advance was Pete Jabonowski, purchased by Cleveland. The former Michigan star won 13 games for a second division club and displayed everything needed to win at the majors. "Jabby" had been up before but lacked experience and now is tickled as ready.

The New York Giants took Leroy Parmelee a big right handed hurler from the Toledo club and he has a good chance to remain with John McGraw. Parmelee is one of Casey Stengel's discoveries and has a tremendous amount of stuff.

Toledo also sold Jackie Warner to Brooklyn after the former Detroit Tiger has shown a lot of skill at short. Warner played third for the Tigers but really proved much more competent at short. Ois Miller a second baseman was taken from Milwaukee by the Boston Red Sox and Spencer Harris, up before with the White Sox and Washington, goes to Detroit. The St. Louis Browns recalled several players from Milwaukee and Cincinnati two who were at Columbus on option. So the association's representation in the two majors will be rather heavy.

The association's policy to attempt the development of young players of interest among the fans and President Thomas Hickey believes the organization soon will regain its normal level in attendance.

CLEVELAND LEADS PRO CAGE LEAGUE

Rosenblums Benefit Most When Celtic Games Are Thrown Out

New York—(AP)—Cleveland and Brooklyn still are locked in a great battle for the first half championship of the American Professional Basketball league but the odds seem to favor the Obians, holders of the world's title.

Cleveland led the visitations by one full game today with the first half season on Jan. 15. Each team has six more games to play. Cleveland, aside from one trip to Rochester, plays all its remaining games at home, meeting Rochester twice, and Ft. Wayne, Brooklyn and Chicago once each on its home floor. Brooklyn plays Chicago, Patterson and Syracuse at home and then must take to the road for games with Cleveland, Patterson and Syracuse.

In the shakeup of Monday when the league voted to throw out all games played by the New York Celtics, Cleveland benefited most. The Rosenblums lost one victory and one defeat by the league's action, Brooklyn lost one victory.

The standings to date follow:

Club	W	L	Pct.
Cleveland	12	6	.667
Brooklyn	11	7	.611
Rochester	10	8	.556
Chicago	9	9	.529
Ft. Wayne	10	9	.526
Patterson	6	10	.357
Syracuse	4	14	.222

PRIMO CARNERA ARRIVES IN U. S. FOR HEAVY BOUTS

Italian Heavyweight Aspirant Weighs a Mere 360 Pounds

BY JOHN J. ROMANO Copyright 1929

NEW YORK—This is a red letter day in the fistie calendar. Primo Carnera, the colossus of the ring, has deigned to bring to America his massive left of 360 pounds generously distributed over six feet ten inches of stature. Primo was indeed an eye-full as he stepped off the boat here and blinked his eyes in wonderment at the country he is invading.

American fans are curious about this behemoth of the ring. Can he really fight, or is he getting about on account of his size? His record is not much of anything and so this observer will have to take the word of Pa Strubbing that the giant Italian is not a fake. Pa is the manager of his son, young William Strubbing 2nd and it will be recalled that both fights wound up in fouls but, according to Pa, Carnera showed enough to prove that he is not a "fake."

That Carnera will get plenty of work in this country is assured. He has signed to make his American debut in Boston against Jim Maloney, and the foreigner will draw down ten thousand dollars. Not a bad sum when you figure that there are any number of heavyweights who would take one-fifth of that money to throw punches at the Boston Irishman.

If Carnera gets by Maloney, and the chances are that he will, because Shamus has short arms and has to swing his punches to get them over—the Italian giant will be in greater demand.

At this writing no one can safely hazard an opinion on Carnera's chances of scaling the heavyweight ladder and reaching the top. The scowling Italian may be a good fighter. He will have to prove it against first rate competition before he will be seriously considered.

PLAY FINALS IN TENNIS TOURNAMENT

Dartmouth and Baltimore City College Stars in Title Round

New York—(AP)—The most favored of the younger brothers' contingent and the dark horse contender of the tournament meet today in the final match for the National Junior Indoor Tennis championship. Billy Jacobs of Baltimore city college, first seeded player of the tournament, who is following in the footsteps of his brother Eddie, is one finalist. His opponent today is John Richardson, Dartmouth player who came to the last round after a series of upsets.

Richardson reached the last round yesterday by eliminating Donald Frame of Harvard 6-4 1-6 6-3, after having burst into the limelight last week by defeating Sidney Seligson of

LOS ANGELES TO ENLARGE COLISEUM

Increase Seating Capacity to 100,000 Persons; to Spend \$450,000

Los Angeles—(AP)—The city council has approved a contract for enlargement of the Los Angeles Coliseum to more than 100,000 seats in preparation for the 1932 Olympic games.

The council tentatively allotted \$225,000 for replacement of the upper tiers of wooden seats and for construction of new foundations for the proposed addition. Seats.

The contract for the construction must be approved by the Tenth Olympic association, the Sixth District Agricultural association and the Community Development association, before construction may begin. Under the contract both the city and the county must expend \$450,000 before Jan. 1, 1933, on the construction work.

The Coliseum is the scene of the University of Southern California football games and of other outstanding athletic events.

SPORTS QUESTION BOX

Question—Whom do you consider the outstanding contender for Sammy Mandell's lightweight title?

Answer—Tony Canzoneri and Al Singer are even up. Canzoneri lost a close decision to Mandell and Singer fought Canzoneri a draw.

Question—In the last half of the ninth the score was tied at six runs. The home team put runners on second and third. The batter hit for three bases scoring two men ahead of him. What was the final score?

Answer—The final score was 7 to 6.

Question—As an aftermath of the Benny Bass-Ted Morgan junior lightweight fight here Dec. 29, the New York State Athletic Commission today abolished all junior championships. The commission also retained both fighters' share of the purse pending further investigation of the bout.

JUNIOR LIGHTWEIGHT CLASS IS ABOLISHED

New York—(AP)—As an aftermath of the Benny Bass-Ted Morgan junior lightweight fight here Dec. 29, the New York State Athletic Commission today abolished all junior championships. The commission also retained both fighters' share of the purse pending further investigation of the bout.

NOTRE DAME TO SEEK NEW HONORS IN 1930 SPORTS

Irish Have Impressive Record for 1929 Accomplishments

SOUTH BEND, IND.—(AP)—The University of Notre Dame will watch its greatest athletic year pass into history, anticipating an even greater one.

A football team ranked second to none in the country; basketball, baseball and track teams that rated among the leaders; beginning of work on a new stadium and the completion of a nine hole golf course on the campus itself, are some of the reasons why the Irish may call it a "happy old year," and look forward with hopes for another extraordinary year.

The football team—which played every game away from home—drilled its way through Indiana, Wisconsin, Navy, Carnegie Tech, Georgia Tech, Drake, Southern California, Northwestern and Army, playing before a total attendance of approximately 575,000. All this while Rockne, the "Vital Viking," lay in bed suffering with a leg infection. Rockne was able to direct in person only three games—Indiana, Carnegie Tech and Southern California—but had Tom Lieb, one of his former stars, to carry on in his place in the other battles.

Four of the teams which contributed defeats to make the 1929 season a relatively dismal one for Notre Dame—Wisconsin, Carnegie Tech, Georgia Tech and Southern California—were beaten in 1929.

Frank Carideo and Jack Cannon virtually were unanimous choices for all-American honors at quarterback and guard, respectively, while Ted Twomey, tackle; Tim Moynihan, center; Captain John Law, guard; and Jack Elder, halfback, received favorable notice.

With the new stadium assured for the 1930 season and an even more ambitious schedule of 10 games, Notre Dame's adherents feel the school is on the threshold of even greater athletic glory.

In basketball Notre Dame won 17 games and lost five. Northwestern contributed two defeats, while Butler, Indiana and Kentucky, each won one from Coach George Keegan's team. Butler, Pittsburgh, Pennsylvania, Wabash, Marquette, Detroit, Michigan state and Kansas were among the teams to fall before Notre Dame. Ed Smith and Donnie Donovan, guards and Frankie Crowe, forward, were mentioned on all-state and all-western teams.

Baseball, under Tom Mills, produced 19 victories against six defeats. The Irish had an unusually successful Southern trip and finished the season with a victory over Navy at Annapolis.

John P. Nicholson's efforts to revive Notre Dame's strength in track, met with considerable success. With Jack Elder, in the sprints, the outstanding star, Notre Dame split even in four dual meets, won both the indoor and outdoor central collegiate

Here Are Some Snappy Resolutions That The Great May Or May Not Make

"RESOLVED," says Senator Borah who is well known to millions—both for his long hair and his vigorous opposition to the nation's entrance into the World Court — "that there's enough trouble in this world without courting it."

"RESOLVED," says Colonel Charles A. Lindbergh (who has risen to great heights in this world and gone a long way for a young man who was unknown a few years ago) "that I'll do all in my power to keep everybody up in the air in 1930."

"RESOLVED," says President Hoover, the big business and White House man who occupies the White House and is looking forward to great things in 1930. "that each of us should do everything we can to put the 'I' in 'PROSPERITY' in 1930."

"RESOLVED," says Mrs. Dolly Curtis Gann, who knows all about the order in which the guests should be seated at a Washington dinner party. "that those who make the mistake of sitting at the wrong place at a dinner table should get their just desserts — just their desserts, that's all."

"RESOLVED," says Henry Ford, who has lined up with President Hoover's 1930 prosperity program. "that I'll do everything in my power in 1930 to keep things rolling along—especially on four wheels."

"RESOLVED," says Gene Tunney, the elite heavyweight champion who has smashed almost as many newspaper cameras as he has mauling faces in the prize ring. "that I'll never give a camera another break. Just what does Mr. Tunney mean by that?"

"RESOLVED," says Senator Brookhart, who attended a certain famous dinner party in prohibition Washington and then failed to forget to remember what he saw consumed there. "that our national anthem should be changed to 'In the Sweet Dry and Dry.'"

HARRIS ALONE IN ATTACK ON HOOVER CRIME COMMISSION

Wets and Drys Want to Give Organization Chance to Work Unhindered

BY RODNEY DUTCHER

Washington—Excoriation of the National Commission on Law Enforcement and Observance probably will be confined to a few senators whose principal worry in life is whether they can convince dry constituents that it would be a sad blow to prohibition if they were not renominated and reelected next November.

At any rate, when Senator Harris of Georgia roars for an immediate report from the commission on the dry laws and demands the firing of a member who dared to describe the illegal acts of enforcement officers as a problem, he is speaking very largely for himself.

GETS LITTLE SUPPORT

The organized dries are not behind him. They do not think that the idea of Senator Harris are bright ideas at all. And, in fact, whatever the political effect may be in Georgia, neither do many others here. The crime commission is the first of various Hoover commissions that anyone has tried to monkey with and there is no reason to sup-

conference championship meets, finished second to Indiana in the state meet and was well represented in major relay events.

pose that the president wants it hectoring or that administration forces in congress will aid the attempt. There is also little prospect that the insurgents, or progressives will join in baiting the commission.

Senator Harris, it may be recalled, supported Governor Al Smith, in 1928. Ever since, according to those who know him best, he has been seeking to atone. Anyway, he has been demanding absurd and outlandish sums for enforcement—which both enforcement officers and dry leaders announced they didn't want—and now he has declared war against the commission.

In the same class is Senator Sheppard of Texas, whose claim to fame is that he lent his name to the measure for the Eighteenth amendment. Later, with the election campaign staring him in the face, Sheppard has been beating the drum for a law to make liquor buyers equally guilty with bootleggers—another measure opposed by the organized dries but politically effective among dry voters.

Senator Glass of Virginia, also a dry Democrat who supported Smith, is in another category. He is still the principal political foe of the famous Bishop Cannon. But Glass wanted this presidential commission to concentrate its attention on prohibition, whereas the appropriation for it finally called for an investigation of other types of law violation and enforcement and now he claims that the commission has shunted prohibition aside. Glass, however, sharply disagreed with Harris when the latter howled for removal of Judge Paul J. McCormick, the member of the commission who suggested that there was such a thing as "governmental lawlessness" in prohibition enforcement.

The commission doesn't know

enough about prohibition and its enforcement to bring in an immediate report," an important dry official said to this writer. "We want its report to be totally uninfluenced, believe it or not. If the report is harmful to our cause we will see that it is filed and forgotten. Nothing will be done about it. But if they are going to do a job that is worth a hang it is going to take them a long time."

Few persons deny that this crime commission is probably the most able federal commission of its size ever appointed. There do not appear to be any fanatical wets or fanatical dries on its roster, a fact which has allowed the commission to go about its research in prohibition and other important phases of law enforcement in an orderly and thorough manner. Judge Kenyon of Iowa, a dry member, is said to have been especially in favor of making a job a prohibition show, but even Kenyon has been known to display judicial temperance on the bench in prohibition cases.

AN ENORMOUS JOB

The commission has been working only six months and naturally does not want to make any reports until it is ready. Whether that will be in six months or a year or two, nobody seems to know. It is investigating prohibition and other crime conditions which comprise the most extensive national scandal we have ever had to worry about and which has aroused so many snickers among other nations. Its members receive \$15 a day for such time as they are in Washington—a sum which means little or nothing to any of them.

Prohibition is the phase of its investigation which holds the greatest popular interest, but there are various other phases which are at least equally important in their totality. The Boston Herald, in an editorial,

POWER TRUST WAR GOES ON DESPITE FIGHT ON TARIFF

New Battle Can Be Expected in Near Future, Experts Think

BY RODNEY DUTCHER

Washington — The power war, featuring the big electricity companies constantly on the offensive, as they expand and entrench their industry and constantly on the defensive against a determined band of sharpshooters in Congress and outside goes on regardless of tariff bills, tax cuts and naval conferences.

Some heavy firing is anticipated during the Senate Interstate Commerce Committee's investigation of power and communications under the chairmanship of Senator Coud-

recently pointed out that "it is within their power to affect our American civilization so profoundly that the consequences will be felt for a hundred years to come."

It is not surprising that all sensible persons in Washington, if they are not primarily concerned with selfish political interests, are anxious to give the commission a chance.

ers of Michigan. In its early stages this investigation has concerned itself with radio and Owen D. Young and General Harbord of the Radio Corporation have appeared to agree a monopoly in our international communications. Eventually the committee will turn its attention to power and it has the opportunity to take up all phases of that issue. It has the desire of a sweeping investigation. Whether it is equipped by knowledge and personnel for any of effective work probably will be indicated by the way it deals with the "Radio Trust."

Meanwhile, the National Popular Government League, the most active and intelligent of the sharp-shooting groups opposed to the "Power Trust" is out with a summary of the situation with regard to "the more pressing phases of the power war."

Concerning Muscle Shoals it warns that the "Trust" no longer has opposition from any competing company seeking Muscle Shoals, whereas heretofore it has had to fight such interests as Henry Ford and the American Cyanamid Co. The power lobbyists and propagandists are now working for the Cyanamid bill and charges are cited that a secret deal has been made on Muscle Shoals, involving the Alabama Power Company and Cyanamid.

To meet the claim of companies that they want a Muscle Shoals lease solely to give the farmers cheap fertilizer, Senator Black of Alabama has introduced amend-

ments to the Muscle bill which would lease the Muscle Shoals plant to some private company for a dollar a year for fertilizer manufacture at a profit limited to eight per cent and require that the federal operating corporation shall sell any amount of power for that purpose to the company at low rates.

The league predicts that the Federal Trade Commission about to investigate power company finances, will disclose startling financial juggling and big sky operations. It refers to President Hoover's declaration against public ownership in his message to Congress and to his "cautions and vague" references to the desirability of some kind of federal control.

Secretary of the Interior, William C. Gaudin, is said to have tentatively allocated 25 per cent of the Boulder Dam power to the Southern California Edison Company, in spite of the demand for it from states and municipalities of California which have a preferential right under the Federal Power act. The league demands observation of the law.

The Flathead power site in Montana, with a capacity of 2,000 primary horsepower, is another "pressing phase" of the power war. The Rocky Mountain Power Company, subsidiary of Montana Power Company and Electric Bond & Share, is fighting for the Flathead. It is fighting for the Flathead against Walter H. Woodruff, Minneapolis capitalist.

The National Popular Government League joins with the Flathead Indians, who own the site, in insisting that the Wheeler bid is far the best from the standpoint of the Indians and the public interest. But Secretary F. B. Bonner of the Federal Power Commission is supposed to be determined that the "Power Trust" shall get the site and things don't look so good for Wheeler, although the result is in doubt.

Bonner is accused of distinct "power trust leanings" and it is pointed out that the man who recommended his appointment to Secretary Wilbur was Vice President Paul M. Downing of the Pacific Gas & Electric Company.

CACTUS PLANTS REDUCE AS THEY GROW OLDER

Des Moines — (AP)—If people were like cactus plants, they might reduce by merely growing older.

Chemical changes alone mark cactus plants older than the Declaration of Independence," J. H. Overton and H. A. Cockfield, of the University of Wisconsin, today told the Dutton Society of America, meeting with the American Association for the Advancement of Science.

"Young cacti are rich in fat," they said, "have little sugar, relatively large amounts of water, and are rich in mucilages. With age fat decreases, sugars increase, mucilage disappears and cells become richer with protein."

Old cacti have been found which retain their individuality for 200 years, they said, a rare occurrence in nature.

Insisting that the Wheeler bid is far the best from the standpoint of the Indians and the public interest. But Secretary F. B. Bonner of the Federal Power Commission is supposed to be determined that the "Power Trust" shall get the site and things don't look so good for Wheeler, although the result is in doubt.

Bonner is accused of distinct "power trust leanings" and it is pointed out that the man who recommended his appointment to Secretary Wilbur was Vice President Paul M. Downing of the Pacific Gas & Electric Company.

"Security of Principal and Stability of Income is to be found in High Grade Bonds."

Recent financial history has brought home once again the importance to investors of keeping a substantial part of their capital where the principal is safe and the income is assured."

Kaukauna News

STUDENTS START RETURN TRIPS TO SCHOOL, COLLEGE

Majority Will Resume Class Work Next Week in Universities

Kaukauna—Kaukauna youths, students in colleges, universities and academies, who have been visiting relatives during the Christmas recess, will leave the latter part of this week and early next week for resumption of classwork. There are a number of students from this city in college.

Most of those attending school are at the University of Wisconsin at Madison. Among them are: Northern, son of Mr. and Mrs. Frank Nole; James McFadden, son of Mr. and Mrs. James McFadden, Sr.; George Boyd, son of Dr. and Mrs. C. D. Boyd; Melvin Kullian, son of Mr. and Mrs. Henry Kullian; Clyde Bay, son of Mr. and Mrs. Edward Bay; George Lusk, son of Mrs. Otto Lusk; Abe Goldin, son of Mrs. A. Goldin; Jack Hiltgenberg, son of Mr. and Mrs. Frank Hiltgenberg; Howard Paschen, son of Mr. and Mrs. William Paschen; and Miss V. Vauvenhoven, daughter of Mr. and Mrs. Charles Vauvenhoven.

The four students of LaCrosse Normal school are Clifford Kemp, Leonard Macorrie, and Jack and Karl Farwell, sons of Mrs. J. Farwell. Miss Cleo Bayorzen, daughter of Mrs. A. Bayorzen, Miss Dorothy VanLichow, daughter of Mr. and Mrs. William VanLichow, and William Rohan, son of William Rohan, are from the Marquette University at Milwaukee.

Miss Coriell Runtie, daughter of Mr. and Mrs. Herman T. Runtie, will return to school at the National Kindergarten school at Evanston, Ill. Melvin Sager will soon return to the Illinois Military Academy at Evanston, Ill. He is the son of Mr. and Mrs. Albert Sager. Edward Ashe, son of Mr. and Mrs. William Ashe, is visiting here from school at Lake Forest, Ill. William and Andrew Ashe will soon resume studies at school at Oberlin. Edward Haessly, son of Mr. and Mrs. W. H. Haessly, will return to school at St. Francis Seminary at St. Francis. Dorothy Tate, daughter of Mr. and Mrs. A. Tate, will resume studies at the Northwestern University at Chicago.

REPORT SUBMITTED OF LOAN ASSOCIATION

Kaukauna—The semi-annual report of the financial condition of the Building and Loan association was submitted at a meeting Monday evening. Net earnings for the past six months showed a gain of \$1,397 over the earnings of the previous six months.

The net earnings for the previous six months totaled \$9,869, while the earnings up to Jan. 1, 1930, were \$11,226. Gross earnings amounted to \$15,275 and expenses were \$4,098. Assets of the association are \$475,481. The assets up to July 1 were \$455,122.

Started in 1887, the association has showed an increase each year. It is affiliated with the Farmers and Merchants Bank.

Social Items

Kaukauna—Installation of officers of the Women's Relief corps will take place at a meeting at Legion hall on Oak-st Friday evening. A covered dish party will be held.

The Social union of Brokaw Memorial Methodist Episcopal church will meet Thursday afternoon at Epworth home. Hostesses will be Mesdames James Black, J. Conway, Alex. Conkey, D. Jacobson, Walter Cooper, B. Treichel, L. C. Wolf and H. Schwinder.

The Women's Catholic Order of Foresters, court No. 56, will meet Monday evening at the church annex.

The male choir of the Trinity Evangelical Lutheran church will hold a rehearsal at the church Friday evening.

CONDUCT STUBS RITES THURSDAY AFTERNOON

Kaukauna—Funeral services for Oscar Carl Stubs, 19, son of Mr. and Mrs. August Stubs, formerly of this city, who died Monday morning at the home of his parents at Apple Creek, will be held at 1 o'clock Thursday afternoon. He died of infantile paralysis. The Rev. Paul E. Oshert, pastor of Trinity Lutheran church here, will be in charge.

CUTS FINGERS WHILE WORKING WITH SAW

Kaukauna—While working on his sawing machine Monday, Dutton O'Dell cut two fingers and a thumb on the saw. He will be unable to work for several weeks.

KAUKAUNA FIGHTER TO BOX IN PHILADELPHIA

Kaukauna—Phil Zwick, Kaukauna's first prize in the featherweight class, will perform in Philadelphia today. He will fight Carter Reed, a negro. He has met many of the top notchers in his class.

The Post-Crescent's representative at Kaukauna is Lloyd Denu. His telephone number is 194-W. Business with the Post-Crescent may be transacted through Mr. Denu.

GANITTER'S WARRIORS BEAT OSHKOSH FIVE

Kaukauna—Ganitter's Warriors travelled to Oshkosh Monday afternoon and defeated St. Mary's basketball team 32 to 19. The local players were reasonably good stars and easily outplayed the Oshkosh five. Macorrie starred for the locals. He was the main cog in the offense of the team. The local team included Macorrie, Hovde, Esler, Goldin, Boyd and McFadden.

Business In State Good, Says Kohler

Madison—(AP)—General Wisconsin business during 1929 has been in a healthy and reasonably active condition, Governor Walter J. Kohler, himself an industrialist, said today in connection with a forecast for 1930.

Indications of this healthy and active condition, he said, "are to be found in published reports of earnings and of plant extensions undertaken or contemplated."

"The general state of mind in Wisconsin regarding the economic situation appears to be one of sane confidence and this should be a helpful factor in making 1930 a good year."

Governor Kohler said there appears to be no unusual unemployment as compared with the same season in other years, and published expressions from industrial executives indicate that working forces will be generally maintained at a good level during the next few months.

"The decrease in speculation, with accompanying lower interest rates," he said, "should have a good effect upon building and industrial activity."

"Because of diversified farming, the emphasis upon dairying, the growth of cooperative effort, and other favorable factors, Wisconsin agriculture compares favorably with other parts of the country, and with the awakened interest in farm problems and particularly in marketing, further improvement should result."

Talks To Parents

THE MARGIN OF ERROR
By Alice Judson Peale

One of the most signal injustices in an unjust world is the fact that some parents are allowed a much wider margin of error than others in bringing up their children.

We all know those happy-go-lucky families in which the children "just grow," and on the whole do it pretty successfully. Michael's mother and father, for instance, pay very little attention to him although such times as they do give him is always jolly and companionable.

For the most part however the boy is given over to the care of the housekeeper, a simple, ignorant woman who radiates good health and good nature.

And with Michael thrives, possessing the major virtues of childhood—unconscious activity and good humor toward the world at large.

The same conditions would produce in another child the most serious behavior problems. When one examines the situation of such children as Michael one finds a rather unusual combination of factors at work.

They are, in the first place, rather tough skinned children whose temperamental endowment is the sort that, no matter what happens lands them right side up and smiling.

They are children who have better than average opportunities for play and companionship. They are, and this, I believe, is in some strange way even more important than the other two things, children whose parents are extremely happy in their relation to each other.

Parents whose children possess all these things have little to worry about.

New York—With holiday greetings Ray Barbuti, Olympic 400-meter champion, is receiving congratulations on being a Benedict, a fact which friends have just discovered. He was married last March to Miss Marion Sylvia Hicks, sister of Helen, the golfer.

BUYS FOUR COCKS FOR ADDITION TO PHEASANT FLOCK

Hopes to Hatch at Least 600 Eggs Next Spring and Summer

BY W. F. WINSEY

Medina—For use during the 1930 breeding season, E. W. Breyer, the local Ring Necked Chinese Pheasant fancier and breeder, reserved 12 of the best layers of his last year's flock and purchased four cocks that are beauties even for the choice breed. From these hens, Mr. Breyer expects to get at least 600 eggs next spring and summer. Among his hens he has one bird that laid 80 eggs last season the balance of his flock averaged 50 eggs.

Using chicks last year to hatch his pheasant eggs, he said that some of the young birds were infected with the lice and the game worm that is probably picked up from domestic chickens, lodges in the breathing system and produces gapes, a disease of high mortality among domestic chicks. Under this handicap, Mr. Breyer reared only 35 pheasants last year. Of the total reared, he liberated 18 pheasants as soon as they were self-sustaining. He is of the opinion that most of diseases of game birds is picked up on runways and farm chickens. As a result of his last year's experience he expects by more thorough treatment of chicks to control lice, and by renovating his pheasant coops to prevent gapes' infection.

His pheasant coop, approximately 100 feet and 20 feet wide is divided into a number of square compartments which are connected with runways. The compartments are equipped with blocks of cornstalks, piles of brush with runways underneath and other natural hiding places of pheasants in the fields. Besides small warm coops stand in each compartment. Lake turkeys and peacocks, however, the pheasants insist on being outside even during the coldest weather of days and nights.

Six weeks after being hatched a covey of pheasants if liberated is able to shift for itself. The birds, in the open, in summer feed upon slugs, worms, grasshoppers, crickets and all other kinds of insects. In fall and winter, their diet changes to weed seed, and grain that may be left in the fields, according to Mr. Breyer. When snow covers the fields and grain on the ground in the fields, however, pheasants are left in precarious condition, said Mr. Breyer, but if the birds in an emergency can find unhusked corn shocks in the fields near their home, they survive a severe winter very easily.

To protect coveys of pheasants, Mr. Breyer suggests that farmers set up shocks of cornstalks in their fields with open runways through them near the ground, that corn be scattered in the runways, and that ears be wedged in between the stalks. This plan is more serviceable than scattering corn on the ground, as feed placed in that way may soon be covered with snow and ice.

For several years past, Mr. Breyer has been liberating pheasants yearly in the vicinity of Medina, and farmers frequently report to him that they have a covey of pheasants in their yards or elsewhere on their farms.

DROP NAME FROM U. S. ROLL AFTER 137 YEARS

Philadelphia—(AP)—With the end of the year, the name Eckfeldt goes off Uncle Sam's Philadelphia mint payroll after being there for 137 years in a family service that continued under the administrations of 31 presidents.

The resignation of Jacob Bausch Eckfeldt, 85, as chief assayer of the Philadelphia mint becomes effective today. He has served 64 years in the institution, 48 years of which were in the position of chief assayer. His father served 43 years and his grandfather 48 years before him in official capacities in the same mint.

The last of the Eckfeldts in the Philadelphia mint will be succeeded by Chester W. Ziegler who has been Jacob Eckfeldt's assistant for 25 years. Eckfeldt has three sons who are engaged in scientific pursuits.

JUDGE IS AFRAID OF PRISONER—SMALLPOX

Springfield, Mo.—(AP)—Some real tough guys appear in municipal court here, but it remained for Everett Sellers to cause even the judge and bailiff to look for the exits.

Sellers was held in jail over night on a charge of stealing \$2. When he appeared at the door of the courtroom a large crowd of spectators backed away on mass. He had developed in his cell a virulent case of smallpox.

BUSINESS OUTLOOK IN STATE IN 1930 VIEWED FAVORABLY

Year Won't Be Record-breaking, but It Won't Be Dull Either

Madison—(AP)—In the light of known facts revealed in a study of industrial prospects recently completed by the Wisconsin Manufacturers' association here "a favorable outlook for a good year may be safely forecasted," George F. Kull, secretary-manager for the association today.

His statement for the Associated Press, taken in view of his recent summary, in preference to one individual statements from manufacturers over the state, was a compilation of his optimistic statement following the Hoover conference with business leaders and the review of questionnaires answered by nearly 300 Wisconsin manufacturers.

"Although conditions in Wisconsin and the nation do not warrant the prediction of a record-breaking year, neither do they warrant the belief that a protracted seige of slack times will result from the October collapse of the stock market," Mr. Kull said. He expects business to move along in normal channels when people realize more generally the market drop was not indicative of industrial instability.

"There will be employment for all who want work at wages comparable to the high standards of recent years. Business fundamentals have not been impaired. Industrial leaders have confidence in the future and will back their feeling of confidence with capital for expansion in line with needs of future business."

"The same spirit of sincerity and determination that permeated the conference of manufacturers with President Hoover in Washington is representative of the industrialists throughout the nation," Mr. Kull said. He attended the conference and presented a report on the industrial situation in Wisconsin. Briefly, this report revealed this information on Wisconsin manufacturing:

"Of the reporting plants, which represents some 75 per cent of the state's industrial production, 98 per cent replied that wages will not be reduced, 87 per cent replied that the present number of employees will be retained or increased, 74 per cent replied that present payrolls equalled or exceeded last year's payrolls for the same period, 69 per cent predicted business during the next year to be as good or better than the past six months, and 64 percent reported as many or more advance orders on file in comparison with last year."

"Temper this statement with the knowledge that at this time of year an annual slump of about 15 per cent may normally be expected," he said. "Take into consideration the unavoidable downward trend of declining industries typified by lumbering. And a gloom-dispelling picture of Wisconsin's industrial outlook is supported and sustained by comforting facts."

Clemenceau And Foch Lead 1929 Death Roll

BY CHARLES F. STACK
New York—Deaths, respect of class and creed, closed the careers during 1929 of an unusually large number of persons widely known for their leadership in their respective spheres or because of the high stations they occupied.

Among them were many whose achievements won for them fame throughout the world. The most noted figure to pass from the world stage were Georges Clemenceau and Marshal Ferdinand Foch. It was Clemenceau, the statesman who, as prime minister, led together all France for the final strike in the world war and made Foch commander of the French army. From that post the marshal advanced to command of the allied armies to finally achieve victory.

There was somewhat of a coincidence in the writing of "30" on the careers of two eminent journalists, Melville E. Stone, one of the organizers and for 25 years general manager of the Associated Press, and Thomas (Tay Fay) O'Connor, "father of the house of commons," Mr. Stone preceded his famous Irish contemporary in life by two months and in death by nine months.

CARDINAL DIES
Death among noted churchmen included Cardinal Gasquet, regarded as one of the most learned men in the world, and Cardinal Dubois, head of the Catholic church in France; The Rt. Rev. John Gardner Murray, presiding bishop of the Protestant Episcopal church in America, and Bishop Charles H. Brent of the Methodist Episcopal church. Another religious and social work leader who died, was General William Bramwell Booth, head of the Salvation Army.

The careers of 10 members of congress—three senators and eight representatives, were terminated by death. The senators were Francis E. Warren of Wyoming, the dean of the senate; Theodore E. Burton of Ohio and Lawrence D. Tyson of Tennessee. There also died during

LITTLE NOSEGAYS NICE, COQUETTISH

On Right Type of Neck, Effect is Pleasantly Feminine

BY AILEEN LAMONT
Copyright, 1929 By Cons. Press
New York—Those snappy little nosegays of artificial flowers placed exactly in the middle of the back of the coat collar are all very nice and coquettish, provided the neck they adorn is slender. But at the back of a plumpish neck, which is usually accompanied by plumpish shoulders, an ornament of this sort sticks out like a sore thumb. On the right type of neck, however, the nosegay is a pleasantly feminine tripper.

Ah, that Paris! For wear with the white sports coat always popular at southern resorts, Paris has thought up a white velvet sports hat. Sometimes these hats are modified forms of the beret of yesteryear. Sometimes they

frame the face snugly like a hood. Nothing could be more impractical, since velvet catches every flying atom of dust, but at the same time nothing could be more attractive. So there you are, aren't you

Many of the new wedding gowns are quite as slinky as the black and in frocks which lady vampires used to wear. The necks are high, the sleeves are long, the skirts touch the floor all round and trail in back. But the bodices are tight, and the skirts are moulded to the hips with a precision emphasized by a flare that starts at the back of the knee.

In London they are taking the 1930 styles very seriously indeed. Queen Victoria herself would recognize the latest phase of the womanly fashions for evening. This is the wearing of a large brooch or a velvet flower on the left wrist. Brooch or flower is held in place by a wide band of black velvet, with streamer ends, and the effect is really too ladylike for anything.

VARIETY

RADIO HELPED TO INCREASE SAFER FLYING IN 1929

Other Industries Also Have Benefitted Through Radio Development

BY ISRAEL KLEIN
Science Editor, NEA Service

While both broadcasting and radio reception advanced scientifically and commercially by a considerable margin in 1929, these were not the only fields in which radio has made its mark.

Aviation, for example, can thank radio for the marked increase in safety of flying and the reduction of delays in schedules. Railroads have adopted radio for communication between engineer and brakeman in the caboose of a long train, and for the entertainment of passengers.

The auto industry has adopted radio for its better automobiles. And police of various large cities have installed special equipment to hasten the apprehension of criminals.

In these fields, other than broadcasting, reception and television, perhaps the greatest good from radio has come to aviation. The radio range beacon system has been extended so that now it reaches from Omaha to New York, guiding pilots along a set course by the sound of dots and dashes, telling them of the weather conditions in the fields along the course and transmitting emergency messages to them when necessary—all on the same wavelength.

During 1930, the aeronautic branch of the U. S. Department of Commerce plans to extend this system over the whole length of the transcontinental route, and then branch out along the other important mail and passenger routes of the country. By 1932, it is hoped, the radio range system will be in operation on all air lines, covering practically every square mile of territory in the United States.

SHIP TO SHORE PHONE

Early in December, radio participated in one of the most important advancements in the science of communication that have been made in recent years—shore-to-ship telephony. This was done by means of new equipment on the Atlantic liner Leviathan, and inaugurated a system that will be available to all large liners soon. Thus a call can be made from any city in the United States to any liner so equipped, just as any local call is made. A schedule of toll charges has been set.

Radio's greatest improvement have come of course in reception and broadcasting. Its popularity is attested by the fact that total sales of receivers in 1929 exceeded those of 1928 by between 25 and 40 per cent. Broadcasters have spread their facilities over every conceivable field of entertainment, education and even news reporting, so that hardly another conceivable field is missing within its scope.

HALF WORLD'S SETS IN U. S.
According to the statistical equipment division of the U. S. Department of Commerce, there are today some 10,250,000 receivers in United States homes, slightly less than half the number in the whole world. Of these only 4,400,000 are of the AC type, so that manufacturers expect to have a better year in 1930 in the replacement of new type receivers for the battery-operated millions still in use.

Scientifically, radio receivers have reached the point almost of standardization, leaving future changes in the way of refinements of detail rather than radical improvements. Last year saw the general adoption of such important developments as the screen grid tube, the band pass filter, micro-synchronous reception, remote tuning, visual tuning as opposed to aural, automatic volume control, automatic tuning and silent knob tuning.

REFINEMENTS NEXT

Above all, 1929 has seen a marked improvement of tone quality and fidelity of reproduction, mostly through the aid of these gadgets. Loud speakers, of course, have also been improved, so that now an orchestra sounds more itself than it ever did in the history of radio.

Next year's contribution to radio will be more in the line of refinements. There is not much more of a change to be made in the hookups of receivers, nor in the dynamic speakers. But new radio-phonograph combinations, and radio cabinets of more varied design will furnish a greater choice of more pleasing instruments.

BROADCAST ART LEAPS AHEAD

In broadcasting greater developments have been made in the art than in the science last year, and this tendency is expected to go on through 1930. While broadcasting equipment has been made for transmission of programs on as high as 500,000 watts power and several stations have increased their power to 50,000 watts, this has been done in conjunction with more artistic presentations.

Schools of the air have increased so that the entire country is blanketed almost daily with educational talks from important sources. Great musical leaders, like Damrosch, Stokowski and others, have given their time and training to radio, instilling a greater appreciation of music in the general public.

Programs from Europe have been rebroadcast in this country and similar important programs originating here have been sent to Europe for rebroadcasting. A wider field has been covered in reporting by radio, including not only sports events, but every major occurrence in the year's history.

RECORDS BROADCAST GROWS

One of the innovations in broadcasting in 1929 has been the adoption of the method of electrical transcription of broadcast programs for dissemination among the various stations, in lieu of chain broadcasting.

There are now less than 600 broadcasting stations in the United States, a slight reduction from the number of 1928, which it is expected will spend over \$12,000,000 in 1930 for program features. According to an analysis of 349 stations made by the Federal Radio Commission, slightly less than half of them have made money from their broadcasting ac-

LIFE'S ODDITIES

By George Clark

"First time I ever noticed how much she's showing her age."

activities in 1929, and these may be increased in 1930.

Canada now has 81 broadcasters of which 12 belong to the Canadian National Railways, 15 to radio dealers, 13 to newspapers and the rest are divided in smaller numbers among other industries. Power in Canada has not increased, the average power per station being 500 watts, while power among stations in the United States has increased on the average.

TELEVISION ADVANCES SLOWLY

Several broadcasters have taken to television, although this science is still in the early experimental stage and cannot be expected to become practical for some time to come. The cumbersome scanning disk may be superseded by the photoelectric cell, which would make television more easy to handle in transmission and reception and increase its availability to all.

Despite the incomplete state in which this science stands, engineers of the Bell Telephone laboratories in New York have already demonstrated television in colors, a taste of what we may expect in a few years.

All this, and more, comes under the eye of the Federal Radio Commission, a much over-worked and politically maligned body, the members of which have been trying to bring order out of the chaos of previous years. They have succeeded somewhat, and have a better chance of accomplishing some good with the latest action by congress of extending its life indefinitely.

SUCCESSFUL YEAR IS SEEN BY EQUITY

More Farmers Believed Willing to Join Organization

MILWAUKEE—(AP)—George A. Nelson, president of the Wisconsin state union, American Society of Equity, believes farmers are becoming more willing to join the organization pledged to aid them and, by joining, are increasing their ability to increase their own prosperity. He outlined the Equity 1930 program for the Associated Press in response to a request for a statement concerning the passing and forthcoming years. Concerning the year 1929, he said, "We just closed a very suc-

cessful year. The membership was increased 23 per cent. The finances are in the best condition."

At its recent state convention in Portage, attended by nearly two thousand delegates and farmer-members, Equity decided on a program urging the sale of farm products through the cooperatives.

"That all cooperative livestock shipping associations should sell their stock through a cooperative livestock sales association; and that all cooperatively manufactured cheese should be sold through the National Cheese Producers' Federation, and box butter sold through the National Butter Marketing organization; and milk pooled through the Pure Milk association."

"The farmer should buy his raw materials at wholesale rather than at retail," the convention decided.

The Equity also decided its effort would be lent:

"To federate all the warehouse and livestock shipping associations"

FAMOUS THEATRE IN LONDON TO BE RAZED

LONDON—(AP)—London's "Old Vic," famous as the theater that staged all of Shakespeare's plays without going bankrupt, is soon to be torn down to make room for a railroad station. The London county council needed the site in connection with the new Charing Cross bridge and station.

For years the old playhouse has

"To increase the activities of the feed pool and the Equity Wool pool to favor elimination of personal property tax, increase in the income tax, increased gas tax, and a repeal on state basis, taxes on cosmetics, cigarettes and motion picture shows."

"To oppose chain banking, real estate stand for cooperative banking and rural credit associations."

been threatened from one quarter or another. Six years ago it was saved when the late Lord Oxford and the Archbishop of Canterbury interceded for it, and on another occasion Sir George Dance rescued it by providing \$150,000 for necessary repairs.

But for Miss Lillian Baylis the old house probably never would have been heard of outside of London. She took it over in 1895 and made it a home of Shakespearean drama. In 1914 she drew an audience of 10,000 from the other theater managers of London by announcing her intention to produce Shakespeare's plays.

But she continued her efforts to preserve the old theater, and in the war and thereafter. Every play of the Bard of Avon has had its opportunity to charm the world, and London's old theater has been honored by the city for this achievement.

Among the stricter Egyptians women are not allowed to go to moving picture shows, the film audiences in Cairo being composed of men, with occasionally a few European women.

Forced To Eat, Woman Gains 15 Pounds

"I just had to force myself to eat. Then I took Vinol. I soon had a wonderful appetite and gained 15 pounds." — Mrs. F. Miller.

Vinol is a delicious compound of red liver, peptone, iron, etc. Nervous, weak, tired, anemic people are surprised how Vinol gives new pep, sound sleep and a BIG appetite. The very FIRST bottle often adds several pounds weight to thin children and adults. Tastes delicious. Schlimm Bros. Co. Drugs. adv.

Gibson helps to make your NEW YEAR

happy and prosperous

Keeping your car running smoother, easier and safer — what a lot that is going to mean in 1930!

— and Gibson Service, offered at four big service stations in the Fox River Valley will contribute wonderfully to this happy condition.

1. Gibsons bring you Goodyear Tires and Tubes — which will give you exceptional mileage — freedom from distressing and dangerous mishaps — the sense of well-being that goes with riding in a car whose equipment is absolutely dependable.

2. Gibsons bring you Willard Batteries — which insure you plenty of electrical power, even in coldest weather. We can show you the exact size and type of battery that YOUR car needs for proper performance.

3. Gibsons bring you these at the lowest possible prices for such quality.

But Gibson Service goes farther. Air and tire inspection free of charge; tire changes when you need them, free parking at our stations, regular battery checkups and 8-hour battery charging. We help you get the utmost possible use out of both tires and batteries.

Real helps, these — Use them as the New Year begins, and keep on using them through all the days and months of 1930.

Moscow.—When the attendance at a local theater ran low, the management, in an ad saying we would give a sum of money to a foreigner and that anyone dissatisfied with it would receive a sum equal to ten times the admission price. The theater was packed on the night, and after everything quieted, the orchestra and chorus struck up the "International" communist hymn. Not a kick was received.

Neenah And Menasha News

RED CROSS CARRIES ON WORK DURING ENTIRE 12 MONTHS

War Veterans Helped to Fill Out Bonus Applications

Menasha—While the general public has been fully advised of Red Cross membership for the last several weeks, it may not be familiar with the work of the chapter that continues throughout the year. The last several weeks the local chapter has experienced as busy a season as ever in its history. In addition to the additional demands for service and activities during the Thanksgiving and Christmas seasons, many types of an emergency nature have been met.

Outstanding among services pertaining to war veterans have been the last minute bonus applications which were required to be in Washington on Jan. 2. The last several applications filed on Dec. 29 were sent by air mail in order to assure their being in the government department on that date. On Dec. 29 four dependent parents applications were completed for the adjusted compensation and will result in a benefit of hundreds of dollars to each dependent.

The contracts in each of these cases were made by the Red Cross executive secretary, Miss Edna Robertson, who advised them of their privileges and advised their making application for this benefit due to them. In each of these cases proof of date of birth was difficult to procure owing to birth records not having been kept 60 or more years ago.

Other types of war service are called for daily as well as varied service to civilian families of a general social service nature. Twenty-four hour service is assured by the local chapter, for while the executive secretary is engaged in other part time work, appointments are made during the day and evening for interviews or home calls.

NEW PAPER MILL IS NEARING COMPLETION

Menasha—With two weeks more of favorable weather the indications are the new building of the Marathon Paper Company will be inclosed. The walls are nearing completion and a large portion of the glass frame work on the south side of the building is in position. The company is employing all the workmen it can use to advantage.

HEAR MOTIONS IN SUIT FOR DAMAGES

Menasha—In disposing of motions after verdict in the cases of L. C. Phillips versus Wesley Saecker and Lee Royer versus both Phillips and Saecker Circuit Judge Beglinger of Oshkosh indicated Tuesday he will grant judgment which would permit Royer to obtain the \$11,518.23 fixed by jury verdict.

Royer, an occupant of the Saecker car when that machine and one driven by Phillips were involved in a collision on highway 41 north of Menasha, Feb. 24, sustained permanent injuries. He brought suit against both defendants.

FOWKES IS SPEAKER AT KIWANIS MEETING

Menasha—Menasha Kiwanis club held its final luncheon of the year Tuesday at Memorial building. The speaker was the Rev. A. Gordon Fowkes, rector of St. Thomas church, who discussed Kiwanis ideals. Among the subjects emphasized was the regulation of traffic and the safety campaigns carried on by members for the protection of children.

3 SLIGHTLY HURT AS AUTOMOBILE OVERTURNS

Menasha—Mr. and Mrs. George A. Bublitz and the former's mother, were slightly injured when their automobile skidded and overturned near Theresa, Dodge Co., Monday night. The automobile was badly damaged. The party was returning from Hartford.

K. OF C. TO ENTER STATE TOURNAMENT

Menasha—Members of the Knights of Columbus bowling league will make arrangements for attending the state tournament at Appleton at a meeting of Niolet Council Thursday evening at the Knights of Columbus clubrooms. The league is composed of 18 teams and it is possible that more than that number will take part in the tournament.

POSTPONE MEETING

Menasha—On account of Wednesday, their regular meeting day, being New Year's, Menasha Rotary club postponed its luncheon at Hotel Menasha until Thursday noon. It is possible that a speaker will be dispensed with.

LOSES FINGER

Menasha—Oscar Grader, submitted to the amputation of a finger of his right hand at St. Elizabeth hospital at Appleton Monday. The operation was made necessary owing to infection caused by a silver.

RED CROSS MEMBERS

Menasha—Additional Red Cross memberships are the Rev. George A. Clifford, contributing membership, and Charles Beck, Mrs. C. A. Hendricks and Arley Moran, annual memberships.

SLIGHTLY MIXED

Having considerable trouble with his three lodgers, an Irishman decided to oust them in the morning.

"You three are a nice pair!" he said. "If you're going to stop here you'll have to clear out, for you didn't come home again last night, until this morning!"—Tit-Bits.

SOCIAL ITEMS AT MENASHA

Menasha—The Mystic Workers will hold a meeting Wednesday evening at Memorial building. The greater part of the session will be occupied with routine business.

DEBATE TEAMS WILL PREPARE FOR TOURNEY

Neenah—High school debate teams in the district conference tournament soon will begin work on the state tournament which will start sometime in February. In the district events, the Neenah teams have won three out of four debates, the affirmatives winning two and the negatives one. The managers of both teams have decided not to continue through the finals, however.

The first rounds of the state events must be held before Feb. 15, and the finals before Feb. 15. The state contest will be held at the state capitol building at Madison early in March. Much work will be necessary in this contest. The question to be debated will be "Resolved, That the installment buying plan as practiced at present in the United States is both economically and socially desired."

NEENAH SOCIETY

Neenah—Susan Beals, James Kimberly, John Strange, Dorothy Brown, Gordon Brown, Marjorie Sande, John Hewitt, Jeanette Gillingham and Richard Jensen attended a holiday party Monday evening at the Oshkosh Century club given by 23 of the younger society set of that city. Several charming dinner parties were given before the dancing.

Evangelical church Ladies' Aid society will meet Thursday afternoon with Mrs. William Miller at her home on Bond-st. This will be the annual business session.

Mr. and Mrs. Joseph Muench entertained a group of people Tuesday evening at their home on E. Frank-lin-ave. A dinner was served after which the evening was spent in playing cards.

SCHOOL INSPECTION IS VERY SATISFACTORY

Neenah—The recent inspection of the new senior high school, made by J. D. Giles of the department of public instruction, proved very satisfactory. According to a report received Tuesday at the high school, much praise was given of the new building and its equipment, its grade of instruction and the excellent results being obtained. The building was classed as second to none in the state. Each department in the school was outlined as first class.

17 CAGERS SELECTED FOR JUNIOR LINEUP

Neenah—Seventeen basketball players have been selected by Coach Bredendick for second squad at the high school, and will start practice for a series of games. A squad will be chosen by the coach within the next few days. The opening game will be Friday evening in a curtain raiser. The second squad is composed of W. Jensen, Belsenstein, Ozanne, Koerwitz, Kuehl, Toeppler, Dingle, Thomack, Wilbur Jensen, Madsen Burnside, Bylow, Gaertner, Ruesch, Metternick, Staffeld and H. Neubauer.

CHRISTMAS CANTATA PRESENTED BY CHOIR

Neenah—"The Herald Angel," a Christmas cantata, which was presented on Christmas evening by the choir of St. Paul English Lutheran church, was repeated Tuesday evening before a large audience. The soloists were Mrs. E. C. Fritz, Mrs. Walter Bredendick, Mrs. M. Hough, Fred Reichel, the Rev. E. C. Fritz and Walter Bredendick, who were assisted by the choir and the male chorus. Miss Ruth Mary was the organ accompanist and Mrs. Reinhold Matheson assisted at the piano.

3 CONTAGIOUS CASES IN CITY AS YEAR ENDS

Neenah—The old year passed out here with but three cases of contagious diseases, according to Dr. M. N. Fitz, city physician. There were two cases of diphtheria and one case of scarlet fever, none of which are serious. Throat examinations by the city physician, told the disease in check.

PROSECUTOR LAUNCHES WAR TO PREVENT VICE

Sheboygan—An avowed intention of cleaning the county of gambling devices and inmates of disorderly houses was announced by District Attorney Herman C. Ruzick here in asking for the aid of several deputy sheriffs.

Announcement followed a raid on four roadhouses near here in which as many women were arrested. The women filed affidavits of prejudice when arraigned before Justice Tompkins and their cases were transferred to Justice Goodell's court.

TUNE IN ON STATION KWKE, Shevropert, La. (850 Kilo.) Henderson is on the air each night from 9 o'clock to midnight, except Tues. and Thurs., when he broadcasts from 6 to 9 P. M.

INTEREST IN BOND MARKET IS ALMOST LOST FOR 11 MONTHS

Public Finally Begins to Take Cautious, Inquiring Notice

BY CHARLES F. SPEARE
Copyright, 1930, by the Post-Crescent
New York—The one self-evident fact in the history of investment markets of 1929 is that the general public almost completely divorced itself from bonds during eleven months of the year and took a cautious but inquiring interest in them in the month of December.

The present problem of houses of issue and of dealers in bonds has to do with the probable extent to which this public may be influenced by its unfortunate experiences in stocks and by the comparative ease in money rates to renew its purchases of investment securities.

The evidence at the end of the year is that while certain groups of bonds will have broader and stronger markets, the list as a whole still faces competition with junior securities and that in order to popularize new issues, there must be given more than an attractive rate of return. In other words, the convertible bond has a permanent place in corporate financial structures from which it will not soon be dislodged.

OCTOBER RALLY NIPPED

A graph of bond prices from January to October shows a fairly steady decline which covered an average of between 6 1/2 and 7 points for domestic issues and was accompanied by a decline of the second half of 1929. Within this period the composite bond list touched a level lower than it had been since the end of 1925. Early in October the market began to exhibit strength and to reflect some transfer of funds from the stock market and also purchases by institutions whose portfolio of corporations mortgages had been allowed to run down while it was expanding in the direction of real estate mortgages. Within three weeks a rally of several points occurred and it began to look as though there had been a definite bond revival.

Then came the first of the severe October breaks in stocks. This immediately changed the entire aspect of the investment market. Prices dropped as quickly as they had risen. Between the 23rd of October and the end of the month the domestic average fell more than 3 points. It continued to decline for another two weeks, and on November 14, the day the stock panic culminated, reached a new low average for the year.

To complete the story it must be stated that as stocks rose in the second half of November and in December, bonds regained their losses and by the middle of this month stood at an average 3 1/2 points higher than in November and only 3 points under the January figure.

LOWER GRADE ISSUE VOLATILE

Foreign bonds as a whole covered a narrower price range during the year than did domestic issues, with the exception of a limited group of South and Central American descriptions along with a score or more of German and southeastern European obligations. While the range on domestic bonds was between 6 1/2 and 7 points that of foreign was only 2 1/2 points, with the latter in December approximating the high for the year made in February.

However, the year in dollar bonds will be remembered more by what happened to the second and third grade credits than by the comparative stability of the first grade bonds, for in no group of securities, aside from speculative stocks, were the fluctuations wider or the markets thinner than in the latest south and Central American credits, which sold from 15 to 45 points below their issue prices and at one time were off an average of over 20 points from the subscription level.

THE UNPOPULARITY OF BONDS DURING 1929 HAD NOTHING TO DO WITH THEIR INTRINSIC VALUE, THOUGH IT DID RELATE TO SOME EXTENT TO WHAT WAS CONSIDERED BY THE PUBLIC AS UNATTRACTIVE YIELDS. PRIMARILY, IT REFLECTED A SPIRIT OF SPECULATION AND THE UNIVERSAL DEMAND FOR PARTNERSHIP IN AMERICAN CORPORATIONS. AGAIN, THERE WAS THE COMPETITIVE ELEMENT BETWEEN BONDS AND MONEY RATES, WHICH CONTINUED FROM JANUARY UNTIL THE REDUCTION TOOK PLACE IN THE FEDERAL RESERVE DISCOUNT RATES AND IN ALL FORMS OF MONEY ACCOMMODATIONS AFTER STOCKS HAD BEEN LIQUIDATED AND BROKERS' LOANS HAD BEEN REDUCED 50 PER CENT. NORMAL BUYERS OF BONDS SOLD THEM AND EITHER BOUGHT STOCKS WITH THE PROCEEDS OR PLACED THEIR FUNDS IN CALL MONEY, WHERE EARNINGS FOR LONG PERIODS WERE NEARLY TWICE AS HIGH AS ON MORTGAGE OR DEBENTURE ISSUES THAT DID NOT CARRY THE CONVERTIBLE FEATURE.

SELLING BREAKS PRICES

In the final break in bonds it was involuntary rather than voluntary liquidation that forced prices to their lowest level, as when institutions and individuals were compelled to sell mortgages in order to protect stock commitments or to make loans on insurance policies.

Along with this there was a certain amount of liquidation by those who had been out of the stock market for the past year or two but who entered it when panicky conditions developed, and at that time provided themselves with funds to participate in "equities" through the sale of railroad and public utility mortgages.

THE DISTINCTIVE FEATURE OF THE 1929 BOND MARKET WAS THE EXCESS OF NEW ISSUE IN THE FIRST HALF OF THE YEAR, RESULTING IN A CONGESTION THAT WAS NOT RELIEVED FOR ANOTHER SIX OR NINE MONTHS. AGAINST THIS WAS THE SUBNORMAL CONDITION OF THE MARKET IN NEW OFFERINGS DURING THE WHOLE OF 1929, BOTH FOR DOMESTIC AND FOREIGN ACCOUNT, BUT THE GREATEST EXPANSION IN STOCK FINANCING EVER WITNESSED. THE CONTRAST BETWEEN THE FLUTUATION OF THE

EUROPE ADJUSTS MONEY RATES TO NEW CONDITIONS

National Bank of Belgium Reduces Figure from 4 1/2 to 3 1/2 Per Cent

BY CHARLES F. SPEARE
Copyright, 1929, by Cons. Press
Wall Street, New York—(AP)—Financial Review & Outlook—The process of adjusting European money rates to the improvement in credit conditions abroad, following stock market liquidation and credit deflation in this country, is going on rapidly, with the national bank of Belgium reducing its rediscount figure from 4 1/2 per cent to 3 1/2 per cent. This decline of a full 1 per cent is unusual and reflects the pronounced improvement that has taken place in foreign money conditions in recent weeks.

Last week all of the Scandinavian banks announced reductions in their rediscount rates. That of the Bank of Sweden does not become effective, however, until Feb. 1. There is a possibility that by that time the bank of England rate may be lowered again and settle down for a considerable time at 4 1/2 per cent.

SEE MORE OFFERINGS

The effect of this was to congest the market for new stocks in the last quarter of 1929 as badly as it had been congested in bonds in the first half of 1929. For a while, at least, corporations are most likely to be influenced in their financing policies by the cleared up conditions of the bond market and the advantages that are offered by the prevailing low interest rates. So we may expect to see in the early part of 1930 a greater flow of bond issue and a reversal in the proportions of bond to stock financing. It is yet too early to indicate whether corporations will resort to note issue or to long maturities. This will depend somewhat on their general credit.

There are already negotiations under way for refunding some of the public utility refunding schemes that were abandoned in the spring of 1929, when the bond market first began to sag under its own weight, and in response to the policy of higher Federal Reserve discount rates that was then being initiated.

Perhaps the most accurate picture that might be drawn from the relation between money rates and bond prices during 1929 would deal with the fluctuations in United States Government securities, in municipal issues and in railroad equipment trust certificates. None of these was much affected by the stock market liquidation or by over-supply. All, however, were unsettled during the greater part of the year by high interest rates and equally favored by the radical change that occurred in the money market between the middle of November and the end of December.

The period was an embarrassing one for the Treasury Department, which was compelled to pay successively higher rates at the end of each month, and once to go above the Federal Reserve rediscount rate in establishing a coupon that would attract the banks and other buyers of this type of notes. Between November 1927 and June of this year the rate on certificates of indebtedness advanced from 3 1/8 per cent to 5 1/8 per cent, which meant that certificates were being redeemed at a rate materially above that on notes, falling due. In one instance they were quoted since 1929, 100 of this, most of the new issues sold at a discount from par and along with them went the prices of the remaining U. S. Liberty bonds and Federal Land Bank issues.

MONEY EASE AIDS TREASURY

Government financing has been greatly simplified by the relaxation in interest rates, which has permitted the Treasury Department to return to 3 1/8 per cent rate of two years ago, though the emissions are not parallel, as now interest on government paper is tax exempt in contrast to its taxable status in 1927. In the last few weeks the highest prices of the year have been established on all government papers though corporation bonds are still well below the high price average of last January, and success has attended the first attempt of the Treasury to gather in funds through the medium of the discounted bill.

APPROXIMATELY THE SAME SITUATION DEVELOPED IN THE MARKET FOR TAX EXEMPT MUNICIPALS AS IN GOVERNMENTS. FROM THE VERY LOW BASIS OF YIELD OF 1928 THE MARKET EXPERIENCED A DEPRESSION THAT WAS NEARLY AS GREAT AS IN THE PERIOD JUST AFTER THE WAR. THIS COMPELLED CITIES LIKE NEW YORK AND CHICAGO TO SELL THEIR REVENUE WARRANTS OR SHORT TERM NOTES ON A 6 PER CENT BASIS AND CLOSED THE DOOR TO ALL LONG TERM FINANCING AT A FIGURE THAT MUNICIPALITIES WERE WILLING TO CONSIDER. HERE AGAIN THERE HAS BEEN AN ABRUPT CHANGE, WITH MUNICIPAL BORROWERS OBTAINING GOOD TERMS AND LONG MATURITIES REPLACING SHORT ONES. WITH THE PROGRAM OF MUNICIPAL AND GOVERNMENT CONSTRUCTION THAT WAS OUTLINED IN WASHINGTON, IT IS EASY TO SEE THAT THE MUNICIPAL MARKET WILL RECOVER ITS PLACE IN THE INVESTMENT WORLD NEXT YEAR.

IN NO PART OF THE MARKETS WAS THERE LESS CONGESTION THAN IN THAT FOR RAILROAD EQUIPMENT CERTIFICATES. FOR THE CARRIERS HAD NOT BEEN BUYING TO ANY EXTENT FOR SEVERAL YEARS AND COMPARATIVELY FEW OLD BONDS CAME INTO THE MARKET DURING THE LIQUIDATION STAGES OF 1929. BUT COMPETITION WITH MONEY RATES REQUIRED AN ADJUSTMENT HERE AS ELSEWHERE AND IT WAS FOUND NECESSARY TO GIVE THE BUYER OF NEW RAILROAD NOTES A RETURN FOR ONE YEAR MATURITIES OF FROM 2 1/2 TO 3 1/4 AND 3 1/2 PER CENT FOR LONG DATED CERTIFICATES. THE REDUCTION IN INTEREST RATES HAS REVISED THE PICTURE OF THIS DEPARTMENT OF THE MARKET AND THE LATEST OFFERINGS HAVE BEEN UNDER 5 PER CENT ON ALL MATURITIES.

INSTITUTION BUYING REDUCED

In bulk, the insurance companies, savings banks and commercial banks absorb the highest percentage of all bonds available to the investment market. The immediate future of the bond market is linked up closely with them and it is handicapped considerably by the reduced buying power of these institutions due to emergency measures during the height of the stock speculation and in the aftermath of its collapse. So far as an account, but the greatest expansion in stock financing ever witnessed. The contrast between the fluctuation of the

The gold exports now being made on a liberal scale to Europe play an important part in the policy of the continental banks in reducing their rediscount rates. As this movement is expected to expand and to reach quite substantial proportions, the advantages of it should spread through other countries than those already responsive to it.

The highest rates in Europe today are those of 7 1/2 per cent in Austria and 7 per cent in Germany and Italy. Information from Berlin this week is to the effect that the Reichs bank will probably cut its rate to 6 1/2 per cent early next year and that similar action will be taken by the bank of Italy in the spring if not before the end of winter.

The bank of France is now in a position where it can reduce its rate to 3 per cent from 3 1/2 per cent. This would be good policy in view of the definite program of the government in building up its position as a premier international money market. The action just taken by France in reducing the stamp tax on foreign securities from 4 to 2 per cent is a step in this direction and one that should be followed soon by an expansion in the flotation by French bankers of foreign loans.

on call subsequent to August 1. Banks had been conspicuous lenders up to that time but the requirements of their customers for loans on collateral had compelled them to draw down such loans. They are today still unable to take much part in the bond market on account of collateral obligations. It is well known that savings banks and mortgage companies and, equally, life insurance companies, were called upon to make enormous advances to depositors and policy holders when stocks were breaking and that it will require some months for them to build up their reserves to the point where they can again buy bonds freely.

Judging from evidence in every quarter, the small investor who had not been in stocks prior to November brought up to his limit when they reached what he regarded as bargain figures. Consequently, he will not be in funds to any extent for bond purchases for some time. Then there is the permanent competition between common stocks and bonds which has changed the entire aspect of the investment business.

In view of these facts we may expect to see in 1930 a response in bond prices to more favorable money conditions and to limited supplies, but an absence of the broad demand for them which distinguished the latter half of 1927 and the first half of 1928. Also is there probable a continuation of the compromise between a debtor and a creditor status demanded today by investors and recognized in the form of the convertible debenture.

THREE OUTSTANDING ACHIEVEMENTS MARK PROGRESS IN 1929

Einstein's Theory; Bryd's Flight; and Graf Zeppelin Mentioned

BY ISRAEL KLEIN
Science Editor, NEA Service

When history is told 100 years hence, 1929 will be remembered for three outstanding developments in the progress of science and civilization:

1. The revolutionary theory of Prof. Albert Einstein—already famous for his theory of relativity—that gravity, electricity and magnetism are so closely related that they may be one and the same force.
2. The first airplane flight over the South Pole and the important geological and other discoveries made in the Antarctic by Commander Richard E. Byrd.
3. The first round-the-world flight by a dirigible, the Graf Zeppelin, which may be the forerunner of great passenger airships plying the skies between nations.

There were many other achievements, including the development of an airplane that went aloft with 169 passengers, but these are the most interesting and probably the most important.

Einstein's contributions to science, a matter of cold mathematics, is considered by scientists as equal in importance to Newton's law of gravitation. If what Einstein theorizes is found true, he has solved the greatest mystery in physics—gravitation—and isolated a way toward coping with gravitation by means of electricity.

At least, Einstein's newest theory has reduced all physical forces—electric, magnetic and gravitational—to the same origin and resolved all known physical laws into one universal law.

The historic flight of Commander Byrd is only the expression of a long series of aeronautical inventions and improvements. In a three-engine, all-metal airplane, equipped with the latest types of flying instruments, a compact radio transmitter and a long range aerial camera, Byrd and three companions flew 10,000 miles, climbed over 10,000 feet peaks, without a stop in 28 hours.

Yet had Byrd waited another year he would have been able to carry with him even more advanced instruments. These instruments are some of the products of aviation in 1929.

One of these is an electrical altimeter, or echo altimeter, which tells not only how high the ship is flying, but also the speed of the air.

These and other safety instruments proved their worth in a "blind flight" test made recently by Lieutenant pilot exactly how high he is from the ground immediately below him rather than the ground from which he started. Another is an "automatic pilot," which keeps the ship in a stable and balanced position when the human pilot, blinded by fog, may do little of the U. S. Army. Sitting in a heavy curtained cabin Doolittle flew up and around the field, guided only by the instruments in front of him and the automatic pilot behind, and landed safely and easily. It was the first successful effort to combat aviation's greatest enemy—fog.

To make flying safer, the U. S. Department of Commerce has extended its radio range beacon system from Omaha to New York. This system, coupled with half-hourly weather broadcasting, soon will be extended to cover the United States.

With the radio beacon, pilots may guide their ships along a definite route by the sounds of an automatic signal and by the reports from the stations between which they are flying.

Other safety measures have also been begun.

Aviation in 1929 also produced the giant Do-X passenger airplane of Dr. Claude Dornier, which carried 499 persons in a test flight; the 5,000,000 cubic foot dirigibles R-100 and R-101 of England, and the Graf Zeppelin of Germany which completed a round-the-world flight in 21 days, the rocket plane of Fritz Opel, the navy's all-metal-clad dirigible ZMC-2, and the 30 passenger Pullman transport planes of Boeing and Fokker.

Of great significance in aviation are the application of the Diesel motor and the use of ethylene glycol in the cooling of aircraft engines. A Diesel motorized plane, fueled with crude oil, flew from Detroit to Wash-

ington at a much lower cost than any gasoline plane.

With the aid of an airplane, also, the science of archeology made its greatest discovery of the year—two ancient settlements, one of the Mayas in Yucatan, and the other of the Pueblos in southwestern United States. Incidentally it was Colonel Charles A. Lindbergh who made these discoveries.

Further explorations, this time over the Arctic, are being planned for 1929 with the use of the dirigible Graf Zeppelin.

Airplanes also participated in the development of land-to-plane and plane-to-plane communication by telephone and wireless—a system that will go into use soon on the Chicago to San Francisco route of the Boeing Transport System.

The climax in 1929's part in communication came early in December when the captain of the Leviathan was called by phone in mid-Atlantic just as you would call your home. Contact was made by land wire and radio.

Radio made its mark in 1929 with more general use of international broadcast programs, with the production of better, though cheaper, receivers and with the advancement of television to the point of reproducing actual scenes in color.

The greatest achievement of 1929 in the field of medicine and physiology was the invention of a device which reveals the presence of tuberculosis in a person within three or four days of infection and the production of pure tuberculin, used in detecting the disease.

Of great interest is the reported discovery and isolation of the influenza germ by Dr. Isadore S. Falk of the University of Chicago. A vaccine prepared from the dead influenza microbes may greatly reduce the ravages of this disease.

After many years of experimentation, famous physiologists announced such hopeful discoveries for the benefit of humanity as: that carbon dioxide injected into the collapsing lungs of a pneumonia victim may stimulate deep breathing and so expand the lung again; that a gland substance called "thyro-rexin" has prolonged life in certain test animals; that another gland substance, a "hormone" or "masculine principle," gives promise of rejuvenation; that a new mixture of chemicals for the treatment of cancer permits the cancer cells to "burn themselves up" and has been effective in test animals, though as yet untried in humans; that a new and more pleasant anesthetic, called cyclopropane, has been tried successfully and that a synthetic milk for babies can be made from certain vegetables.

Other notable achievements of the year were: Successful observation of the eclipse of the sun, on May 9, by five groups of scientists at the Philippines, Sumatra and other Pacific spots.

Addition to his original cosmic ray theory by Prof. Robert A. Millikan to the effect that these tiniest of rays coming out of the cold upper spaces may be the solution to the mystery of creation.

Testing of a mechanical lung for escape of men from a submerged submarine.

Passage of the new giant Atlantic liner Bremen from Cherbourg to New York in 4 days 17 hours and 42 minutes, a new record.

Discovery of two modifications or isotopes of oxygen and carbon and demonstration that a molecule of hydrogen contains two distinct forms of that element.

Manufacture of two to three times the amount of gasoline from crude oil by the hydrogenation process.

Construction of the new eight-mile Cascade electric tunnel, construction of the international bridge at Detroit, and beginning of the Hudson river bridge at New York.

Introduction of the wide motion picture film and extension of the use of color pictures.

Production of stainless steels, or nitrided steel and use of tungsten carbide for tooling of hard objects.

Beginning of construction of the navy's giant new dirigibles at Akron, Ohio.

FRANCE PLANS TO ERECT MEMORIAL TO HONOR HERRICK

Steadfastness of Former Ambassador in Face of Invasion to Be Recognized

BY MINOTT SAUNDERS

Paris—While France is doing everything possible to make welcome the new American ambassador, Walter E. Edge, his presence here has in a sense enlightened memories of his distinguished predecessor, Myron T. Herrick.

The Paris municipal council has taken steps for the erection of a monument which will show that Paris bore Myron T. Herrick the same love he left for her.

The Herrick monument should particularly recognize, it is agreed, Herrick's steadfastness and great gesture to France when invasion by the German army seemed imminent during the early days of the World War. The French feel that Herrick, by refusing to budge from the threatened city and by remaining to protect the inhabitants and museum, achieved a greatness of which posterity should be reminded.

EDGE FAVORABLY RECEIVED

Ambassador Edge has made a very favorable impression, and pleasing contrasts between the American embassy under Herrick and now have been drawn. Since the war, Herrick was a widower, but the new ambassador has brought a young and charming wife.

Mrs. Edge, by her cordiality and happy knowledge of the French language, was an instantaneous success in her new surroundings and French newspaper writers have freely used superlatives in their praise and admiration of her.

Also, for the first time in years, the American embassy is surrounded with the happiness of little children. Camille G. and Marie Esther, 4 and 6, the ambassadorial children, are delightfully happy in the new very arrangements that have been made for them in the stately building on the Place d'Orleans that Ambassador Herrick purchased for the American government.

"The presence in France of a new ambassador from the United States revives the memory of his predecessor and the debt of recognition which France owes him," said one writer. "After the double loss of Foch and of Myron T. Herrick, we said, 'In fifteen days the sombre days of the war have been twice evoked for us. One of the greatest soldiers of our time has preceded by a few days to the tomb one of the noblest hearts which bear while mankind was embroiled.'"

MEMORIAL FUND URGED

The Liberte, prominent newspaper, has suggested that the Municipal council throw open a subscription fund for a Herrick memorial, and predicts that popular subscriptions would flow in from people high and low in French life.

"The population," it adds, "should reread on this monument Herrick's famous words when the government left Paris in 1914 for Bordeaux: 'No! I will not leave Paris. Someone must remain as a defender of the rights of mankind. Who will protect your monuments, your museums, your libraries? If for I will speak in the name of the United States. Be tranquil. I shall know how to prevent pillages and massacres.'"

picture film and extension of the use of color pictures.

Production of stainless steels, or nitrided steel and use of tungsten carbide for tooling of hard objects.

Beginning of construction of the navy's giant new dirigibles at Akron, Ohio.

MEN TEACHERS BEGIN TO TUTOR KING MICHAEL

Bucharest—(AP)—King Michael I of Romania, having celebrated his eighth birthday, is rapidly being graduated from the care of governesses to the oversight of tutors.

Probably next summer the boy king will be placed under the eye of Prof. Jorga, the man who tutored the youthful monarch's father, Prince Carol, who renounced his right to the throne.

Prof. Jorga is head of the Free University in Wallonia de Nimie and has been notified that King Michael is to spend next summer in that place.

ARMY SUBMITS REPORT ON CHRISTMAS WORK

The final report on the Christmas work of the Salvation Army has been completed, according to an announcement made by Captain Henry Servais Tuesday. Sixty-eight dinners and baskets were given out to needy families, 356 toys were distributed and 237 bags of candy were given away. A program for the poor was given Dec. 26 at the hall and a total of about 500 people in Appleton were benefited by the Salvation Army during the Christmas season. The money realized through the kettle covered about half of the expense of the charity work.

LIVESTOCK PRICES EXPECTED TO HOLD UP ANOTHER YEAR

Outlook Is Good, Says President of Equity Sales Association

North Fond du Lac—(AP)—Live stock prices for Wisconsin were good during 1929, and J. J. Lamb, president of the Equity Livestock Sales Association, Milwaukee believes the 1930 outlook is good for all farmers, including the raisers of livestock for market.

His organization is said to be the largest cooperative stock sales organization in the state. In a statement for the Associated Press on the works of the association and its hopes for the next year he said the past year has created the impression that "farmers are determined to make something out of farming. They are more ready to go into farm organizations, they are making a study of cooperative marketing of farm products. With support of the government we believe a bright future has ahead for Wisconsin farmers."

His statement on prices was: "As 1929 draws to a close, price levels of livestock have been good, except in November and December. All kinds of cattle maintained a high price throughout the year to about November first. However, the average for the year was good. A good maintained a high average for the whole year. Hogs maintained a good average until the fall months when they went to a lower level than seemed reasonable when feed costs were taken into consideration."

"The Equity Cooperative Livestock sales agency at Milwaukee has a fine plan for the year," he said. "We observe that the farmer's sales agencies at South St. Paul and Chicago made a splendid gain for the same period and believe the producers are taking notice of the government's advice in supporting their cooperative marketing organizations."

Mr. Lamb has been driving over Wisconsin for the past eight years, talking to farmers in groups and individually. He observed that "in some northern sections a great improvement has been made, more land cleared, many new buildings put up, and old buildings repaired. Even small villages are much improved. "Observations of conditions in the old settled sections of the state does not reveal improvement. I believe some of the old sections have not gotten away from the inflated war prices, which have also affected high taxes. They seem also to be affected by the costly work of keeping up worn out soil."

There are now over 2,250,000 horses in Australia; in 1788 there were five—one station, three mares, and a colt.

MEN OF WAR

The U. S. S. Medusa, a \$5,200,000 repair ship.

EDINBURGH, Scotland, Dec. 31.—The U. S. S. Medusa, a \$5,200,000 repair ship, arrived here today from New York. The ship is the largest repair ship in the U. S. Navy and is the first of her class. She was built at the New York Navy Yard and is the largest ship ever built in the United States.

BY RODNEY DUTCHER

Repair ships are the backbone of the U. S. Navy. They are the ships that keep the fleet in fighting condition. They are the ships that repair the guns, the engines, the hulls, and the equipment of the fighting ships. They are the ships that make it possible for the fleet to stay at sea for long periods of time.

The U. S. S. Medusa is the largest repair ship in the U. S. Navy. She is 300 feet long, 45 feet wide, and has a draft of 25 feet. She has a displacement of 5,200 tons and a speed of 15 knots. She is armed with two 4-inch guns and has a complement of 100 men.

She was built at the New York Navy Yard and is the largest ship ever built in the United States. She is the first of her class and is the largest repair ship in the world.

WAUTOMA PRIEST IS
NEW LONDON SPEAKER

**Tells Lions That Tolerance
Does Not Express True
Christian Spirit**

Special to Post-Crescent.
New London — Declaring his dislike of the word "tolerance" commonly used to express forbearance of one another's shortcomings, the Rev. Father Nuremberg, of the Wautoma Catholic church, spoke to the Lions club at its service luncheon Tuesday at the Elwood hotel. The speaker asserted that tolerance does not in any degree express the true spirit of Christian brotherhood, which should delve deeper into the heart of affairs, making itself felt through sincere love and help. Tolerance in itself, is not enough, signifying a complacent satisfaction with affairs as they seem, glossing over weaknesses, content to let lives of others drift as they may.

This trend of thought was borne out in a number of well told stories, the entire theme of the talk being based on the ancient story of the Three Wise Men of the East, whose journey to Bethlehem the Rev. Nuremberg asserted marked the first historical instance of brotherly love, and later in history was to form the basis of all service clubs. If, he continued, more Christian charity and sincerity were practiced in attempts to come closer to the inner lives of our fellowmen there would be less war, and others of the world's deplorable evils.

PLATTE FUNERAL TO
BE HELD THURSDAY

Special to Post-Crescent.
New London—The funeral of Albert Platte, 79, who died Sunday at his home on N. Water-st, following a long illness will be held at 9 o'clock Thursday morning at the Most Precious Blood Catholic church, the Rev. Otto Kolbe in charge.

HOLD FAMILY REUNION
AT HORTONVILLE HOME

Special to Post-Crescent.
Hortonville—Mr. and Mrs. William Lippold held a family reunion at their home Christmas. Those present were: Henry Lippold and family of New London, Mr. and Mrs. Herman Bowers and family of Liberty, Mr. and Mrs. Orville Langson and family, Mr. and Mrs. Flunker and family, and Milton Lippold and family, all of Hortonville, Norma Lippold of Appleton, and Jerry Zaehn of Hortonville.

Miss Perry Roberts left Tuesday for Milwaukee where she will spend several days with friends before returning to Minneapolis to resume her duties as teacher in a public school there.

Mrs. Carrie Prentice, daughter Ella, and son Francis attended the wedding of Miss Margaret Longfellow, daughter of Mr. and Mrs. Charles Longfellow of Oshkosh and Chester Seftenberg, son of Mr. and Mrs. Joseph Seftenberg of Oshkosh at 4 o'clock Wednesday, December 23 at the Presbyterian church at Oshkosh.

Carl Joseph injured his right hand when it was caught between the fly wheel and frame of a gas engine. Two nails were torn off. Mrs. George Roberts entertained the Senior "500" club at her home Monday afternoon. Prizes went to Mesdames Fred Torrey, Lawrence Dabreiner, and Amelia Heller. Luncheon was served.

Mrs. Helen Sauter left Tuesday for Milwaukee where she will spend the winter with her daughter Mrs. Rudolph Schafer.

Miss Irma Rideout entertained at bridge Monday afternoon at her home. Two tables were in play and prizes went to Mary Kreiss and Ruth Brandt of Appleton. Supper was served.

Mrs. Ted Torrey fractured her elbow Monday morning when she slipped and fell down the cellar steps of her home. She was taken to St. Elizabeth hospital.

MARY THOMPSON HAS
PARTY FOR FRIENDS

Shiocton — Miss Mary Thompson entertained a number of friends at her home Sunday evening. Dancing furnished the evening's entertainment.

Miss Jessie Thorp, who teaches at Milwaukee, spent the holidays at the home of her parents, Mr. and Mrs. Peter Thorp.

Miss Wendolyn Koepke of Fond du Lac was a visitor at the high school Monday.

Miss Ruth Johnson spent the week end at Eagle River with friends.

Mr. and Mrs. Elwood Fisher and son Bobby of Sheboygan spent the holidays at the home of Fred Peckles.

Mr. and Mrs. W. D. Brownson and daughter Muriel Ann spent Sunday at Suring.

Miss Geraldine Locke spent the week end at Hortonville as guest of Miss Marion Towne.

**SHIOCTON GIRL WEDS
WABENO SCHOOL MAN**
Shiocton — Miss Ruth Seless, daughter of Mr. and Mrs. Paul Seless, Shiocton, and Alvin Dreier, son of Mr. and Mrs. August Dreier, Norwalk, will be married at 3 o'clock this afternoon at the Lutheran parsonage here by the Rev. Louis E. Mielke. Mr. and Mrs. Kenneth B. Andrews, brother-in-law and sister of the bride-to-be, will be the attendants. A reception and 6 o'clock dinner at the Seless home will follow the ceremony.

Miss Seless is a graduate of Shiocton high school. Mr. Dreier is an instructor in the agricultural department of Wabeno high school. He is a former principal of Shiocton high school.

The couple will leave for Wabeno Friday where they will live.

HIGH MASONIC OFFICIAL
TO COME TO NEW LONDON

Special to Post-Crescent.
New London — E. T. Hayhurst, deputy grand lecturer of the Grand Lodge of Masons will be in this city on Jan. 7 and will preside at a school for Masons. The lecture will be given at the Manawa lodge on Monday evening by Charles Abrams of this city. Those attending from New London with Mr. Abrams were A. R. Burns, J. D. Rouse, William Wilke and Irving Wilke.

NEW LONDON
SOCIETY

Special to Post-Crescent.
New London—Mrs. C. C. Seims entertained the Autumn Leaf Card club at her home on Monday, the event being the annual Christmas party of the club. Cards and the exchange of gifts furnished entertainment and awards at cards went to Mrs. Robert Dauterman and Mrs. Otto Heinrich.

The organization of a social club composed of members of the Wolf Valley dairy employes force took place on Tuesday. The club organized for creating good fellowship among the members, will be known as the Verifine Dairy club. Frank Huebner has been named as its president; Andrew Smith, vice president; Ben Heulman, secretary, and Art Kleehn, treasurer. A set of by laws will be drawn up soon and a dancing party is to be held sometime during the month.

The club was organized at the instigation of C. L. Kellogg, manager of the plant, who, though a member, is leaving the directorship to the 11 members who comprise its membership. An invitation to the employees of the subsidiary plant at Clintonville will also be issued. Meetings will be held at the plant and various forms of recreation and entertainment will be carried out.

Miss Margaret Cochrane of Stevens Point was honored at a party given by Miss Magdelene Knapstein, E. Cook-st, Monday evening. Miss Alice Fellenz was awarded the prize in bridge. Those present were Miss Edna Allen, Miss Dorothy Zaugg, Miss Gertrude Learman and Miss Felend. Miss Cochrane, former resident, who spent several days here has returned to her home.

OSHKOSH MAN GIVES
TALK AT LODGE MEET

**Fred Peters Installed Worthy
Master of Weyauwega
Chapter**

Special to Post-Crescent.
Weyauwega—The Purpose of Masonry was a subject well portrayed in an address by Allan Tripp, Oshkosh, a member of the local Masonic lodge at the open installation, Friday evening. E. N. Calf of New London gave a talk on the history of Masonry. Mrs. Dan Cross of Winneconne, and Eastern Star deputy, gave a talk, expressing the hope that Weyauwega may soon organize a Star lodge. Mrs. Allan Tripp also addressed the group. Recitations were given by Vaughn and Gilman Hertz. A 6:30 oyster supper preceded the program.

The following officers were installed to take charge for the ensuing year: Worthy Master Fred Peters; deacons, H. Clark and Charles Peterson; secretary, H. J. Becker; treasurer, T. F. Wilson; senior and junior wardens, E. M. Hunt; stewards, Hans Peterson and L. Larkee and Tiler, Charles McDold. C. E. George and Claude Hinchey acted as installing officers.

Mr. and Mrs. Fay Prentice entertained the Saturday Night Bridge club at their home at a Christmas party, Saturday night. Prizes at cards were won by Mrs. Edward Rose, Mrs. Florence Luebke, Edward Zuehlke of Fremont and Mrs. Charles Leiby, Dale.

Funeral services were held for Edwin M. Ziebel, who died at his home on Christmas day after a 10 days illness, from the home in Royalton, Sunday afternoon at 2 o'clock the Rev. Aug. Draeger, officiating. Interment was made in Royalton cemetery.

The deceased was born in Germany, Oct. 22 1881, and shortly after came to America with his parents. He has resided in Royalton since 1883. He is survived by one son, Alvin and two daughters, Mrs. Orin Orr and Miss Viola.

ENTERTAINS FRIENDS
AT FREMONT HOTEL

Fremont—Irvin Bauer entertained the skat players of Weyauwega and Fremont at a 6:30 o'clock duck dinner at Hotel Fremont, Saturday evening. Following the supper seven tables of skat was played and prizes were awarded to Richard Sommer, A. Ewald, William Puls and M. A. Miller.

Mr. and Mrs. William Redeman entertained Mr. and Mrs. Lark Lovejoy, Mr. and Mrs. John Drews and Mr. and Mrs. Herman Redeman at a Christmas party at their home Sunday evening. Cards furnished entertainment and prizes were won by Loreta Drews and Mrs. Lark Lovejoy.

Mrs. Harold Schiesser was taken to the hospital at New London Sunday for treatment.

The Saturday Evening Bridge club met with Mr. and Mrs. Fae Prentice at Weyauwega.

A Christmas party with exchange of gifts was held, and four tables of cards furnished the amusement. Mrs. Edward Rose won first prize, Edwin Zuehlke second, Mrs. Carl Leiby of Dale third, and Mrs. Albert Luedtke fourth.

Mr. and Mrs. Paul Zuehlke and family, were Sunday guests at the Herbert Rehbein home, Winchester.

Mrs. Harry Weiman son Wayne, and Charles Clow, motored to Appleton Sunday were guests at the Chester Clow home.

Mrs. Carl Leiby and children of Dale, visited relatives here the last week.

METHODIST PASTOR
ADDRESSES LIONS

Special to Post-Crescent.
Waupaca — Between 65 and 70 Lions and their wives met at the Inn hotel at a 6:30 dinner Tuesday evening. The dinner recently was postponed from the regular Monday luncheon. Following the dinner, a New Year's watch party was held at Castle hall to which the Lions invited a number of their friends.

The Rev. Frank B. Dunkley of the Methodist church of this city was the speaker of the evening.

The E. F. U. lodge entertained at a juvenile Christmas party for its juvenile members at the Woodman hall Monday from 2 to 5 o'clock. A program of music singing and recitations by the little folks was rendered.

Mr. and Mrs. A. F. Anderson of Oshkosh were Waupaca business callers Monday.

Mr. and Mrs. C. W. Bellinger and son Willard and daughter Ruth Chicago, are guests of the former's brother Marve C. Bellinger of the Inn hotel. Mrs. Ruth is a student at Northwestern college and William is a student at Crane college, Chicago.

**PLANS HUGE ROCKET TO
STUDY AIR**
Berlin — A large rocket, propelled by explosion of powder charges at varying intervals, is planned by Professor Oberth to study the atmosphere of the space far above the earth.

He has planned his rocket to reach a distance of 31 miles in the air, and it is expected that this height will be reached in one minute. While it is high in the air scientific instruments will be released and dropped back to earth with their recordings by means of parachutes.

The rocket will be fired from Greifswalder Oie, a small island off the Baltic coast, and will probably come down somewhere in the Baltic Sea.

Here Are The Answers

To Newspaper Puzzle

Here is the identification of the big newspapers of 1929 appearing on Page One today. Each of these pictures was printed in the Appleton Post-Crescent at the time, being supplied by NEA Service, the world's greatest newspaper feature service, which serves this newspaper exclusively in this city.

FEBRUARY—The wrecked plane in which Colonel Lindbergh and Anne Morrow escaped death at Mexico City. The pictures of this accident were flown by airplane every foot of the way from Mexico City to St. Louis, Mo., including an epochal

MONEY SUPPLY FOR
COMMERCE, TRADE
ACCUMULATING NOW

**Reservoirs Will Be Full by
Spring, Treasury Officials
Believe**

BY J. C. ROYLE
Copyright, 1929, by Cons. Press
Washington—CPA—The supply of money which will carry commerce and trade over the spring and summer is now accumulating in the financial reservoirs of the nation. Treasury officials are confident that by spring the reservoirs will be full and a flood of money will be flowing over the spillways into the channels of industry and trade.

The cold-blooded conservatism engendered by the recent flustering out of the security price pyramid is acting on the flow just now just as freezing weather acts on the streams of the country.

Wholesale and retail merchants, uncertain as to the final effect of the financial unbusiness which has prevailed since late in October, have bought just as little as possible to carry on business. Stocks are growing shorter every day. But demand is not becoming shorter. On the other hand, it is growing and it will not be long until decidedly increased buying will be necessary to keep up with it. Such buying is beginning to make its appearance.

Government officials obviously are really confident that conditions of the country are excellent. They feel that the businessmen of the country will come to agree with them. This, they say, will take from 30 to 90 days, depending on the individual businessman. When that belief is reached, however, the government executives expect to see released a flood of orders which will tax producers to the utmost. They go even further and predict that 1930 will be a better business year than 1929. The first quarter, they indicate, probably will fall somewhat below the levels established in the first three months of 1929, but the last three quarters will more than make up for it.

Funds for year-end financing of interest and dividend requirements are in more than ample supply. The reinvestment demand is expected to be heavy. Moreover, some of the highest executives in the financial world foresee a diversion of the huge sums from stocks and bonds to industrial purposes. They say that the huge trust funds and corporation surpluses which have been thrown into the canyons of Wall Street and LaSalle streets in the last three years and which have made possible the huge volume of speculation are going to be diverted more and more to industrial production. Instead of a corporation lending its surplus in the call money market, they believe it will build another factory, convinced that production in their own line is a safer and more satisfactory form of profit production than loans for speculation purposes.

The New York stock exchange and the Chicago board of trade and other markets are not going to be forced out of business by lack of transactions. More people than ever before have formed the habit of buying and selling stocks. Volume of stock trading and transferred values likely to continue large, national financiers assert. The public will continue to participate and enough money will be available to assure a broad, consistent market. This is essential, bankers feel. Not only has the number of traders increased but the prosperity of the country and new industrial developments have led to formation of thousands of new companies for which some market is necessary in order that investors may participate in the new developments.

**CLINTONVILLE PAIR
GIVES CARD PARTY**
Clintonville—Mr. and Mrs. Earl Moedenhauer entertained a few friends at their home on Monday evening. The evening was spent in playing cards. Prizes were awarded to the Rev. and Mrs. E. C. F. Stuhenvill and Harry and Irene Vandree. Guests included, The Rev. and Mrs. E. C. F. Stuhenvill, Miss Irene Vandree, Miss Gertrude Rudolph, Harry Vandree, and Lloyd Eggleston.

Mrs. Phoebe Du Frane, Milwaukee spent Monday with friends in this city. She will leave this city Wednesday or Thursday for Lincoln, Neb., where she will visit her daughter.

The Amity division of the Dorcas society, Congregational church met at the home of Mrs. William Elsbury on Waupaca Street on Tuesday afternoon. The afternoon was spent socially after which refreshments were served.

Sheriff Arthur Steenbeck, Waupaca transacted business in this city on Monday.

William Thompson left Tuesday for Atlanta City where he will transact business for a number of days.

ROBOT CHOIRS
Berlin — Choirs and organists will be replaced in churches by the movement started in German churches. Spreads, Phonographs have replaced these musicians, and two of them, playing the same record, carefully synchronized and the sound magnified, produce a full-toned volume.

1000-mile night flight in a special NEA Service plane from the Mexican border to St. Louis. There the pictures were telephoned to cities from coast to coast.

MARCH—President Hoover taking the oath of office, administered by Chief Justice Taft. An NEA airplane equipped with a darkroom was used to fly the inauguration pictures from Washington to New York, the plates being developed en route. From New York they were telephoned to widely scattered cities.

MAY—Rescue workers braving deadly fumes at the Cleveland Clinic disaster, in which more than 100 persons lost their lives. NEA pictures of this disaster were the first to reach the telephoto wires for transmission to various bureaus.

JULY—Pope Pius XI upon the occasion of his emergence from the Vatican, the first time a pope had left the Vatican since 1870. This picture was flown from Rome to London by specially chartered NEA airplanes and sent by radiophoto across the Atlantic to New York and thence across the United States by telephone.

SEPTEMBER—Wreckage of the air liner, City of San Francisco, in which eight persons were killed when it crashed in a wilderness on top of Mount Taylor in New Mexico. NEA cameramen were forced to ride horseback and make their way on foot for miles up narrow mountain trails to get the pictures after which they were flown by NEA airplane direct to the St. Louis telephoto station for quick national distribution.

DARBOY GIRLS GIVE
PARTY FOR FRIENDS

Darboy—The Misses Margaret and Catherine Wallace entertained a few friends at their home Sunday evening. Cards and music furnished the amusements, followed by a lunch. The guests present were Mr. and Mrs. Joe Stumpf and family, Mr. and Mrs. Matt Sprangers and family, Mr. and Mrs. Ed Stumpf, Mr. and Mrs. Rueben Schmalz, Mr. and Mrs. John Dietzen, Hildegarde and Joseph Wittman, Trace and Miss Ashauer, Anna and Fred Probst, Henry Stumpf, Joe Mader, Harry Stumpf, John Fischer Stella Vanden Heuvel of Little Chute.

A daughter was born to Mr. and Mrs. James Roleck on Friday.

The Rev. J. Hussien spent the Christmas holidays with friends at Milwaukee.

Mrs. Hugo Wittman entertained a few friends at her home Monday. Cards were played. Those present were Mr. and Mrs. Adolph Stumpf, Mr. and Mrs. Edd Stumpf, Mrs. Anna Mader, Anna Probst, Gordon and Leo Mader.

Your rug is the
DUMPING GROUND FOR ALL KINDS OF
DIRT

TRUCK loads of sand and gravel, wagons heaped with broken glass, sand, mud, and worse debris—how would you like to have them dumped upon your rugs?

That is, in magnified degree, precisely what is being tracked and ground into your floor coverings every day.

This destructive dirt sinks deep into the rug—too deep for the suction of ordinary cleaning to reach it. Only one cleaning method is effective against it. That is beating.

The Hoover—and only The Hoover—provides this beating by means of an exclusive cleaning principle, "Positive Agitation," which enables The Hoover to remove more dirt per minute than any other cleaner.

If you want to keep your rugs free from the cutting, wearing action of embedded grit, you will choose a Hoover.

We will gladly give you a demonstration in your home. Two Hoover models, \$63.50 and \$79.50. With dusting tools, \$76 and \$92. Floor polisher, \$7.50. Liberal allowance for your old cleaner.
